Teaching World Politics:

Teaching World Politics Lev S. Gonick, Edward Weisband, 2020-01-29 In this volume scholars and teachers share ideas about new ways to teach history culture and theory as well as new topics such as gender information flows and discourse This book is the product of a series of roundtable discussions conducted under the auspices of the Annual Meetings of the International Studies Association At both the 1991 Meetings in Vancouver and the 1992 Meetings in Atlanta we were extremely gratified by the response to our roundtables on Teaching World Politics in the 1990s *Teaching International Relations* Scott, James M., Carter, Ralph G., Jolliff Scott, Brandy, Lantis, Jeffrey S., 2021-08-27 This comprehensive guide captures important trends in international relations IR pedagogy paying particular attention to innovations in active learning and student engagement for the contemporary International Relations IR classroom *Teaching Politics and International Relations* C. Gormley-Heenan, 2012-03-12 A state of the discipline approach to teaching and learning in Politics and IR including contributions which discuss the most cutting edge approaches techniques and methodologies for tutors This book discusses the themes and challenges in teaching and learning whilst also exploring these in the specific context of political science and IR *Critical Methods for the Study of World Politics* Shine Choi, Anna Selmeczi, Erzsébet Strausz, 2019-12-05 This book develops an approach to both method and the socio political implications of knowledge production that embraces our embeddedness in the world that we study It seeks to enact the transformative potentials inherent in this relationship in how it engages readers It presents a creative survey of some of the newest developments in critical research methods and critical pedagogy that together go beyond the aims of knowledge transfer that often structure our practices Each contribution takes on a different shape tone and orientation and discusses a critical method or approach teasing out the ways in which it can also work as a transformative practice While the presentation of different methods is both rigorously practice based and specific contributors also offer reflections on the stakes of critical engagement and how it may play an important role in expanding and subverting existing regimes of intelligibility Contributions variously address the following key questions What makes your research method important How can others work with it How has research through this method and or the way you ended up deploying it transformed you and or your practice How did it matter for thinking about community academic collaboration and sharing knowledge This volume makes the case for re politicizing the importance of research and the transformative potentials of research methods not only in accessing the world as an object of study but as ways of acting and being in the world It will be of interest to students and scholars of international relations critical theory research methods and politics in general [World Politics Simulations in a Global Information Age](#) Hemda Ben-Yehuda, Luba Levin-Banchik, Chanan Naveh, 2015-10-13 An invaluable guide to creating successful simulations for teaching and scholarly research *WTO/GATS and the Global Politics of Higher Education* Antoni Verger, 2010-04-15 The General Agreement on Trade in Services GATS has furthered international pressure towards the liberalization of education all over the world Antoni

Verger explores the constitution of global liberalization entailed by the GATS as well as the opposition to this process

Commonsense and the Theory of International Politics John C. Garnett, 1984-01-01 International politics is not a cumulative subject in which the latest book makes all the others obsolete The assumption underlying these pages is that our understanding of international politics is more likely to be improved by reflecting upon and reworking what we already know about the subject than by topping up our knowledge with either more detailed research or more contemporary analysis Each of the chapters deals with a different aspect of international theory A discerning reader may become aware of certain unifying threads running through and linking all of the chapters They have all been written out of a conviction that explanation and not prescription is the only proper role of the political scientist and they all reflect my skepticism about the scientific nature of international politics John C Garnett In a refreshing and clear analysis Dr Garnett looks at the nature of international theory and the problems associated with its development Drawing from many disciplines he examines fundamental questions in a new way giving a measure of commonsense to a subject which has become complicated and esoteric His use of analogies and quotations bring his subject alive in a study that will be of interest to those involved in both the social sciences and politics *Teaching Political Science: A Practical Guide for Instructors* Amanda M.

