# Technological Decisions And Democracy

**Dorothy Nelkin**

## **Technological Decisions And Democracy:**

Parliaments and Technology Norman J. Vig, Herbert Paschen, 2000-01-01 The first comparative analysis of the development and practice of technology assessment in different national settings      Scientific Controversies H. Tristram Engelhardt, Jr., Arthur L. Caplan, 1987-04-24 This collection of essays examines the ways in which disputes and controversies about the application of scientific knowledge are resolved Four concrete examples of public controversy are considered in detail the efficacy of Laetrile the classification of homosexuality as a disease the setting of safety standards in the workplace and the utility of nuclear energy as a source of power The essays in this volume show that debates about these cases are not confined to matters of empirical fact Rather as is seen with most scientific and technical controversies they focus on and are structured by complex ethical economic and political interests Drs Engelhardt and Caplan have brought together a distinguished group of scholars from the sciences and humanities who sketch a theory of scientific controversy and attempt to provide recommendations about the ways in which both scientists and the public ought to seek more informed resolutions of highly contentious issues in science and technology *Scientific Controversies* is offered as a contribution to the better understanding of the roles of both science and nonscientific interests in disputes and controversies pertaining to science and technology

**Technology Choice** Kelvin W Willoughby, 2019-07-09 This book attempts to provide a theoretical framework for answering difficult questions evoked by the concept of technology choice primarily by conducting a review of the Appropriate Technology movement and its ideas and experiments      *Technological Decisions and Democracy* Dorothy Nelkin, 1977-10 Using data from European experiments permitting the public to help determine the usage of technological innovation Dorothy Nelkin provides information on a process involving difficult social choices She examines the question of whether the public should be entitled to a say in determining the impact of technological processes on their daily lives She details individual government efforts to promote broader public participation in decision making The book will be of value to all those concerned with the social and policy dimensions of science and technology Professor Nelkin's essay is written with the clarity and precision characteristic of her earlier writings Apart from its value as a summary of information not readily

*Democracy and Technology* Richard Sclove, 1995-07-28 Intended for anyone interested in democracy and public policy social justice and empowerment political economy and business or the social consequences of technology and architecture

Elgar Encyclopedia of Science and Technology Studies Ulrike Felt, Alan Irwin, 2024-10-03 This Encyclopedia provides a comprehensive overview of the expanding field of science and technology studies STS Covering key frameworks themes and topics Ulrike Felt and Alan Irwin bring together expert contributors to map the development of STS within its historical and intellectual context

**Technologies for Supporting Reasoning Communities and Collaborative Decision Making: Cooperative Approaches** Yearwood, John, Stranieri, Andrew, 2010-10-31 The information age has enabled unprecedented levels of data to be collected and stored At the same time society and organizations have become increasingly complex

Consequently decisions in many facets have become increasingly complex but have the potential to be better informed Technologies for Supporting Reasoning Communities and Collaborative Decision Making Cooperative Approaches includes chapters from diverse fields of enquiry including decision science political science argumentation knowledge management cognitive psychology and business intelligence Each chapter illustrates a perspective on group reasoning that ultimately aims to lead to a greater understanding of reasoning communities and inform technological developments

**Democratic Values and Technological Choices** Stuart Hill,1992 A Stanford University Press classic

Technological Choices Pierre Lemonnier,2013-10-15 Technological Choices applies the critical tools of archaeology to the subject of technology and its impact on humankind throughout the ages An examination of the challenges technological innovations present to various cultures Technological Choices asserts that in any society such choices are made on the basis of cultural values and social relations rather than on the inherent benefits in technology itself Of course this revolutionary viewpoint has critical implications for contemporary Western societies Based on case studies covering a wide range of chronologies and geographies Technological Choices moves rapidly from Neolithic Europe to the modern industrial age stopping on the way to examine the tribes of Papua New Guinea rural Indian and North African societies as well as several European peasant communities The techniques studied range from the manufacture of stone implements to the development of high tech transportation devices With its breadth of subject matter and multidisciplinary approach Technological Choices offers new insight into the interrelationship between technology and society Also unprecedented is the book s emphasis on the functional aspects of material culture

**Decision-making in a Technological Environment** Robert W. Rycroft,Joseph S. Szyliowicz,1980

Environmental Impact Assessment, Technology Assessment, and Risk Analysis Vincent T. Covello,Jeryl L. Mumpower,Pieter Jan M. Stallen,V.R.R. Uppuluri,2013-06-29 This volume is the outcome of a recent NATO Advanced Study Institute ASI on Technology Assessment Environmental Impact Assessment and Risk Analysis Contributions from the Psychological and Decision Sciences The Institute was held in Les Arcs France and functioned as a high level teaching activity during which scientific research results were presented in detail by eminent lecturers Support for the Institute was provided by grants from the NATO Division of Scientific Affairs the u S Office of Naval Research and the Russell Sage Foundation The Institute covered several areas of research including quantitative studies on decision and judgmental processes studies on human intellectual limitations studies on risk attitudes and perceptions studies on factors contributing to conflicts and disputes about hazardous technologies and activities studies on factors influencing forecasts and judgments by experts studies on public preferences for decisionmaking processes studies on public responses to technological hazards and case studies applying principles and methods from the psychological and decision sciences in specific settings

**Science & Civic Life** Kris Morrissey,Robert Garfinkle,2017-09-29 First Published in 2017 Routledge is an imprint of Taylor Francis an Informa company

