Dictionary Use and Dictionary Teaching Annette Klosa-Kückelhaus, Martina Nied Curcio, 2024-10-07 Foreign language learners often use electronic dictionaries or other information from the Internet to solve language problems. However, they seem to have great difficulty using dictionaries and online resources appropriately, profitably and successfully. Their teachers also seem unfamiliar with the current dictionary landscape and sometimes insist on using a single monolingual print dictionary in class. As a result, dictionaries are often banned from the classroom altogether. However, in today's digital, global and multilingual world, appropriate competence in the use of dictionaries is an essential communicative strategy. Dictionary didactics should thus be integrated into foreign language teaching. Against this background, the contributions in this volume discuss how dictionary use can be promoted and integrated into the classroom. They also consider how modern lexical resources and dictionaries should be designed to support learners. Last but not least, they present ideas for educational policies that could promote the use of dictionaries and lexicographic online resources. This volume offers important insights to language teachers, authors of language teaching materials, practical lexicographers and other applied linguists. **How to**

Lowe,2020-07-02 This book introduces the concept of the native speaker frame a perceptual filter within English Language Teaching ELT which views the linguistic and cultural norms and the educational technology of the anglophone West as being normative while the norms and practices of non Western countries are viewed as deficient Based on a rich source of

ethnographic data and employing a frame analysis approach it investigates the ways in which this native speaker framing influenced the construction and operation of a Japanese university EFL program While the program appeared to be free of explicit expressions of native speakerism such as discrimination against teachers this study found that the practices of the program were underpinned by implicitly native speakerist assumptions based on the stereotyping of Japanese students and the Japanese education system The book provides a new perspective on debates around native speakerism by examining how the dominant framing of a program may still be influenced by the ideology even in cases where overt signs of native speakerism appear to be absent