Rosen, 2024-08-01 This book applies the existing literature in the scholarship of teaching and learning to political science advising discipline specific tips approaches and strategies to put immediately into practice Keeping in mind the pace of an academic career it also challenges the widely held misconception that being a good teacher requires a huge time investment This book is meant for three core audiences graduate students taking a course on teaching political science or about to embark on their first teaching experience newly minted PhDs facing their first academic post and trying to figure out how to balance all of their new responsibilities and veteran instructors looking to prepare a new course or revise an existing one

Teaching Political Science to Undergraduates Laure Paquette, 2016-01-15 By 2020 half of the world's population and most university students will have a supercomputer in their pockets This revolution will affect the way students respond to higher education The university classroom must henceforth engage students and the classic lecture format alone might not be enough to do so This book answers the question how university students can learn in the classroom what they cannot learn in any other way The answer is inspired by options that are not available to political scientists in the way that they are in the laboratories for the sciences in the performances for the live arts and in the studios for visual arts as well as ideas that are already present but not widespread in the discipline problem solving and case studies as in the professional schools and simulation exercises in many other disciplines This book proposes therefore an active pedagogy for political science at a time when active pedagogy is more important than ever Prof Laure Paquette PhD has been a visiting researcher or professor in 23 countries She has advised several foreign governments as well as her own Canada and has published extensively in four languages This is her sixteenth book **Education for Citizenship** Joseph Cammarano, Grant Reeher, 1997-08-29 This book

addresses the challenge of education for citizenship at a specific concrete level It offers examples of efforts to create among our students a new set of what Tocqueville called mores or culturally defining habits of the heart which will enhance citizenship foster a sense of connectedness to a community stretching beyond the university and ultimately support the practices basic values and institutions necessary for the democratic process

Security, Technology and Global Politics

Mark Lacy, 2014-02-05 This book analyses some of the key problems explored in Paul Virilio's theorising on war and security Paul Virilio has developed a provocative series of writings on how modern societies have shaped the acceleration of military security technologies and how technologies of security and acceleration have transformed society economy and politics His examination of the connections between geopolitics war speed technology and control are viewed as some of the most challenging and disturbing interventions on the politics of security in the twenty first century interventions that help us understand a world that confronts problems that increasingly emerge from the desire to make life safer faster networked and more efficient Security Technology and Global Politics examines some of the key concepts and concerns in Virilio's writings on security society and technology endo colonization fear and the war on terror cities and panic cinema and war ecological security and integral accidents universities and ideas of progress Critics often point to an apocalyptic or fatalistic element to Virilio's writings on global politics but this book challenges this apocalyptic reading of Virilio's work suggesting that while he doesn't provide us with easy solutions to the problems we face the political force in Virilio's work comes from the questions he leaves us with about speed security and global politics in times of crisis terror and fear This book will be of interest to students of critical security studies political theory sociology political geography cultural studies and IR in general

Heroism and Global Politics Veronica Kitchen, Jennifer G. Mathers, 2018-10-12 The rhetoric of heroism pervades politics Political leaders invoke their own heroic credentials soldiers are celebrated at sporting events ordinary citizens become state symbols or symbols of opposition and high profile celebrities embody a glamorized humanitarian heroism Using analytical tools drawn from international relations gender studies war studies history and comparative politics this book examines the cultural and political phenomenon of heroism and its relationship to the process of creating sustaining and challenging political communities Arguing that heroism is socially constructed and relational the contributors demonstrate that heroes and heroic narratives always serve particular interests in the ways that they create and uphold certain images of states and other political communities Studying the heroes that have been sanctioned by a community tells us important things about that community including how it sees itself its values and its pressing needs at a particular moment Conversely understanding those who are presented in opposition to heroes victims demonized opponents or who become the heroes of resistance movements can also tell us a great deal about the politics of a state or a regime Heroes are at once the institutionalization of political power and yet amorphous one can go from being a hero to a villain in short order This book will appeal to scholars and students working on topics related to international relations gender security and war studies

