Erskine started a General Honors program that was the precursor of the Great Books programs popularized by his student Mortimer Adler As a set term Great Books has elicited more than some controversy especially because most relatively short lists of such works mostly features dead white men However most any group in America has made the Great Ideas their own This book explores the benefits of reading Great Books and is virtually unique in detailing what a series of Great Books classes has looked like over the past decades **Value Management** Roger H. Davies,2016-02-17 Change programmes in both private and public sectors have a poor record of delivering their intended value The reasons given most often for their failure include lack of executive support or buy in from key users loose requirements definition weak programme

management and plain wishful thinking They rarely include technical limitations Value Management puts forward the view that the true problem lies in failing to understand the causal links between the intended stakeholder outcomes and the actual programme outputs Repeating the pattern of failure can be avoided by asking two questions Before implementation what capabilities must a change programme deliver when and in what order so as to cause intended value against a defined purpose with speed and certainty During and after implementation what minor adjustments and or major shifts are needed to be certain that the programme remains on purpose and on value and two answers to be given Target time and align change programmes to deliver maximum intended value to stakeholders the baseline business case track and respond to changes during and beyond implementation to ensure that the programme actually delivers or exceeds intended value value realisation The authors show how by asking and answering these questions direction and delivery of any programme can be clarified and greater economic value achieved
