

# **Teachings from the American Earth** **—Indian Religion and Philosophy—** Edited by Dennis Tedlock and Barbara Tedlock

"The Tedlocks' anthology is a very much needed book. It not only provides the proper orientation to its material, but its humanistic approach is more perceptive and illuminating than technical scholarship. . . . An extremely useful and intelligently edited book."

—Theodore H. Gaster, Columbia University

One thing unites all the authors represented in this book: they are either Indians who have tried to make themselves heard, or whites who have tried to hear Indians and were changed by this experience. In fact, the book presents the first conspectus of the variety of American Indian religious experiences and philosophical beliefs, largely from the Native American point of view.

Part One, *Seeing and Curing*, emphasizes the practical and includes Isaac Tens' "Career of a Medicine Man," Knud Rasmussen's brilliant account of "A Shaman's Journey to the Spirit," and classic essays by Ruth Underhill and James Mooney. Part Two, *Thinking About the World*, concentrates on the theoretical and contains Benjamin Lee Whorf's famous "American Indian Model of the Universe," Paul Radin's "Monotheism Among American Indians," Alfonso Ortiz's remarkable "Tewa World View," and authoritative chapters on Indian metaphysics, among other things. In addition to a searching introductory essay on the Indian's stance toward reality, the editors have contributed special chapters on "The Clown's Way" and "An American Indian View of Death."

Dennis Tedlock is McNulty Professor of English and Research Professor of Anthropology and Barbara Tedlock is Professor of Anthropology at the State University of New York at Buffalo.

Morrison, 2012-02-01 Arguing that Native Americans religious life and history have been misinterpreted author Kenneth M Morrison reconstructs the Eastern Algonkians world views and demonstrates the indigenous modes of rationality that shaped not only their encounter with the French but also their self directed process of religious change In reassessing controversial anthropological historical and ethnohistorical scholarship

Morrison develops interpretive strategies that are more responsive to the religious world views of the Eastern Algonkian peoples. He concludes that the Eastern Algonkians did not convert to Catholicism but rather applied traditional knowledge and values to achieve a pragmatic and critical sense of Christianity and to preserve and extend kinship solidarity into the future. The result was a remarkable intersection of Eastern Algonkian and missionary cosmologies. *Reports of Cases Argued and Adjudged in the Supreme Court of the United States*. United States. **Native American and Chicano/a Literature of the American Southwest** Christina M. Hebebrand, 2004-08-02 This book studies Native American and Chicano writers of the American Southwest as a coherent cultural group with common features and distinct efforts to deal with and to resist the dominant Euro American culture.

**Astrology and Cosmology in the World's Religions** Nicholas Campion, 2023-11-21 An ambitious examination of cosmologies and astrologies from around the world. The diversity of cultures Campion includes is impressive. Jacqueline Fekete's *History of Astronomy*. When you think of astrology you may think of the horoscope section in your local paper or of Nancy Reagan's consultations with an astrologer in the White House in the 1980s. Yet almost every religion uses some form of astrology, some way of thinking about the sun, moon, stars, and planets and how they hold significance for human lives on earth. *Astrology and Cosmology in the World's Religions* offers an accessible overview of the astrologies of the world's religions, placing them into context within theories of how the wider universe came into being and operates. Campion traces beliefs about the heavens among peoples ranging from ancient Egypt and China to Australia and Polynesia and India and the Islamic world. Addressing each religion in a separate chapter, Campion outlines how, by observing the celestial bodies, people have engaged with the divine, managed the future, and attempted to understand events here on earth. This fascinating text offers a unique way to delve into comparative religions and will also appeal to those intrigued by New Age topics. Unlike most students of astrology, Campion transcends the limitations of Western tradition to examine the nature and roles of astrological and cosmological concepts in cultures from all continents. His examples provide original insights into how cosmologies shape these cultures' artistic, intellectual, and religious activities. Stephen McCluskey, West Virginia University.

*Native Americans in Comic Books* Michael A. Sheyahshe, 2014-11-29 This work takes an in-depth look at the world of comic books through the eyes of a Native American reader and offers frank commentary on the medium's cultural representation of the Native American people. It addresses a range of portrayals from the bloodthirsty barbarians and noble savages of dime novels to formulaic secondary characters and sidekicks and occasionally protagonists sans paternal white hero, examining how and why Native Americans have been consistently marginalized and misrepresented in comics. Chapters cover early representations of Native Americans in popular culture and newspaper comic strips, the Fenimore Cooper legacy, the white Indian, the shaman, revisionist portrayals, and Native American comics from small publishers, among other topics.

*Dictionary of Modern American Philosophers* John R. Shook, 2005-01-01 The Dictionary of Modern American Philosophers

includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected. It includes those intellectuals involved in the development of psychology, pedagogy, sociology, anthropology, education, theology, political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century. Each entry contains a short biography of the writer, an exposition and analysis of his or her doctrines and ideas, a bibliography of writings and suggestions for further reading. While all the major post Civil War philosophers are represented, the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers. In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers. This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought.

**Louise Erdrich** Deborah L. Madsen, 2011-09-01 Leading scholars critically explore three leading novels by Louise Erdrich, one of the most important and popular Native American writers working today.

**Native Nations** Nancy Bonvillian, 2016-11-15 Combining historical background with discussion of contemporary Native nations and their living cultures, this comprehensive text introduces students to some of the many indigenous peoples in North America. The book is organized into parts corresponding to regional divisions within which similar though not identical cultural practices developed. Each part opens with an overview of the topography, climate and natural resources in the area and describes the range of cultural practices and beliefs grounded in the area. Subsequent chapters are devoted to specific tribal groups, their history and the conditions of contemporary Native communities. Nancy Bonvillian provides context for the regional and tribe specific chapters through a brief overview of Native American history beginning around 1500 and covering the early period of European exploration and colonization. She details both U.S. and Canadian policies affecting the lives, cultures and survival of more than five hundred Native nations on this continent. Finally, she offers up to date demographics and addresses significant social, economic and political issues concerning Native communities. The second edition features new material throughout, including a new two chapter section on the Native nations of the Plateau, expanded introductory material addressing topics such as climate change and recent Supreme Court decisions, up to date demographic and economic data and more.

Cosmology and Moral Community in the Lakota Sun Dance Fritz Detwiler, 2021-12-30 Drawing on Indigenous methodologies, this book uses a close analysis of James R. Walker's 1917 monograph on the Lakota Sun Dance to explore how the Sun Dance communal ritual complex, the most important Lakota ceremony, creates moral community, providing insights into the cosmology and worldview of Lakota tradition. The book uses Walker's primary source to conduct a reading of the Sun Dance in its nineteenth century context through the lenses of Lakota metaphysics, cosmology, ontology and ethics. The author argues that the Sun Dance constitutes a cosmic ethical drama in which persons of all types, human and nonhuman, come together in reciprocal actions and relationships. Drawing on contemporary animist theory and a perspectivist approach that uses Lakota worldview assumptions as the basis for analysis,

the book enables a richer understanding of the Sun Dance and its role in the Lakota moral world Offering a nuanced understanding that centers Lakota views of the sacred this book will be relevant to scholars of religion and animism and all those interested in Native American cultures and lifeways
