Teaching and Learning Algebraic Thinking with 5- to 12-Year-Olds Carolyn Kieran, 2017-12-04 This book highlights new developments in the teaching and learning of algebraic thinking with 5 to 12 year olds Based on empirical findings gathered in several countries on five continents it provides a wealth of best practices for teaching early algebra Building on the work of the ICME 13 International Congress on Mathematical Education Topic Study Group 10 on Early Algebra well known authors such as Luis Radford John Mason Maria Blanton Deborah Schifter and Max Stephens as well as younger scholars from Asia Europe South Africa the Americas Australia and New Zealand present novel theoretical perspectives and their latest findings The book is divided into three parts that focus on i epistemological mathematical aspects of algebraic thinking ii learning and iii teaching and teacher development Some of the main threads running through the book are the various ways in which structures can express themselves in children s developing algebraic thinking the roles of generalization and natural language and the emergence of symbolism Presenting vital new data from international contexts the book provides additional support for the position that essential ways of thinking algebraically need to be intentionally fostered in instruction from the earliest grades

Teaching and Learning Algebra Doug French, 2002-12-31 Algebra is widely recognized as a difficult aspect of the Mathematics curriculum one that not all pupils see the point of Yet an understanding of algebra provides the key to the great power and potential interest of Mathematics in general Up to now detailed advice and guidance on the teaching and learning of algebra has been difficult to find Here however Doug French provides a comprehensive authoritative and above all constructive guide to the subject

Teaching and Learning Algebra Heidi Strømskag Måsøval, Yves Chevallard, 2016-05-04 The book is based on a longitudinal study of beginning teachers struggles with algebra with strong foundation in the theory of didactical situations Brousseau 1997 The focus is on factors that constrain students engagement with algebraic generality in shape patterns Participants in the study are six student teachers and two teacher educators of mathematics The empirical material consists of videotaped classroom

observations and the mathematical tasks with which the students engaged Three analytic categories emerged from an open coding process which show that the students algebraic generalization is constrained by 1 a limited feedback potential in situations where the students are supposed to solve the mathematical tasks without teacher intervention 2 obstacles the students face when they shall transform into algebraic notation formulae they have expressed informally in natural language and 3 challenges with justification of formulae and mathematical statements that the students have proposed This book provides many practical and concrete examples to guide mathematics education researchers mathematics teacher educators and mathematics educators in teaching algebra in a variety of contexts and environments

Tasks and Competencies in the Teaching and Learning of Algebra Alex Friedlander, Abraham Arcavi, 2018-02-28 *Tasks and Competencies in the Teaching and Learning of Algebra* provides a conceptual approach that will encourage students learning algebra to employ a variety of thinking processes and strategies and most importantly will enable them to truly understand the concepts that underlie the problems they are solving The authors framework develops those skills and competencies aligned with the goals of the Common Core State Standards that are necessary for an integrated conceptual learning of algebra The book s four chapters include tasks focusing on algebraic expressions equations and functions followed by tasks that integrate several mathematical concepts Each of the 48 tasks in this book contains a classroom ready task with items arranged by increasing order of complexity a discussion of the task s main ideas and objectives solutions for each item in the task with suggestions of various methods that students might use and a listing of the essential competencies that students can develop by working on the task All 48 tasks are also available at NCTM s More4U website as downloadable and printable worksheets to hand out to students With its strong conceptual framework *Tasks and Competencies in the Teaching and Learning of Algebra* is designed to enable teachers teacher educators and curriculum designers to help students at all levels master the ideas and practices found in algebra and to develop skills they can use throughout their mathematics education