Bulletin of the Atomic Scientists ,1982-05 The Bulletin of the Atomic Scientists is the

premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world

**The New Politics of Science** David Dickson, 1988 How science gets done in today's world has profound political repercussions since scientific knowledge through its technical applications has become an important source of both economic and military power The increasing dependence of scientific research on funding from business and the military has made questions about the access to and control of scientific knowledge a central issue in today's politics of science In *The New Politics of Science* David Dickson points out that the scientific community has its own internal power structures its elites its hierarchies its ideologies its sanctioned norms of social behavior and its dissenting groups And the more that science as a social practice forms an integral part of the economic structures of the society in which it is imbedded the more the boundaries and differences between the two dissolve Groups inside the scientific community for example will use groups outside the community and vice versa to achieve their own political ends In this edition Dickson has included a new preface commenting on the continuing and increasing influence of industrial and defense interests on American scientific research in the 1980s

Readings in the Philosophy of Technology David M. Kaplan, 2004 *Readings in the Philosophy of Technology* is a collection of the important works of both the forerunners of philosophy of technology and contemporary theorists addressing a full range of topics on technology as it relates to ethics politics human nature computers science and the environment

**Public Administration and Information Technology** Christopher Reddick, 2011-09-16 *Public Administration and Information Technology* provides students and professionals with a solid foundation for understanding and managing information systems to create more efficient effective and transparent organizations Back cover

Why Democracies Need Science Harry Collins, Robert Evans, 2017-03-27 We live in times of increasing public distrust of the main institutions of modern society Experts including scientists are suspected of working to hidden agendas or serving vested interests The solution is usually seen as more public scrutiny and more control by democratic institutions experts must be subservient to social and political life In this book Harry Collins and Robert Evans take a radically different view They argue that rather than democracies needing to be protected from science democratic societies need to learn how to value science in this new age of uncertainty By emphasizing that science is a moral enterprise guided by values that should matter to all they show how science can support democracy without destroying it and propose a new institution The Owls that can mediate between science and society and improve technological decision making for the benefit of all

*Encyclopedia of Science and Technology Communication* Susanna Hornig Priest, 2010-07-14 The explosion of scientific information is exacerbating the information gap between richer poorer educated less educated publics The proliferation of media technology and the popularity of the Internet help some keep up with these developments but also make it more likely others fall further behind This is taking place in a globalizing economy and society that further complicates the division between information haves and have nots and compounds the challenge of

communicating about emerging science and technology to increasingly diverse audiences Journalism about science and technology must fill this gap yet journalists and journalism students themselves struggle to keep abreast of contemporary scientific developments Scientist aided by public relations and public information professionals must get their stories out not only to other scientists but also to broader public audiences Funding agencies increasingly expect their grantees to engage in outreach and education and such activity can be seen as both a survival strategy and an ethical imperative for taxpayer supported university based research Science communication often in new forms must expand to meet all these needs Providing a comprehensive introduction to students professionals and scholars in this area is a unique challenge because practitioners in these fields must grasp both the principles of science and the principles of science communication while understanding the social contexts of each For this reason science journalism and science communication are often addressed only in advanced undergraduate or graduate specialty courses rather than covered exhaustively in lower division courses Even so those entering the field rarely will have a comprehensive background in both science and communication studies This circumstance underscores the importance of compiling useful reference materials The Encyclopedia of Science and Technology Communication presents resources and strategies for science communicators including theoretical material and background on recent controversies and key institutional actors and sources Science communicators need to understand more than how to interpret scientific facts and conclusions they need to understand basic elements of the politics sociology and philosophy of science as well as relevant media and communication theory principles of risk communication new trends and how to evaluate the effectiveness of science communication programmes to mention just a few of the major challenges This work will help to develop and enhance such understanding as it addresses these challenges and more Topics covered include advocacy policy and research organizations environmental and health communication philosophy of science media theory and science communication informal science education science journalism as a profession risk communication theory public understanding of science pseudo science in the news special problems in reporting science and technology science communication ethics

**Democratizing Technology** Tyler J. Veak, 2012-02-01 Largely because of the Internet and the new economy technology has become the buzzword of our culture But what is it and how does it affect our lives More

importantly can we control and shape it or does it control us In short can we make technology more democratic Using the work of Andrew Feenberg one of the most important and original figures in the field of philosophy of technology as a foundation the contributors to this volume explore these important questions and Feenberg responds In the 1990s Feenberg authored three books that established him as one of the leading scholars in a rapidly developing field and he is one of the few to delineate a theory for democratizing technological design He has demonstrated the shortcomings of traditional theories of technology and argued for what he calls democratic rationalization where actors intervene in the technological design process to shape it toward their own ends In this book the contributors analyze foundational issues in Feenberg's work

including questions of human nature biotechnology gender and his readings of Heidegger and they also examine practical issues including democratizing technology moral evaluation and environmentalism      **New Technology (Routledge Revivals)** Greg J. Bamber, Russell D. Lansbury, 2013-12-19 First published in 1989 this book presents a unique comparative perspective on the relationship between technological change and human resource management Following a detailed introduction chapters deal with a variety of issues including managing change industrial democracy and employee involvement gender and structural change International and well renowned authors provide an authoritative analysis which will be of particular interest to students of Business and Management organisational and technological change Economics and Sociology

When people should go to the book stores, search inauguration by shop, shelf by shelf, it is truly problematic. This is why we present the ebook compilations in this website. It will agreed ease you to see guide **Technilogical Decisions And Democracy** as you such as.

By searching the title, publisher, or authors of guide you truly want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be all best area within net connections. If you direct to download and install the Technilogical Decisions And Democracy, it is very easy then, since currently we extend the associate to buy and make bargains to download and install Technilogical Decisions And Democracy correspondingly simple!
