## Teaching In The First Person Understanding Voice And Vocabulary In Learning Relationships Counterpoints Volume 99:

**Teaching in the First Person** Elijah Mirochnik, 2000 The sharp contrasts in teachers metaphors for their relationships with students set the stage for a critical comparison of traditional modern and postmodern educational approaches In Teaching in the First Person three university undergraduate teachers metaphors for education emerge from their candid descriptions of interactions with their students The rich vocabulary that the interviewed teachers used to portray their interactions with U C Berkeley undergraduate architecture students is woven into a larger examination of how assumptions that teachers hold about knowledge impact their treatment of students The investigation of theory embedded within teachers narratives begins with a cogent historical overview of paradigm shifts within science poetry education and philosophical theories of knowledge A critique of harmful educational practices supported by the traditional mind as machine metaphor for knowledge invites educators to embrace the postmodern bodily basis for knowing as a viable alternative that radically redefines the teacher student relationship
