Liberty and Education Geoffrey Hinchliffe, 2014-08-13 This book takes the thinking of Quentin Skinner Philip Pettit and J G A Pocock on republican liberty and explores the way in which this idea of liberty can be used to illuminate educational practice It argues that republican liberty is distinct from both positive and negative liberty and its emphasis on liberty as non dependency gives the concept of liberty a particularly critical role in contemporary society Each chapter formulates and expounds the idea that an empire of liberty requires the existence of what are termed liberty bearing agents and shows how education with a particular emphasis on knowledge is needed to foster the human powers which allow people to become liberty bearing It is also emphasised however that republican liberty is non perfectionist and non eudaimonic the core values enshrined in an empire of liberty centre on non dependency rather than the promulgation of a certain way of life Drawing on prominent seventeenth century contract theorists the link between liberty and authority is explained suggesting that appropriate authoritative structures need to underpin the provision of education and especially schooling if educational practice devoted to the pursuit of liberty is to flourish Liberty and Education will be of value to both educational theorists unfamiliar with republican theory as well as republican theorists interested in how their theory might play out in education It will also be of interest to researchers and students from the fields of politics and the philosophy of education
