## **Teaching For Commitment Liberal Education Indoctrination And Christian Nurture:**

**Teaching for Commitment** Elmer John Thiessen, 1993 Elmer Thiessen provides a comprehensive critical survey of the debate concerning indoctrination especially in the context of confessional religious education His central aim is to establish that indoctrination as a result of religious instruction is neither inevitable nor as probable as is often assumed by advocates of liberal education Thiessen recognizes that indoctrination can occur in Christian homes and schools He believes however that before the charge of indoctrination can be correctly evaluated we need to develop a more coherent concept of the term He provides a critical examination of the four criteria traditionally associated with indoctrination content method intention and consequences and of the institutional context of indoctrination

**The Outrageous Idea of Christian Teaching** Perry Glanzer, Nathan Alleman, 2019-07-29 Hundreds of thousands of professors claim Christian as their primary identity and teaching as their primary vocational responsibility Yet in the contemporary university the intersection of these two identities often is a source of fear misunderstanding and moral confusion How does being a Christian change one's teaching Indeed should it Inspired by George Marsden's 1997 book *The Outrageous Idea of Christian Scholarship* this book draws on a survey of more than 2 300 Christian professors from 48 different institutions in North America to reveal a wide range of thinking about faith informed teaching Placing these empirical findings alongside the wider scholarly conversation about the role of identity informed teaching Perry L Glanzer and Nathan F Alleman argue that their Christian identity can and should inform professors teaching in the contemporary pluralistic university The authors provide a nuanced alternative to those who advocate for restraining the influence of one's extra professional identity and those who in the name of authenticity promote the full integration of one's primary identity into the classroom The book charts new ground regarding how professors think about Christian teaching specifically as well as how they should approach identity informed teaching more generally

Hábl,2018-09-21 This book is not a list or an overview of various theories of ethics Nor is it a didactic manual for specific teaching units on moral education aimed at some group based on age or a particular theme although some educational frameworks will be proposed As the title suggests the book intends to seek the starting points or foundations without which no moral education would be possible The goal is to formulate and tackle the key questions that precede all moral education What makes good vs evil language possible and meaningful Can virtue be taught and learned What makes our actions good What is the condition of human nature Are we naturally good or evil What constitutes an educator s right to morally influence anyone else not just a child What is the goal of moral education What does a morally educated person look like And how can we ensure the coveted moral result Or in the words of Jan Amos Comenius the teacher of nations how to educate a person to not only know what is good but also to want what is good and to do what is good even when no one is looking *Mere*

Cairney, 2018-04-30 There are many books on Christian education but few consider pedagogy with a biblical focus on formation and a grounding in varied related disciplines This book seeks to recapture the term pedagogy and place it at the center of the teacher's role not as a pseudonym for other things but as the critical foundation for the orchestration of classroom life This is a view of pedagogy that accepts that children come to classrooms as inhabitants of multiple and varied communities Some are known and shared with teachers but many are not Children cannot be left to find their way in the world for as they encounter competing and contradictory worlds their hopes dreams and intentions are shaped Teachers play a key role in students formation by shaping classroom life for all of life is used by God to reveal himself The things taught the priorities set and activities planned the experiences structured and books shared indeed everything in and outside school acts upon and shapes our students Pedagogy is the vehicle for shaping the life of the school Learning requires more than subject content and good teaching The central task of teachers is the development of a pedagogy that shapes life This book offers challenge and guidance as teachers engage in this noble task

**In Defence of Religious Schools and Colleges** Elmer John Thiessen, 2001 It is often argued that religious schools and colleges promote intolerance divisiveness and fanaticism and that they violate the principle of academic freedom Some writers also suggest that economic support for religious schools by the state violates the principle of the separation of church and state Elmer Thiessen provides a philosophical defence of religious schools and colleges against these and other standard objections He concludes with a radical proposal a pluralistic educational system will better prepare students for citizenship in pluralist liberal democracies than a monopolistic state maintained school system In placing his argument within the context of liberal democratic values Thiessen gives concrete examples of objections to religious schools and offers practical suggestions that follow from the
