The Underground Railroad from Slavery to Freedom Wilbur Henry Siebert, 2022-05-29 In *The Underground Railroad from Slavery to Freedom* Wilbur Henry Siebert meticulously chronicles the clandestine network that aided enslaved African Americans seeking freedom in the 19th century. Written in a scholarly tone, Siebert employs rigorous historical methodologies and rich narratives to explore the socio-political context of the era. He delves into the contributions of key figures, the geography of escape routes, and the profound impact of the Underground Railroad on American society. By integrating primary source materials and personal testimonies, Siebert crafts a narrative that is both academically robust and deeply poignant, ensuring the complexity of this vital movement is fully appreciated within its historical landscape.

Wilbur Henry Siebert (1866-1961) was an eminent historian whose extensive research on the Underground Railroad laid a significant foundation for future scholarship. His position as a history professor at The Ohio State University allowed him unique access to archival materials, and his personal commitment to civil rights and social justice undoubtedly informed his examination of this critical chapter in American history. Through his work, Siebert sought not only to document the past but also to illuminate the ongoing struggles for freedom and equality. This book is highly recommended for anyone interested in American history, African American studies, or social justice.

Siebert's comprehensive and compelling narrative offers valuable insights into the resilience of the human spirit in the face of oppression. By immersing readers in the lives of both the brave escapees and their allies, *The Underground Railroad from Slavery to Freedom* serves as an essential resource for understanding the profound legacy of resistance against slavery.

Fathering the Nation Russ Castronovo, 2023-11-10 Russ Castronovo underscores the inherent contradictions between America's founding principles of freedom and the reality of slavery in a book that probes mid-nineteenth-century representations of the founding fathers. He finds that rather than being coherent and consensual, narratives of nationhood are inconsistent, ambivalent, and ironic. He examines competing expressions of national memory in a wide range of mid-nineteenth-century artifacts: slave autobiography, classic American fiction, monumental architecture, myths of the Revolution, proslavery writing, and landscape painting. Castronovo theorizes a new American cultural studies which takes into consideration what Toni Morrison calls the Africanist presence that permeates American literature. He presents a genealogy that recovers those members of the national family whose status challenges the body politic and its history: the forgotten orphans in Melville's *Moby-Dick* and Israel Potter; the rebellious slaves in the work of Frederick Douglass and William Wells Brown; the citizens afflicted with amnesia in Lincoln's speeches; and the dispossessed sons in slave narratives. All provide dissenting voices that provoke insurrectionary plots and counter-memories. Viewed here as a miscegenation of stories, the narrative of America resists being told of an intelligible story of uncontested descent. National identity rests not on rituals of consensus but on repressed legacies of parricide and rebellion.
