The Montessori Method represents an explicit idealism and turn away from war and violence toward peace and reconstruction. It is built on coherent visions of how to improve human society by helping children realize their full potential as intelligent, creative, whole persons. In the Montessori Method, children are viewed as active authors of their own development, strongly influenced by natural, dynamic, self-righting forces within themselves, opening the way toward growth and learning. Teachers depend for their work with children on carefully prepared, aesthetically pleasing environments.

Viennot,2011-06-28 Everywhere in the world except for the time being in some Asian countries young people are losing interest in science This

disenchantment with science studies is particularly strong in the United States but has affected Europe and France especially. Official statistics confirm this and I can add a telling example of my own. When I began teaching physics at Grenoble University in 1960 there were some 350 students studying to be electrical engineers. Today 57 students are enrolled in the Physics Maitrise programme at the Joseph Fourier University in Grenoble and 15 of them are foreign students. In that time interval the total number of students enrolled in institutes of higher learning in mainland France rose from 309 700 in 1960 to 2 111 100 in 2000/2001. If we look at what happened in the USA to try to avoid making the same mistakes there is indeed a strongly antiscientific trend in that society of which the Politically Correct Movement is the most extreme manifestation. Yet this movement has profoundly influenced the humanities departments of American universities and the persons responsible for training teachers. There is a risk that similar negative effects will show up in France where many primary school teachers have a background in the humanities and often have no scientific culture at all. c P Snow's famous pamphlet on the two cultures was published in 1959 but is still exceedingly topical and should be recommended reading in all teacher training institutes.
