Leading the Team Organization Dean Tjosvold, Mary M. Tjosvold, 1991-01-01 Managers recognize that a good team organization can be the most valuable of their firm's competitive advantages Lucrative markets draw competitors efficient technology is copied profitable products lose their appeal but a well run team organization continues to introduce new technologies find new markets create new products and improve service to clients However as Dean and Mary Tjosvold reveal there is a significant shortage both of strong leaders and of strong teams in corporate America today Most employees are reluctant to step forward and take charge because they doubt they have the ability to turn an organization around The Tjosvolds present here a model for creating leading and participating in teams that illustrates that only by working in teams throughout the organizational structure can a company reach its potential They further demonstrate how to involve supervisors middle managers and unions in productive teams and how organizations can use teams effectively to generate innovative programs or to solve specific problems A case study runs through the book that illustrates precisely how the team building model can be applied Leading the Team Organization is a valuable guide that will enable leaders and followers to empower each other to achieve common goals and create more profitable and successful organizations

Team Performance in Health Care Gloria D. Heinemann, Antonette M. Zeiss, 2012-12-06 The idea of teamwork in health care emerged at several times during the th 20 century as the result of shifts in the nature and demands of health care and societal needs Examples include medical and surgical teams serving the military in World War II primary care teams staffing Community Health Centers created by President Johnson s War On Poverty and geriatric care teams established to serve the

rapidly growing number of aging citizens Collaborative teamwork surfaced as a rational solution to health care needs but political and economic consensus to support widespread implementation was lacking The increasing complexity of providing health care seemed best served by the skills and efforts of interdisciplinary teams but such care was viewed as expensive so evaluation of its effectiveness became essential There were major problems in conducting such evaluation however First no clear theory guided the concept and practice of teamwork Early attempts to employ theoretical constructs explaining the behavioral and organizational phenomena of teamwork borrowed from theories of group dynamics communication organizational development and general systems Further few reliable validated instruments existed to evaluate team process function or effectiveness The best early efforts at research and evaluation came from academic centers funded by the Office of Interdisciplinary Programs of the Bureau of Health Professions 1975-78 and from the Veterans Affairs Interprofessional Team Training Development Program

Generational Diversity at Work Emma Parry, 2014-05-09 Over the past decade much attention has been paid to the apparent differences in consumption preferences or workplace attitudes and behaviours across generations Within Western economies such as the USA UK and Australia it is commonly assumed that there are now four generations in the workplace namely Veterans born 1925 1942 Baby Boomers 1943 1960 Generation X 1961 1981 and Generation Y 1982 2000 The concept of generational differences at work is one that has recently been adopted by practitioners as a basis on which to design human resource management and career management practices However there has been some concern in academic circles about the validity of the notion of generations and the evidence base that supports it There is therefore a need for new perspectives and methodological approaches to investigating generational differences at work in order to establish the validity and value of generations as an axis of diversity *Generational Diversity at Work* New Research Perspectives will address this need by presenting and discussing research into generational diversity that adopts a range of new theoretical perspectives or methodological approaches This book is designed as a first step in addressing the need to critically examine the theoretical and empirical basis for generational differences and to provide some new empirical data in this area
