

MANAGEMENT BUYOUT

01

A transaction where a company's management team purchases the assets & operations of the business they manage.

02

A management buyout (MBO) is appealing to professional managers because of the greater potential rewards from being owners of the business rather than employees.

03

The financing required for an MBO is usually a combination of debt & equity that is derived from the buyers, financiers & sometimes the seller.

04

The advantages of MBO is that as the existing managers are acquiring the business, they have a much better understanding of it & there is no learning curve involved.

05

Another advantage is that the company's debt load may be lower, giving it more financial flexibility.

Legal Aspects of Privatisation Bulent Seven,2002 The main aims of this thesis are as follows a To present a comprehensive analysis of the concept of privatisation its origins and limits b To identify the legal and institutional framework for privatisation in different European countries from a comparative perspective c To define and analyse particularly legal issues which arise during the privatisation transactions e g labour law competition law etc d To evaluate which features of the successful legal and organisational framework of privatisation have been successful so as to provide guidelines for those individuals and organisations participating in the privatisation exercises This work found out that there is no simple internationally applicable recipe for privatisation various legal methods and techniques can be used to privatise state owned enterprises Because each country has different circumstances it is impossible to provide a unique model for privatisation each country needs to design its own model according to its circumstances Privatisation is an essential but insufficient element for structural economic reform in the economy and society Privatisation is not a panacea it is not the solution to every economic and administrative problem selling an enterprise to the private sector does not mean an end to all

problems Also privatisation is not an overnight process or a magic touch it will be a lengthy process Furthermore a decision that something can be privatised does not mean that it should be privatised In that context privatisation is not good or bad it is an economic and social instrument If it is well designed it may bring substantial benefits to the economy and society In many countries many state owned enterprises particularly the ones which are financially weak have still not been privatised This finding revealed that the privatisation process will be in the political and economic agenda for at least few more decades
