Race and Utopian Desire in American Literature and Society Patricia Ventura, Edward K. Chan, 2019-10-12 Bringing together a variety of scholarly voices this book argues for the necessity of understanding the important role literature plays in crystallizing the ideologies of the oppressed while exploring the necessarily racialized character of utopian thought in American culture and society Utopia in everyday usage designates an idealized fantasy place but within the interdisciplinary field of utopian studies the term often describes the worldviews of non dominant groups when they challenge the ruling order In a time when white supremacy is reasserting itself in the US and around the world there is a growing need to understand the vital relationship between race and utopia as a resource for resistance Utopian literature opens up that relationship by envisioning and negotiating the prospect of a better future while acknowledging the brutal past The collection fills a critical gap in both literary studies which has largely ignored the issue of race and utopia and utopian studies which has said too little about race

The Routledge Research Companion to Electronic Music:

Reaching out with Technology Simon Emmerson, 2018-05-16 The theme of this Research Companion is connectivity and the global reach of electroacoustic music and sonic arts made with technology The possible scope of such a companion in the field of electronic music has changed radically over the last 30 years The definitions of the field itself are now broader there is no clear boundary between electronic music and sound art Also what was previously an apparently simple divide between art and popular practices is now not easy or helpful to make and there is a rich cluster of streams of practice with many histories including world music traditions This leads in turn to a steady undermining of a primarily Euro American enterprise in the second half of the twentieth century Telecommunications technology most importantly the development of the internet in the final years of the century has made materials practices and experiences ubiquitous and apparently universally available though some contributions to this volume reassert the influence and importance of local cultural practice Research in this field is now increasingly multi disciplinary Technological developments are embedded in practices which may be musical social individual and collective The contributors to this companion embrace technological scientific aesthetic historical and social approaches and a host of hybrids but most importantly they try to show how these join up Thus the

intention has been to allow a wide variety of new practices to have voice unified through ideas of reaching out and connecting together and in effect showing that there is emerging a different kind of global music Calling for Change Sheila McIntyre, Elizabeth Sheehy, 2006-06-28 Unique in both scope and perspective Calling for Change investigates the status of women within the Canadian legal profession ten years after the first national report on the subject was published by the Canadian Bar Association Elizabeth Sheehy and Sheila McIntyre bring together essays that investigate a wide range of topics from the status of women in law schools the practicing bar and on the bench to women's grassroots engagement with law and with female lawyers from the frontlines Contributors not only reflect critically on the gains losses and barriers to change of the past decade but also provide blueprints for political action Academics community activists practitioners law students women litigants and law society benchers and staff explore how egalitarian change is occurring and or being impeded in their particular contexts Each of these unique voices offers lessons from their individual collective and institutional efforts to confront and counter the interrelated forms of systemic inequality that compromise women's access to education and employment equity within legal institutions and ultimately to equal justice in Canada Published in English
