short a state would not work at all Education is the key for individual chances and success in life and the driving force for developments in society Prosperity derives from education Culture is a result of education just as interest in politics and most important perspectives for later occupations Politics concerning education cannot work where not enough attention is paid to achievements in school where it seems to be not important what students learn in contrast to students in other states The recent PISA study showed unfortunately how little attention was paid to education in Germany in the last decades It is not possible to find a convincing answer to where the problem was may it be the German school system the instruction of new teachers at universities teachers who are no longer motivated after having reached the state of an official parents who do not seem to care about their children's abilities in reading and writing In fact a change in our school system is Germany's deepest need at the moment to improve pupils' achievements Therefore alternative methods will probably gain more and more interest in our school and teaching system I will try to introduce describe and discuss some of these methods I will show up their difficulties risks and also possible chances In the end I will try to decide if those approaches will find their ways sooner or later or if they will remain utopian
