Innovate to Dominate Tai Ming Cheung, 2022-08-15 In Innovate to Dominate Tai Ming Cheung offers insight into why how and whether China will overtake the United States to become the world's preeminent technological and security power This examination of the means and ends of China's quest for techno security supremacy is required reading for anyone looking for clues as to the long term direction of the global order The techno security domain Cheung argues is where national security innovation and economic development converge and it has become the center of power and prosperity in the twenty first century China's paramount leader Xi Jinping recognizes that effectively harnessing the complex interactions among security innovation and development is essential in enabling China to compete for global dominance Cheung offers a richly detailed account of how China is building a potent techno security state In Innovate to Dominate he takes readers from the strategic vision guiding this transformation to the

nuts and bolts of policy implementation The state led top down mobilizational model that China is pursuing has been a winning formula so far but the sternest test is ahead as China begins to compete head to head with the United States and aims to surpass its archrival by mid century if not sooner Innovate to Dominate is a timely and analytically rigorous examination of the key strategies guiding China s transformation of its capabilities in the national technological military and security spheres and how this is taking place Cheung authoritatively addresses the burning questions being asked in capitals around the world Can China become the dominant global techno security power And if so when Narrative and Technology Ethics Wessel Reijers,Mark Coeckelbergh,2020-12-07 This book proposes that technologies similar to texts novels and movies tell stories and thereby configure our lifeworld in the Digital Age The impact of technologies on our lived experience is ever increasing innovations in robotics challenge the nature of work emerging biotechnologies impact our sense of self and blockchain based smart contracts profoundly transform interpersonal relations In their exploration of the significance of these technologies Reijers and Coeckelbergh build on the philosophical hermeneutics of Paul Ricoeur to construct a new narrative approach to the philosophy and ethics of technology The authors take the reader on a journey from a discussion of the philosophy of praxis via a hermeneutic notion of technical practice that draws on MacIntyre Heidegger and Ricoeur through the virtue ethics of Vallor and Ricoeur s ethical aim to the eventual construction of a practice method which can guide ethics in research and innovation In its creation of a compelling hermeneutic ethics of technology the book offers a concrete framework for practitioners to incorporate ethics in everyday technical practice **Nothing Is Beyond Our Reach** Kristie Macrakis,2023 Ever since the earliest days of the Cold War American intelligence agencies have launched spies in the sky implanted spies in the ether burrowed spies underground sunk spies in the ocean and even tried chemical means to pry open the human mind The United States increasingly has covered the globe with planes satellites drones electronics tunnels and submarines all in the service of intelligence Hard targets meant that American intelligence could not entirely rely on human spies but it was more than that Nothing is Beyond Our Reach reveals how America s love affair with technology has led to its dependence on machines in intelligence collection and how this has almost inadvertently created a global surveillance empire In a lively and engaging narrative author Kristie Macrakis tells this story of how intelligence has changed from American technophilia and what its implications will be **Administrative Ethics and Executive Decisions** Chad B. Newswander,2017-10-02 As first responders to public problems administrators must survey situations identify solutions and occasionally make executive decisions that are binding upon the government as a whole The ability for administrators to assert claims that orient the government in a particular direction is not only powerful but it can also be problematic and even dangerous For administrators the tension between moving in a spirited way and remaining sensible is a problem of how to exercise one s discretion especially in the U S context which demands that both be considered and actualized In dealing with these competing expectations Chad B Newswander analyzes how administrators can incorporate

executive legislative and judicial tendencies to help them handle the problem of discretion Expanding the thinking of the constitutional school of public administration thought Administrative Ethics and Executive Decisions is a theoretically grounded and empirically rich study of how administrators incorporate a constitutional ethos to handle the problem of discretion

