- Surgical AT is required when procedures are:
  - technically complex,
  - long in duration (longer than 20 minutes)
  - involve large open key sites or numerous key parts

OR

- if the clinician is inexperienced or does not feel confident to perform the procedure **without** touching key sites or parts

To counter these risks, a **main critical aseptic field** and **sterile gloves** are required and often full barrier precautions.

Surgical AT should still utilise critical micro aseptic fields and non-touch technique where practical to do so.