Accessible Algebra 30 Modules to Promote Algebraic Reasoning Grades 7 10 is for any pre algebra or algebra teacher who wants to provide a rich and fulfilling experience for students as they develop new ways of thinking through and about algebra The book includes 30 lessons that identify a focal domain and standard in algebra then lays out the common misconceptions and challenges students may face as they work to investigate and understand problems Authors Anne Collins and Steven Benson conferred with students in real classrooms as the students explained what problem solving strategies they were using or worked to ask the right questions that would lead them to a deeper understanding of algebra Each scenario represents actual instances of an algebra classroom that demonstrate effective teaching methods real life student questions and conversations about the problems at hand Accessible Algebra works for students at every level In each lesson there are sections on how to support struggling students as well as ways to challenge students who may need more in depth work There are also numerous additional resources including research articles and classroom vignettes Research Issues in the Learning and Teaching of Algebra Sigrid Wagner,Carolyn Kieran,1989 First Published in 1989 Routledge is an imprint of Taylor Francis an informa company **The Future of the Teaching and Learning of Algebra** Kaye Stacey,Helen Chick,Margaret Kendal,2006-04-11 Kaye Stacey Helen Chick and Margaret Kendal The University of Melbourne Australia

Abstract This section reports on the organisation procedures and publications of the ICMI Study The Future of the Teaching and Learning of Algebra Key words Study Conference organisation procedures publications The International Commission on Mathematical Instruction ICMI has since the 1980s conducted a series of studies into topics of particular significance to the theory and practice of contemporary mathematics education Each ICMI Study involves an international seminar the Study Conference and culminates in a published volume intended to promote and assist discussion and action at the international national regional and institutional levels The ICMI Study running from 2000 to 2004 was on The Future of the Teaching and Learning of Algebra and its Study Conference was held at The University of Melbourne Australia from December to 2001 It was the first study held in the Southern Hemisphere There are several reasons why the future of the teaching and learning of algebra was a timely focus at the beginning of the twenty first century The strong research base developed over recent decades enabled us to take stock of what has been achieved and also to look forward to what should be done and what might be achieved in the future In addition trends evident over recent years have intensified Those particularly affecting school mathematics are the massification of education continuing in some countries whilst beginning in others and the advance of technology **The Learning and Teaching of Algebra** Abraham Arcavi,Paul Drijvers,Kaye Stacey,2016-06-23 IMPACT

Early Algebra Carolyn Kieran, JeongSuk Pang, Deborah Schifter, Swee Fong Ng, 2016-07-11 This survey of the state of the art on research in early algebra traces the evolution of a relatively new field of research and teaching practice With its focus on the younger student aged from about 6 years up to 12 years this volume reveals the nature of the research that has been carried out in early algebra and how it has shaped the growth of the field The survey in presenting examples drawn from the steadily growing research base highlights both the nature of algebraic thinking and the ways in which this thinking is being developed in the primary and early middle school student Mathematical relations patterns and arithmetical structures lie at the heart of early algebraic activity with processes such as noticing conjecturing generalizing representing justifying and communicating being central to students engagement

Teaching to the Math Common Core State Standards

F. D. Rivera, 2015-06-17 This is a methods book for preservice middle level majors and beginning middle school teachers It takes a very practical approach to learning to teach middle school mathematics in an emerging Age of the Common Core State Standards The Common Core State Standards in Mathematics CCSSM is not meant to be the official mathematics curriculum it was purposefully developed primarily to provide clear learning expectations of mathematics content that are appropriate at every grade level and to help prepare all students to be ready for college and the workplace A quick glance at the Table of Contents in this book indicates a serious engagement with the recommended mathematics underlying the Grade 5 through Grade 8 and traditional pathway Algebra I portions of the CCSSM first with issues in content practice assessment learning teaching and classroom management pursued next and in that order In this book we explore what it means to teach to the CCSSM within an alignment mindset involving content practice learning teaching and assessment The Common Core state content standards which pertain to mathematical knowledge skills and applications have been carefully crafted so that they are teachable learnable coherent fewer clearer and higher The practice standards which refer to institutionally valued mathematical actions processes and habits have been conceptualized in ways that will hopefully encourage all middle school students to engage with the content standards more deeply than merely acquiring mathematical knowledge by rote and imitation Thus in the CCSSM proficiency in content alone is not sufficient and so does practice without content which is limited Content and practice are both equally important and thus must come together in teaching learning and assessment in order to support authentic mathematical understanding This blended multisourced text is a getting smart book It prepares preservice middle level majors and beginning middle school teachers to work within the realities of accountable pedagogy and to develop a proactive disposition that is capable of supporting all middle school students in order for them to experience growth in mathematical understanding that is necessary for high school and beyond including future careers
