Giving Voice to Democracy in Music Education Lisa C. DeLorenzo, 2015-10-23 This book examines how music education presents opportunities to shape democratic awareness through political pedagogical and humanistic perspectives Focusing on democracy as a vital dimension in teaching music the

essays in this volume have particular relevance to teaching music as democratic practice in both public schooling and in teacher education. Although music educators have much to learn from others in the educational field, the actual teaching of music involves social and political dimensions unique to the arts. In addition, teaching music as democratic practice demands a pedagogical foundation not often examined in the general teacher education community. Essays include the teaching of the arts as a critical response to democratic participation, exploring democracy in the music classroom with such issues as safe spaces, sexual orientation, music of the Holocaust, improvisation, race, and technology, and music teaching music teacher education as a form of social justice. Engaging with current scholarship, the book not only probes the philosophical nature of music and democracy but also presents ways of democratizing music curriculum and human interactions within the classroom. This volume offers the collective wisdom of international scholars, teachers, and teacher educators and will be essential reading for those who teach music as a vital force for change and social justice in both local and global contexts.

Ultimately, the text celebrates an Aokian way of being whilst engaging a diversity of perspectives, knowledges, and philosophies in education to reflect on the contribution of his work and its continual enrichment of curriculum scholarship today. This text will benefit researchers, academics, and educators with an interest in curriculum studies, educational research, teacher education, and the philosophy of education more broadly. Interculturality in Schools Robyn Moloney, Maria Lobytsyna, John De Nobile, 2022-07-26 This book provides a comprehensive study of professional learning courses in intercultural settings, exploring how this impacts teachers and brings about change in classrooms, culture, across schools as a whole, and children's lives. The authors argue that teachers and schools must raise the stakes globally in an intercultural practice grounded in educational equity and anti-racism. Identifying the attributes that make a difference in teacher intercultural learning and change through analysis of both quantitative and qualitative data, the study throws up marked tensions and contradictions between the desire to explore both an abstract personal concept and achieve practical outcomes in schools. As case studies of two primary schools dig deep into teachers' lives, the book proposes a model of personal teacher interculturality which is constructed from the inside out. The potential of neglected spaces in schools for

intercultural identity is also highlighted by images of new practice This book is a supportive resource for schools or educational institutions in any global context that are seeking a fresh approach to intercultural education and holistic change
