Models for Improving College Teaching Jon E. Travis,1997 This report presents a collection of teaching models to help college faculty improve their teaching Six categories of teaching models are presented 1 assessment and feedback models including the Classroom Assessment model created by Angelo and Cross and already widely used among community college faculty 2 discussion and sharing models such as the Great Teachers Seminar which provide faculty with an event and an environment especially conducive to sharing ideas among colleagues 3 dissemination models which dispense an extensive assortment of ideas to large audiences of faculty 4 clinical development models such as the Instructional Skills Workshop which uses a laboratory setting common to teacher preparation programs 5 teaching and learning models such as Anderson s Adaptive Control of Thinking model which describes the learning process and presents specific procedures to facilitate specific learning types and 6 instructional planning models such as Gagne s Instructional Event Design that can help the faculty member through the process of course and lesson planning Three appendixes provide teaching resource lists and sample questions using classification systems Contains approximately 240 references MDM The College Teacher's Handbook Magna Publications Incorporated,2018-05 **Inspired College Teaching** Maryellen Weimer,2010-02-22 Praise for Inspired College Teaching The thoughtfulness personalization and consideration Maryellen Weimer demonstrates in

discussing the experience of faculty members her ability to identify issues that are shared and solvable and her suggestions and solutions to commonly experienced stressors and difficulties in college teaching are major strengths of this volume In addition her personal and professional reflections on her long career as a faculty member writer and faculty developer expose tantalizing research questions that young education researchers might want to examine The originality of this volume is its exploration of and reflection on a faculty member s career from a long term perspective The focus on iterative self and course renewal is personal and thus practical In a way it is a workshop between book covers or perhaps several workshops

Laura L B Border director Graduate Teacher Program and Collaborative Preparing Future Faculty Network University of Colorado at Boulder A book by Maryellen Weimer always displays her wonderful grasp of the literature on college teaching and learning her ability to tell good stories and her wit and wisdom This one is no exception Nancy Van Note Chism professor Indiana University School of Education Indiana University Purdue University Indianapolis Although I work at a faculty teaching center and encounter many books on teaching I have seen very few that span the full arc of the teaching career and what steps can be taken at each stage in order to retain vitality all the way through the way that this book does I look forward to getting my own copy and using it as a resource in the faculty development activities of my center It will have a wide readership

An Evidence-based Guide to College and University Teaching Aaron S. Richmond, Guy A. Boysen, Regan A. R. Gurung, 2016-06-10 What makes a good college teacher This book provides an evidence based answer to that question by presenting a set of model teaching characteristics that define what makes a good

college teacher Based on six fundamental areas of teaching competency known as Model Teaching Characteristics outlined by The Society for the Teaching of Psychology STP this book describes how college faculty from all disciplines and at all levels of experience can use these characteristics to evaluate guide and improve their teaching Evidence based research supports the inclusion of each characteristic each of which is illustrated through example to help readers master the skills Readers learn to evaluate their teaching abilities by providing guidance on what to document and how to accumulate and organize the evidence Two introductory chapters outline the model teaching characteristics followed by six chapters each devoted to one of the characteristics training instructional methods course content assessment syllabus construction and student evaluations The book Features in each chapter self evaluation surveys that help readers identify gaps between the model characteristics and their own teaching case studies that illustrate common teaching problems discussion questions that encourage critical thinking and additional readings for further exploration Discusses the need to master teaching skills such as collaborative learning listening and using technology as well as discipline specific knowledge Advocates for the use of student learning outcomes to help teachers better evaluate student performance based on their achievement of specific learning goals Argues for the development of learning objectives that reflect the core of the discipline s theories and applications strengthen basic liberal arts skills and infuse ethical and diversity issues Discusses how to solicit student feedback and utilize these evaluations to improve teaching Intended for professional development or teacher training courses offered in masters and doctoral programs in colleges and universities this book is also an invaluable resource for faculty development centers college and university administrators and college teachers of all levels and disciplines from novice to the most experienced interested in becoming more effective teachers Teaching & Learning in College Gary S.

Wheeler,2002 Gary Wheeler of Miami University has assembled six leading educators to present a collection of issues offering valuable insight into the state of teaching and learning to a target audience of graduate students and relatively new higher education faculty These are co authors who speak authoritatively on topics but who have also taken the time to personalize the information Topics include the role of community in learning diversity and new roles for faculty developers computing the value of teaching dialogues teaching and learning different academic settings teaching and learning as a transactional process and more than a thermometer using assessment effectively From publisher s description *Teaching Strategies for the College Classroom* Maryellen Weimer Ph. D.,2013 This book is a classroom tested tool kit for faculty members who want to develop their teaching practice The 35 articles are drawn from the pages of The Teaching Professor newsletter and are written by college faculty They contain concrete pedagogical strategies that have been tested in the classrooms and form a handbook of classroom strategies **Resources in Education** ,1998-07 **Human Resources and Higher Education** John K. Folger,Helen S.. Astin,Alan E. Bayer,1970-03-27 This volume is concerned with the question of how the United States educates and utilizes its intellectually gifted youth It examines the manpower system from the point

of view of supply and demand It brings a deep understanding of the set of interrelated forces that determine the education and utilization of trained manpower