The War Lawyers Craig Jones, 2020 Over the last 20 years the world's most advanced militaries have invited a small number of military legal professionals into the heart of their targeting operations spaces which had previously been exclusively for generals and commanders These professionals trained and hired to give legal advice on an array of military operations have become known as war lawyers The War Lawyers examines the laws of war as applied by military lawyers to aerial targeting operations carried out by the US military in Iraq and Afghanistan and the Israel military in Gaza Drawing on interviews with military lawyers and others this book explains why some lawyers became integrated in the chain of command whereby military targets are identified and attacked whether by manned aircraft drones and or ground forces and with what results This book shows just how important law and military lawyers have become in the conduct of contemporary warfare and how it is understood Jones argues that circulations of law and policy between the US and Israel have bolstered targeting practices considered legally questionable contending that the involvement of war lawyers in targeting operations enables legitimises and sometimes even extends military violence

Playing the Middle Ages Robert Houghton, 2023-08-24 The Middle Ages have provided rich source material for physical and digital games from Dungeons and Dragons to Assassin's Creed This volume addresses the many ways in which different formats and genre of games represent the period It considers the restrictions placed on these representations by the mechanical and gameplay requirements of the medium and by audience expectations of these products and the period highlighting innovative attempts to overcome these limitations through game design and play Playing the Middle Ages considers a number of important and timely issues within the field including one the connection between medieval games and political nationalistic rhetoric two trends in the presentation of religion warfare and other aspects of medieval society and their connection to modern culture three the problematic representations of race and four the place of gender and sexuality within these games and the broader gaming community The book draws on the experience of a wide ranging and international group of academics across disciplines and from games designers Through this combination of expertise it provides a unique perspective on the representation of the Middle Ages in modern games and drives key discussions in the fields of history and game design

Life in the Age of Drone Warfare Lisa Parks, Caren Kaplan, 2017-10-19 This volume's contributors offer a new critical language through which to explore and assess the historical juridical geopolitical and cultural dimensions of drone technology and warfare They show how drones generate particular ways of visualizing the spaces and targets of war while acting as tools to exercise state power Essays include discussions of the legal justifications of extrajudicial killings and how US drone strikes in the Horn of Africa impact life on the ground as well as a personal narrative of a former drone operator The contributors also explore drone warfare in

relation to sovereignty governance and social difference provide accounts of the relationships between drone technologies and modes of perception and mediation and theorize drones relation to biopolitics robotics automation and art Interdisciplinary and timely Life in the Age of Drone Warfare extends the critical study of drones while expanding the public discussion of one of our era s most ubiquitous instruments of war Contributors Peter Asaro Brandon Wayne Bryant Katherine Chandler Jordan Crandall Ricardo Dominguez Derek Gregory Inderpal Grewal Lisa Hajjar Caren Kaplan Andrea Miller Anjali Nath Jeremy Packer Lisa Parks Joshua Reeves Thomas Stubblefield Madiha Tahir **Contesting Islam, Constructing Race and Sexuality** Sunera Thobani, 2020-12-10 The current political standoffs of the War on Terror illustrate that the interaction within and between the so called Western and Middle Eastern civilizations is constantly in flux A recurring theme however is how Islam and Muslims signify the Enemy in the Western socio cultural imagination and have become the Other against which the West identifies itself In a unique and insightful blend of critical race feminist and post colonial theory Sunera Thobani examines how Islam is foundational to the formation of Western identity at critical points in its history including the Crusades the Reconquista and the colonial period More specifically she explores how masculinity and femininity are formed at such pivotal junctures and what role feminism has played in the wars against radical Islam Exposing these symbiotic relationships Thobani explores how the return of religion is reworking the racial gender and sexual politics by which Western society defines itself and more specifically defines itself against Islam Contesting Islam Constructing Race and Sexuality unpacks conventional as well as unconventional orthodoxies to open up new spaces in how we think about sexual and racial identity in the West and the crucial role that Islam has had and continues to have in its development

