Mindfulness and Learning Terry Hyland, 2011-08-21 In recent decades education at all levels has been seriously impoverished by a growing obsession with standards targets skills and competences According to this model only a circumscribed range of basic cognitive skills and competences are the business of education whose main role is to provide employability credentials for people competing for jobs in the global economy The result is a one dimensional economic and bleakly utilitarian conception of the educational task In *Mindfulness and Learning Celebrating the Affective Dimension of Education* Terry Hyland advances the thesis that education stands in need of a rejuvenation of its affective function the impact it has on the emotional social moral and personal development of learners Drawing on the Buddhist conception of mindfulness he advances a powerful argument for redressing this imbalance by enhancing the affective domain of learning *Mindfulness and Learning Celebrating the Affective Dimension of Education* shows how the concept and practice of mindfulness non judgmental present moment awareness and experience can enrich learning at all levels Mindfulness thus contributes to the enhanced achievement of general educational goals and helps remedy the gross deficiency of the affective emotional aspects of contemporary theory and practice The author outlines a mindfulness based affective education MBE programme and shows how it might be introduced into educational provision from the early years to adult education with a view to harmonising the cognitive affective balance across the system

Geography, Culture and Education Rod Gerber, M. Williams, 2013-04-17 An important challenge for our world is to understand how cultural understanding and geographical education can be linked and used to improve the global society We readily accept that our world is constituted by numerous groups of people who are organised by committees tribes regions nations or continental entities How these groups interact show concern for each others well being and progress is still an unpredictable activity Intercultural tensions racial conflicts and religious clashes have all led to the challenges for enacting a constructive world Fundamental perspectives challenge moderate ones and the resulting tensions produce elements of fear doubt and distrust The extremist views of terrorist groups exaggerate these tensions to the extent that some different

cultural groups do not prefer to live in peace with their neighbours Deep seated intercultural tensions predominate over peaceful co existence Such challenges may easily dominate the interaction between racial groups tribes indigenous peoples and colonisers However we know that through the sound practice of intercultural understanding cultural groups in different contexts around the world can interact and co exist successfully and productively In fact they can work together to seek to improve their society This does not mean that one group will dominate the other Rather it means that both groups work together to improve their collective lives Education has played an important role in the long term achievement of such harmony This volume has been developed to demonstrate that geographical education can be a potent force in the development of cultural understanding in different societies Moral Education and Pluralism Mal Leicester, Sohan Modgil, 2005-08-19 Volume IV looks at the development of moral education with particular relation to the context of cultural pluralism Taking a theoretical approach it discusses philosophical issues of moral relativism as well as the application of theory to good practice Skills Development for Inclusive and Sustainable Growth in Developing Asia-Pacific Rupert Maclean, Shanti Jagannathan, Jouko Sarvi, 2012-12-09 Focusing on the Asia Pacific region which in recent years has been the engine of global economic growth this volume surveys trends and prospects in technical and vocational education and training TVET with particular reference to achieving inclusive growth and the greening of economies Underlying the increasing pressure for new models of TVET provision is the rapid pace of technological change demand for a work force which is highly responsive to evolving needs and a transforming market place that calls for higher order skills and lifelong learning The book proposes a re engineered modernized TVET system that fosters an innovative approach which enhances the employability of workers as well as the sustainability of their livelihoods The book includes contributions from leading policy makers researchers and practitioners including those in the private sector in analyzing and forecasting the most urgent priorities in skills development The book argues for creative approaches to TVET design and delivery particularly with a view to improve job prospects and meeting the goals of inclusion sustainable development and social cohesion Addressing issues such as the chronic mismatches between skills acquired and actual skills required in the work place the volume proposes diversified approaches towards workforce development and partnerships with the private sector to improve the quality and relevance of skills development The new imperatives created by greening economies and responses required in skills development and training are addressed Developing TVET is a high priority for governments in the Asia Pacific region as they seek to achieve long term sustainable growth since the continued success of their economic destinies depend on it The volume also includes an emerging framework for skills development for inclusive and sustainable growth in the Asia and Pacific region *Liberalism, Education and Schooling* T.H. McLaughlin, 2017-03-27 A tribute collection of essays edited by author s colleagues and friends **Values Education and Quality Teaching** Terence Lovat, Ron Toomey, 2009-04-07 Some revision of public schooling history is necessary to challenge the dominant mythology that public schools were established on

the grounds of values neutrality In fact those responsible for the foundations of public education in Australia were sufficiently pragmatic to know that its success relied on its charter being in accord with public sentiment Part of the pragmatism was in convincing those whose main experience of education had been through some form of church based education that state based education was capable of meeting the same ends Hence the documents of the 1870s and 1880s that contained the charters of the various state and territory systems witness to a breadth of vision about the scope of education Beyond the standard goals of literacy and numeracy education was said to be capable of assuring personal morality for each individual and a suitable citizenry for the soon to be new nation As an instance the NSW Public Instruction Act of 1880 of NSW 1912 under the rubric of religious teaching stressed the need for students to be inculcated into the values of their society including understanding the role that religious values had played in forming that society's legal codes and social ethics The notion therefore that public education is part of a deep and ancient heritage around values neutrality is mistaken and in need of serious revision The evidence suggests that public education's initial conception was of being the complete educator not only of young people's minds but of their inner character as well [The Journal of Aesthetic Education](#) ,1993 Includes special issues
