Module 1

G Suite is a cloud computing, productivity and collaboration tools, software and products developed by Google, first launched on August 28, 2006 as Google Apps for Your Domain. G Suite comprises Gmail, Hangouts, Calendar, and Currents for communication; Drive for storage; Docs, Sheets, Slides, Keep, Forms, and Sites for productivity and collaboration; and, depending on the plan, an Admin panel and Vault for managing users and the services. It also includes the digital interactive whiteboard Jamboard.

While these services are free to use for consumers, G Suite adds enterprise features such as custom email addresses at a domain (@yourcompany.com), option for unlimited cloud storage (depending on plan and number of members), additional administrative tools and advanced settings, as well as 24/7 phone and email support.

Being based in Google's data centers, data and information is saved instantly and then synchronized to other data centers for backup purposes. Unlike the free, consumer-facing services, G Suite users do not see advertisements while using the services, and information and data in G Suite accounts do not get used for advertisement purposes. Furthermore, G Suite administrators

can fine-tune security and privacy settings.

As of April 2020, G Suite had 6 million paying businesses, and 120 million G Suite for Education users.

History

From February 10, 2006, Google started testing "Gmail for Your Domain" at San Jose City College, hosting Gmail accounts with SJCC domain addresses and admin tools for account management. On August 28, 2006, Google launched Google Apps for Your Domain, a set of apps for organizations. Available for free as a beta service, it included Gmail, Google Talk, Google Calendar, and the Google Page Creator, which G Suite Applications 1 Module 8 Technology Application in Teaching Elementary Education was later replaced with Google Sites. Dave Girouard, then Google's vice president and general manager for enterprise, outlined its benefits for business customers: "Organizations can let Google be the experts in delivering high quality email, messaging, and other web-based services while they focus on the needs of their users and their day-to-day business". Google announced an edition for schools, then known as Google Apps for Education, on October 10, 2006.

On February 22, 2007, Google introduced Google Apps Premier Edition, which differed from the free version by offering more storage (10 GB per user), APIs for business integration, 99.9% uptime for Gmail, and 24/7 phone support. It cost \$50