33 Simple Strategies for Faculty Lisa M. Nunn, 2018-10-12 Winner of the 2020 Scholarly Contributions to Teaching and Learning Award from the American Sociological Association Many students struggle with the transition from high school to university life This is especially true of first generation college students who are often unfamiliar with the norms and expectations of academia College professors usually want to help but many feel overwhelmed by the prospect of making extra time in their already hectic schedules to meet with these struggling students *33 Simple Strategies for Faculty* is a guidebook filled with practical solutions to this problem It gives college faculty concrete exercises and tools they can use both inside and outside of the classroom to effectively bolster the academic success and wellbeing of their students To devise these strategies educational sociologist Lisa M Nunn talked with a variety of first year college students learning what they find baffling and frustrating about their classes as well as what they love about their professors teaching Combining student perspectives with the latest research on bridging the academic achievement gap she shows how professors can make a difference by spending as little as fifteen minutes a week helping their students acculturate to college life Whether you are a new faculty member or a tenured professor you are sure to find *33 Simple Strategies for Faculty* to be an invaluable resource

Interactive Lecturing Elizabeth F. Barkley, Claire H. Major, 2018-01-24 Tips and techniques to build interactive learning into lecture classes Have you ever looked out across your students only to find them staring at their computers or smartphones rather than listening attentively to you Have you ever wondered what you could do to encourage students to resist distractions and focus on the information you are presenting Have you ever wished you could help students become active learners as they listen to you lecture Interactive Lecturing is designed to help faculty members more effectively lecture This practical resource addresses such pertinent questions as How can lecture presentations be more engaging How can we help students learn actively during lecture instead of just sitting and passively listening the entire time Renowned authors Elizabeth F Barkley and Claire H Major provide practical tips on creating and delivering engaging lectures as well as concrete techniques to help teachers ensure students are active and fully engaged participants in the learning process before during and after lecture presentations Research shows that most college faculty still rely predominantly on traditional lectures as their preferred teaching technique However research also underscores the fact that more students fail lecture based courses than classes with active learning components Interactive Lecturing combines engaging presentation tips with active learning techniques specifically chosen to help students learn as they listen to a lecture It is a proven teaching and learning strategy that can be readily incorporated into every teacher s methods In addition to providing a synthesis of relevant contemporary research and theory on lecturing as it relates to teaching and learning this book features 53 tips on how to deliver engaging presentations and 32 techniques you can assign students to do to support their learning during your lecture The tips and techniques can be used across instructional methods and academic disciplines both onsite including small lectures and large lecture halls as well as in online courses This book is a focused up to date resource that draws on collective wisdom from scholarship and practice It will become a well used and welcome addition for everyone dedicated to effective teaching in higher education

Teaching at Its Best Linda Burzotta Nilson, 1998 New college instructors often complain they are handed their working papers and office keys shortly after their appointments and then set adrift Nilson teaching effectiveness and innovation Clemson U gives practical advice on preparing for classes including ways to develop ironclad syllabi setting expectations of and for students including managing incivility preserving academic honesty amongst a student population which is simply not interested in it identifying varieties of learning and developing teaching strategies teaching problem solving and assessing outcomes In this new edition Nilson includes

Harvey, Teresa Heinz Housel, 2011-09-26 Gain a greater understanding of the academic cultural and social experiences of first generation college students FGS Fascinating heart touching and important the research and the stories presented here enlighten what FGS often have to overcome to successfully complete their degrees With an emphasis on improving FGS college success retention and graduation rates this volume first covers common obstacles and the trend of FGS continuing on for graduate degrees Section Two discusses the complex interplay of social academic emotional and financial influences on academic performance The chapters collectively affirm that the commitment of university resources is critical to college success This is the 127th volume of the Jossey Bass higher education quarterly report New Directions for Teaching and Learning which offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers **Preparing for College and University Teaching** Joanna Gilmore, Molly Hatcher, 2023-07-03 This book is a guide for designing professional development programs for graduate students The teaching competencies framework presented here can serve as the intended curriculum for such programs The book will also be an excellent resource for evaluating programs and will be an excellent resource for academics who study graduate students This book presents the work of the Graduate Teaching Competencies Consortium to identify organize and clarify the competencies that graduate students need to teach effectively when they join the professoriate To achieve this goal the Consortium developed a framework of 10 teaching competencies organized around three overarching questions What do graduate students need to achieve by the end of their graduate education to be successful teacher scholars What do graduate students need to understand about higher education to have successful careers as educators What do graduate students need to do to be successful teachers during their graduate student careers Although much work has been done to identify the competencies of effective teachers in higher education only a small portion of this work has been conducted with graduate student instructors This is an important area of research given that graduate students are critical in the higher education academic pipeline Nationally graduate students teach between 25% and 50% of courses offered at the undergraduate level Graduate student teaching is also critical because during early teaching experiences teachers establish a teaching style and set of teaching skills which will endure as graduate students enter the professoriate It is important to develop a teaching competency framework that is specific to graduate student instructors as they often have unique needs and roles as teachers For example graduate student instructors are in the unique position of becoming experts in their field concurrent with learning to teach Moreover as many professional development programs for graduate student instructors evolve based upon factors such as available resources and perceived needs of graduate students this framework will be a useful aid for thoughtfully designing strategic evidence based

comprehensive professional development opportunities and programs