Atrocity Fabrication and Its Consequences A.B. Abrams, 2023-03-15 Atrocity fabrication the invention and reporting of atrocities committed by an adversary without knowledge that they ever occurred has a centuries long history at the heart of propaganda and power politics as an effective means of moving public and international opinion Its use can provide pretext for a range of hostile measures against its targets transforming in the public eye wars of unprovoked aggression into wars of liberation of the oppressed or turning blockades to starve enemy civilians into humane efforts to pressure abusive governments under the moralistic label of sanctions As it plays a large and growing role in global conflict in the 21st century understanding atrocity fabrication and the consistent means by and ends to which it has been used has become crucial to comprehending geopolitical events in the present day This book elucidates the seldom explored but central role played by atrocity fabrication in eleven major conflicts from the 1950s to the present day from Korea Vietnam and Cuba during the Cold War to Iraq Libya and the emerging Sino U S cold war more recently It highlights the many variations of atrocity fabrication the strong consistencies in how atrocity fabrication is used and the consequences it has for the populations of the targeted countries The book demonstrates the roles played by media and both government and non governmental organizations in misleading the public as to the actuality of these highly publicized events The emerging trend towards this

mode of action and the deep implications this has for world order make an understanding of its history particularly critical

On Posthuman War Mike Hill, 2022-08-16 Tracing war's expansion beyond the battlefield to the concept of the human being itself As military and other forms of political violence become the planetary norm *On Posthuman War* traces the expansion of war beyond traditional theaters of battle Drawing on counterinsurgency field manuals tactical manifestos data driven military theory and asymmetrical war archives Mike Hill delineates new Areas of Operation within a concept of the human being as not only a social and biological entity but also a technical one Delving into three human focused disciplines newly turned against humanity *On Posthuman War* reveals how demography anthropology and neuroscience have intertwined since 9 11 amid the Revolution in Military Affairs Beginning with the author's personal experience training with U S Marine recruits at Parris Island Hill gleans insights from realist philosophy the new materialism and computational theory to show how the human being per se has been reconstituted from neutral citizen to unwitting combatant As evident in the call for bullets beans and data whatever can be parted out counted and reassembled can become war materiel Hill shows how visible and invisible wars within identity community and cognition shift public sphere activities like racial identification group organization and even thought itself in the direction of war This shift has weaponized social activities against the very notion of society *On Posthuman War* delivers insights on the latest war technologies strategies and tactics while engaging in questions poised to overturn the foundations of modern political thought **The Salvadoran Crucible** Brian

D'Haeseleer, 2017-12-15 In 1979 with El Salvador growing ever more unstable and ripe for revolution the United States undertook a counterinsurgency intervention that over the following decade would become Washington's largest nation building effort since Vietnam In 2003 policymakers looked to this successful undertaking as a model for US intervention in Iraq In fact Brian D Haeseleer argues in *The Salvadoran Crucible* the US counterinsurgency in El Salvador produced no more than a stalemate and in the process inflicted tremendous suffering on Salvadorans for a limited amount of foreign policy gains D Haeseleer's book is a deeply informed dispassionate account of how the Salvadoran venture took shape what it actually accomplished and what lessons it holds A historical analysis of the origins of US counterinsurgency policy provides context for understanding how precedents informed US intervention in El Salvador What follows is a detailed in depth view of how the counterinsurgency unfolded the nature logic and effectiveness of the policies initiatives and operations promoted by American strategists D Haeseleer's account disputes the success narrative by showing that El Salvador's achievements mainly the spread of democracy occurred as a result not of the American intervention but of the insurgents war against the state Most significantly *The Salvadoran Crucible* contends that the reforms enacted during the war failed to address the underlying causes of the conflict which today continue to reverberate in El Salvador The book thus suggests a reassessment of the history of American counterinsurgency and a course correction for the future *Risks and Regulation of New Technologies* Tsuyoshi Matsuda, Jonathan Wolff, Takashi Yanagawa, 2020-12-01 How should we proceed with advanced

research of humanities and social sciences in collaboration What are the pressing issues of this new trend in a cataclysmic time for civilization This book originated with a Japan Society for the Promotion of Science JSPS Topic Setting Program addresses these challenging questions in four parts for innovating twenty first century humanities and social sciences It broadens the horizon for reviewing multi disciplinary landscapes of risks and regulation of new technologies by focusing on paradigmatic cases from the fields of life and environment Here genome editing for reproductive treatment and renewable energy under the constraint of climate change in Japanese and global contexts are involved The volume comprises a combination of topics and aspects such as public policy and philosophy of science medicine and law climate ethics and the economics of electricity This edited collection will thus motivate forward thinking readers across the diverse spectrum of social sciences and humanities to survey themes of their own interests in multi disciplinary studies In so doing they can explore the evolving frontiers of those disciplines and the depths of individual contributions by experts in philosophy ethics law economics and science technology and society STS including bioscience

