Pringle, Sarah O'Keefe, 2003 *The Product is Docs* Christopher Gales, Splunk, Inc, 2020 This book provides a broad perspective about the essential aspects of creating technical documentation in today's product development world It is a book of opinions and guidance collected as short essays You can read selectively about subjects that interest you or you can read the entire collection in any order you like Information development is a multidimensional discipline and it is easy to theorize We have written this book from our direct experience using the concrete insights and practices we apply to our work every day If you work as an information developer a manager in a documentation team or in another part of product development that collaborates with a doc team there is information in this book for you Perhaps you are a technical writer in a small high growth company that is figuring out its processes Perhaps you are an information development manager in a large enterprise company with an expanding product line and an ever more complex matrix of cross functional dependencies You might work at a medium sized company where your management is asking you to do more with fewer people and you want some additional perspective that will help you find a leaner and more effective way to deliver what your business demands Or you might work outside the technical