comparative politics state building and political communities *Political Culture and the Making of Modern Nation-States* Edward Weisband, Courtney I P Thomas, 2015-11-17 This book focuses on transformations of political culture from times past to future present It defines the meaning of political culture and explores the cultural values and institutions of kinship communities and dynastic intermediaries including chiefdoms and early states It systematically examines the rise and gradual universalization of modern sovereign nation states Contemporary debates concerning nationality nationalism citizenship and hyphenated identities are engaged The authors recount the making of political culture in the American nation state and look at the processes of internal colonialism in the American experience examining how major ethnic sectarian racial and other distinctions arose and congealed into social and cultural categories The book concludes with a study of the Holocaust genocide crimes against humanity and the political cultures of violation in post colonial Rwanda and in racialized ethno political conflicts in various parts of the world Struggles over legitimacy in nation building and state building are at the heart of this new take on the important role of political culture **Fifty Key Thinkers in International Relations** Martin Griffiths, 2013-03-07 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company *The Oxford Handbook of International Studies Pedagogy* Heather A. Smith, Mark A. Boyer, David J. Hornsby, 2024 This volume on international studies pedagogy helps us think purposefully about the worlds we teach to our students and it shows us why engaging in reflective practice about how and what we teach matters The Handbook also provides strategies to engage students in a variety of ways to reflect on and engage with the complexities of the world in which we live Harry Potter and International Relations Daniel H. Nexon, Iver B. Neumann, 2006-05-25 Drawing on a range of historical and sociological sources this work shows how aspects of Harry s world contain aspects of our own It also includes chapters on the political economy of the franchise and on the problems of studying popular culture **The Future of International Relations** Iver B. Neumann, Ole Wæver, 2005-06-29 This book presents the state of the art of international relations theory through an analysis of the work of twelve key contemporary thinkers John Vincent Kenneth Waltz Robert O Keohane Robert Gilpin Bertrand Badie John Ruggie Hayward Alker Nicholas G Onuf Alexander Wendt Jean Bethke Elshtain R B J Walker and James Der Derian The authors aim to break with the usual procedure in the field which juxtaposes aspects of the work of contemporary theorists with others presenting them as part of a disembodied school of thought or paradigm A more individual focus can demonstrate instead the well rounded character of some of the leading oeuvres and can thus offer a more representative view of the discipline This book is designed to cover the work of theorists whom students of international relations will read and sometimes struggle with The essays can be read either as introductions to the work of these theorists or as companions to it Each chapter attempts to place the thinker in the landscape of the discipline to identify how they go about studying International Relations and to discuss what others can learn from them *Politics in Cinema* Aneek Chaudhuri, 2020-05-03 For mainstream Political Science popular culture is still no longer considered worthy of serious

investigation Similarly the concept of the use of films as a pedagogical device has remained on the margins Nevertheless movies may be a treasured way of teaching college college students about politics and international politics especially This paper identifies four wonderful ways of using movies as a teaching tool the first approach uses movie to portray historical events along with the Cold War and the second makes use of movie to debate unique problems in worldwide politics which includes terrorism or genocide Critical Legal Education as a Subversive Activity Helen Gibbon,Ben Golder,Lucas Lixinski,Marina Nehme,Prue Vines,2015-10-16 In an age when everyone aspires to teach critical thinking skills in the classroom what does it mean to be a subversive law teacher Who or what might a subversive law teacher seek to subvert the authority of the law the university their own authority as teachers perhaps Are law students ripe for subversion agents of or impediments to subversion Do they learn to ask critical questions Responding to the provocation in the classic book Teaching as a Subversive Activity by Postman and Weingartner the idea that teaching could or even should be subversive still holds true today and its premise is particularly relevant in the context of legal education We therefore draw on this classic book to discuss in the present volume the consideration of research into legal education as lifetime learning as creating meaning as transformative and as developing world changing thinking within the legal context The volume offers research into classroom experiences and theoretical and historical interrogations of what it means to teach law subversively Primarily aimed at legal educators and doctoral students in law planning careers as academics its insights speak directly to tensions in higher education more broadly **Projects in Higher Education** National Science Foundation (U.S.),1976
