

Factory visits

Buckley Systems' main manufacturing hub and research centre is based in Auckland, New Zealand. Being a long way from many of our customers, we always appreciate people who make the effort to come and visit us to discuss requirements, check on their project being manufactured or discover why so many businesses choose us to manufacture their equipment.

To maximise the benefit of your visit we will do our best to arrange for you to meet our key people including physicists, design engineers and compliance/testing/quality staff.

We can show you around our coil winding, machining, assembly and testing workshops plus you will be able to see our Ion Source Test Facility (ISTF) and the scientific work that has come from it.

As we are a busy site and often undertake confidential work, we do need to schedule visits and reserve the right to qualify visitors before extending a formal invitation.

Please contact us if you would like to visit and we will do our best to make sure you maximise the benefit of your time in our corner of the world.

7th International Symposium on Negative Ions, Beams and Sources (NIBS'20)

AUCKLAND, NEW ZEALAND

University of Auckland to host 2020 NIBS conference

At the 2018 International Symposium on Negative Ions, Beams and Sources (NIBS) conference held in Novosibirsk, Russia, the University of Auckland won the hosting rights for the 7th NIBS conference to be held in New Zealand in September 2020. This will be the first time a major accelerator physics conference has been held in New Zealand and reflects the historical ground-breaking work done through the University's collaboration with the Ion Source Test Facility (ISTF) research group at Buckley Systems' manufacturing headquarters.

Buckley Systems C&O, Dr Morgan Dehnell, was one of the main drivers behind the bid and is very excited about the event. "Hosting NIBS'20 brings the world experts in negative ion beams to New Zealand, which facilitates exposure to this field for professors and students in the Australasia region and provides a huge boost to our own negative ion beam collaboration with the University of Auckland, University of British Columbia, Buckley Systems Ltd and D-Pace Inc."

A key highlight of the conference will be a tour of Buckley Systems' impressive manufacturing facility with a chance to meet with the physics, design and operations teams, see the ISTF in action and talk to the researchers working on it.

Buckley Systems' founder Bill Buckley has been involved in manufacturing particle

physics equipment since 1968 and built his business on manufacturing specialist, high precision electromagnets, vacuum chambers and support equipment for research institutes and industry. Realising that if you are the very best in your field, people will seek you out no matter where in the world you are, Bill takes a hands-on role in his business, continually developing custom-made machinery and manufacturing techniques in addition to increasing plant capacity in innovative ways, ably supported by a highly experienced team of specialists.

Bill comments, "Many people don't realise how big Buckley Systems is in terms of manufacturing capability until they see it for themselves. The volume of steel, aluminium and copper that is processed every month is enormous. We even have a regional steel mill make our own, 'Buckley's Recipe' low-carbon, low coercivity, steel. To maintain the accuracy and quality demanded by our clients, we have made a conscious decision to be able to manufacture all our key components in-house. This allows us to take on multiple large projects knowing we won't be let down on supply or quality."

Buckley Systems is proud to be associated with the NIBS'20 conference and we look forward to opening our doors to the visiting delegates.

This book delves into Technical Bulletin. Technical Bulletin is a vital topic that must be grasped by everyone, from students and scholars to the general public. This book will furnish comprehensive and in-depth insights into Technical Bulletin, encompassing both the fundamentals and more intricate discussions.

1. This book is structured into several chapters, namely:

- Chapter 1: Introduction to Technical Bulletin
- Chapter 2: Essential Elements of Technical Bulletin
- Chapter 3: Technical Bulletin in Everyday Life
- Chapter 4: Technical Bulletin in Specific Contexts
- Chapter 5: Conclusion

2. In chapter 1, the author will provide an overview of Technical Bulletin. The first chapter will explore what Technical Bulletin is, why Technical Bulletin is vital, and how to effectively learn about Technical Bulletin.
3. In chapter 2, this book will delve into the foundational concepts of Technical Bulletin. The second chapter will elucidate the essential principles that must be understood to grasp Technical Bulletin in its entirety.
4. In chapter 3, this book will examine the practical applications of Technical Bulletin in daily life. The third chapter will showcase real-world examples of how Technical Bulletin can be effectively utilized in everyday scenarios.
5. In chapter 4, this book will scrutinize the relevance of Technical Bulletin in specific contexts. The fourth chapter will explore how Technical Bulletin is applied in specialized fields, such as education, business, and technology.
6. In chapter 5, this book will draw a conclusion about Technical Bulletin. The final chapter will summarize the key points that have been discussed throughout the book.

This book is crafted in an easy-to-understand language and is complemented by engaging illustrations. It is highly recommended for anyone seeking to gain a comprehensive understanding of Technical Bulletin.