Kraidy, 2016-08-24 In the field of American studies attention is shifting to the long history of U S engagement with the Middle East especially in the aftermath of war in Iraq and in the context of recent Arab uprisings in protest against economic inequality social discrimination and political repression Here Alex Lubin and Marwan M Kraidy curate a new collection of essays that focuses on the cultural politics of America s entanglement with the Middle East and North Africa making a crucial intervention in the growing subfield of transnational American studies Featuring a diverse list of contributors from the United States the Arab world and beyond American Studies Encounters the Middle East analyzes Arab American relations by looking at the War on Terror pop culture and the influence of the American hegemony in a time of revolution Contributors include Christina Moreno Almeida Ashley Dawson Brian T Edwards Waleed Hazbun Craig Jones Osamah Khalil Mounira Soliman Helga Tawil Souri Judith E Tucker Adam John Waterman and Rayya El Zein

The Rise of Unmanned Warfare Jacquelyn Schneider, MacDonald, 2023-12-15 What explains the current US arsenal of unmanned systems Why for example is the contemporary arsenal dominated by aerial unmanned systems versus the munitions that dominated earlier developments This book challenges traditional explanations for the proliferation of unmanned systems which focus on capacity or structure Instead this book argues that beliefs and identities shape the structures and capacities we choose when we are investing in weapon systems In particular it traces beliefs about technological determinism and military revolutions force protection and casualty aversion and service identities to explain why the US has invested so heavily in remote controlled unmanned aerial platforms over the last three decades In doing so the book illustrates how ideas become influence and ultimately manifest in budget lines detailing the policy entrepreneurs critical junctures and path dependencies that shape the lifecycle of beliefs about unmanned weapon systems The book begins by providing a historical overview of US unmanned systems investments taking an expansive view of unmanned technologies from land mines to missiles and drones

from the revolutionary war to contemporary investments It then leans on theories of norms ideas and influence to detail the role of the Office of Net Assessment Vietnam 9 11 and armed service identity in building the US current unmanned arsenal Finally it concludes with what this case of unmanned technologies reveals about US support to Ukraine as well as contemporary weapons debates about cyber information technology space and hypersonic missiles *Popular Educator a Complete Encyclopaedia of Elementary, Advanced, and Technical Education* ,1858 Intersectional Tech Kishonna L. Gray,2020-09-02 In Intersectional Tech Black Users in Digital Gaming Kishonna L. Gray interrogates blackness in gaming at the intersections of race gender sexuality and dis ability Situating her argument within the context of the concurrent seemingly unrelated events of Gamergate and the Black Lives Matter movement Gray highlights the inescapable chains that bind marginalized populations to stereotypical frames and limited narratives in video games Intersectional Tech explores the ways that the multiple identities of black gamers some obvious within the context of games some more easily concealed affect their experiences of gaming The normalization of whiteness and masculinity in digital culture inevitably leads to isolation exclusion and punishment of marginalized people Yet Gray argues we must also examine the individual struggles of prejudice discrimination and microaggressions within larger institutional practices that sustain the oppression These new racisms and a complementary colorblind ideology are a kind of digital Jim Crow a new mode of the same strategies of oppression that have targeted black communities throughout American history Drawing on extensive interviews that engage critically with identity development and justice issues in gaming Gray explores the capacity for gaming culture to foster critical consciousness aid in participatory democracy and effect social change Intersectional Tech is rooted in concrete situations of marginalized members within gaming culture It reveals that despite the truths articulated by those who expose the sexism racism misogyny and homophobia that are commonplace within gaming communities hegemonic narratives continue to be privileged This text in contrast centers the perspectives that are often ignored and provides a critical corrective to notions of gaming as a predominantly white and male space
