precipitously rapid change and it's worth your reading Playboy This challenging liberating book can unlock not only teachers but anyone for whom language and learning are not dead Nat Hentoff *Critical Legal Education as a Subversive Activity* Helen Gibbon, Ben Golder, Lucas Lixinski, Marina Nehme, Prue Vines, 2015-10-16 In an age when everyone aspires to teach critical thinking skills in the classroom what does it mean to be a subversive law teacher Who or what might a subversive law teacher seek to subvert the authority of the law the university their own authority as teachers perhaps Are law students ripe for subversion agents of or impediments to subversion Do they learn to ask critical questions Responding to the provocation in the classic book *Teaching as a Subversive Activity* by Postman and Weingartner the idea that teaching could or even should be subversive still holds true today and its premise is particularly relevant in the context of legal education We therefore draw on this classic book to discuss in the present volume the consideration of research into legal education as lifetime learning as creating meaning as transformative and as developing world changing thinking within the legal context The volume offers research into classroom experiences and theoretical and historical interrogations of what it means to teach law subversively Primarily aimed at legal educators and doctoral students in law planning careers as academics its insights speak directly to tensions in higher education more broadly *Handbook of Research on Advancing Equity and Inclusion Through Educational Technology* Escudeiro, Paula, Escudeiro, Nuno, Bernardes, Oscar, 2023-08-09 Digital technologies play a significant role in the popular imagination about the future of education as they are a prominent aspect of modern education provision and practice across the globe Due to the increased adoption of digital education materials during the COVID 19 pandemic the pedagogical significance of digital technology has been amplified *Advancing Equity and Inclusion Through Educational Technology* builds upon the available literature in equity and inclusion through educational technology while providing further research opportunities in this dynamic and growing field It provides the opportunity for reflection on this crucial issue by increasing the understanding of the importance of inclusion and equity in the context of educational improvements and providing relevant academic work empirical research findings and an overview of this relevant field of study Covering topics such as sustainable inclusion learning virtual school press programs and generic skills this major reference work is a comprehensive and timely resource for educators and administrators of both K 12 and higher education government officials pre service teachers teacher educators librarians researchers and academicians *Fighting Prosaic Messages* Henry C Amoroso Jr, 2018-04-11 Part historical fiction part memoir part philosophy of education this book begins with a story about a woman's immigration into the U S and how three of her generations struggled in the U S school system The book ends with an analysis of why many students fail in school and what we can do about it Through story and analysis this book offers a critique of the U S education system in 3 parts Part one imagines what the immigration experience was like in the past and reads like historical fiction Part two looks at the ensuing three generations in the present and reads like a memoir Part three gleans lessons from the story as a whole for what we can do better in the future In the historical fiction

part a Sicilian woman named Rose emigrates to the U S at the turn of the twentieth century Knowing no English and illiterate but armed with a moral intelligence she struggles in this strange world of the free rubs shoulders with some of the great thinkers of her day and discusses the nature of education with them Shes one of the many prosaic heroes history books and schools sometimes forget In the memoir part Roses son Henry the authors father drops out of school in the eighth grade to help his single mom by selling newspapershe never thought he was smart enough for school anyway His son Henry Jr goes all the way in school to obtain a PhD but struggles to find a voice along the way Henry Jr s son Justin was seemingly born with an expressive voice but in his shuffle to conform to the school system almost lost it In these 3 cases we see 3 types of students who often fail in school in general In the final analysis part the book reflects on these prosaic cases to understand why so many U S students fail The theme that emerges parallels the traditions of Rousseau Dewey and Montessori students at heart are good and educators are most effective when they treat them as such students learn best by doing and this includes moral doing and students become intrinsically motivated to learn if allowed to think critically creatively and to find their voices If democracy depends on an informed citizenry the questions this book raises about school failure are critical to the future of our nation J A
