Teaching Worlds:

Teaching the World's Teachers Lauren Lefty, James W. Fraser, 2020-07-07 Examining teacher education in an international context this book captures the diversity of the world's educators. Many countries confront surprisingly similar challenges in preparing K-12 educators for success while national contexts also make for surprising differences. In *Teaching the World's Teachers*, education historians Lauren Lefty and James W. Fraser and their contributors make a convincing case for approaching these shared challenges from a more global and historically minded perspective. Written by education scholars from eleven different countries: Argentina, Brazil, Catalonia, Spain, China, England, Finland, Ghana, Israel, Singapore, South Africa, and the United States, this book provides histories of teacher education reforms between roughly 1980 and 2020. The authors show how international trends that emerged during this period collided with national and regional contexts to produce unique teacher education systems in different nations. While in some countries the embrace of markets and competition led to a deregulation of the teacher preparation field, in others teaching became a highly regulated and centralized affair. At the same time, ideas and structural models cross borders and education leaders borrow from each other while reshaping plans in each place. Opening with a broad historical overview of global teacher education models beginning in the late eighteenth century, *Teaching the World's Teachers* argues that the field has long been characterized by cross-border connections but shaped by geopolitical hierarchies of power. In an era when teacher quality is widely recognized as one of the most important factors in a child's education, this volume encourages dialogue among teacher educators and policymakers around the world. By understanding the context and contingency of where we have been, the authors hope that readers will walk away with a more empowered sense of where we are headed in the all-important task of teaching the world's teachers. Teaching in the Flat World Linda Darling-Hammond, Robert Rothman, 2015-04-17 This book will help school systems improve their teacher workforce by drawing important lessons from nations with high-performing educational systems as well as from successful state experiments in the United States. The authors examine common features and differences in the approaches of high-performing systems that made education a top priority and developed high-leverage strategies to meet their goals. Their varied solutions offer valuable ideas for how to create a strong teacher and school administrator corps from recruitment and preparation through induction, professional development, evaluation, and career advancement into leadership roles. Chapters focusing on systems in Finland, Ontario, and Singapore are coauthored by local scholars with
