Trade Mark Infringement Zoi Krokida, 2022-06-16 This book critically evaluates the EU regulatory framework for the liability of host Internet Service Providers ISPs for copyright and trade mark infringements and provides a cluster of novel recommendations for its improvement The book recommends the imposition of a duty of care to host ISPs to curb the

dissemination of unauthorised works and counterfeit goods the ascription of a transparency obligation to host ISPs towards their users and the establishment of a supervisory authority for host ISPs Host ISPs have facilitated the dissemination of content amongst users and the purchase of goods online enabling copyright holders and brand owners to attract a greater audience for their works and goods However their services have attracted a high number of copyright and trade mark violations too Neither Article 14 of the e Commerce Directive nor Article 17 of the Copyright in the Digital Single Market Directive provide a solid response to the issue of host ISPs liability This book is a valuable resource for researchers in IT and IP law and offers a new perspective for resolving online IP disputes Network World ,1998-11-23 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce The Technical Side of Being an Internet Service Provider Ricardo Haragutchi,International Business Machines Corporation. Broadband Robert W. Crandall, James H. Alleman, 2004-05-13 There is widespread concern in the telecommunications industry that public policy may be impeding the continued development of the Internet into a high speed communications network In the absence of ubiquitous high speed broadband Internet connections for residential and small business customers the demand for IT equipment and new Internet service applications may stagnate Broadband policy is controversial in large part because of the differences in the regulatory regimes faced by different types of carriers Cable television companies face neither retail price regulation of their cable modem services nor any requirements to make their facilities available to competitors Local telephone companies on the other hand face both retail price regulation for their DSL service and a requirement imposed by the 1996 Telecommunications Act that they unbundle their network facilities and lease them to rivals Finally new entrants are largely unregulated but many rely on facilities leased from the incumbent telephone companies at regulated rates to connect to their customers This asymmetric regulation is the focus of this volume in which telecommunications scholars address the public policy issues that have arisen over the deployment of new high speed telecommunications services Robert W Crandall is a senior fellow in the Economic Studies program at the Brookings Institution His previous books include with Martin Cave Telecommunications Liberalization on Two Sides of the Atlantic 2001 and with Leonard Waverman Who Pays for Universal Service Brookings 2000 James H Alleman is an associate professor in interdisciplinary telecommunications at the College of Engineering and Applied Science University of Colorado on leave at Columbia University
