Siting Environmentally Unwanted Facilities:

Siting Environmentally Unwanted Facilities Euston Quah, K. C. Tan, 2002 This book deals with the question of location of hazardous and non hazardous facilities that no one wants not in my backyard the NIMBY syndrome *Risk Management Strategies Applied To Environmental Cleanup In Central And Eastern Europe - Proceedings Of The International School Of Innovative Technologies For Cleaning The Environment* Richard C Ragaini, 1997-05-27 This book evaluates current technology and policy practices in the United States and Western Europe in the areas of environmental risk assessment risk prioritization and risk management and recommends strategies for successful risk management regarding cleanups in Central and Eastern Europe CEE The primary focus is on the evaluation of proven risk management strategies which can gain public and regulatory acceptance and thereby accelerate the demonstration and use of innovative US and host country environmental technologies in CEE This will in turn help to accelerate the use of innovative cost effective cleanup systems at US DOE sites and the use of US environmental technologies in foreign markets The book emphasizes using risk management strategies as key components of integrated life cycle systems designed to treat hazardous radioactive waste and to remediate soil groundwater plumes Other topics of discussion include partnerships with international companies for commercial applications acceptance by CEE governments and relationships to other US government initiatives **The Distributional**

Effects of Environmental Policy Johnstone Nick, Serret Ysé, 2006-02-23 This book builds upon existing literature to simultaneously examine disparities in the distribution of environmental impacts of environmental policy and in the distribution of financial effects among households *Environmental Concerns and Sustainable Development* Sakarama Somayaji, Ganesha Somayaji, 2009-01-01 At the dawn of this 21st century environmental concerns have received utmost attention from all segments of human society The extreme abuse of nature and ruthless hunt for material happiness are the reasons for post enlightenment destruction of the environment Many consider the issues related to environmental degradation as an environmental crisis During the last century humans have been exploiting nature not merely for need but also for greed Environmentally concerned individuals call for immediate action to stop being greedy and act positively In India too this environmental awareness is fast spreading and the Honourable Supreme Court of India has directed the Central and state governments to introduce courses regarding environmental issues at all levels of education This book is a compilation of research results pertaining to development environment and sustainable development in the form of articles

The International Yearbook of Environmental and Resource Economics 2005/2006 Henk Folmer, Thomas H. Tietenberg, 2005-01-01 The International Yearbook of Environmental and Resource Economics presents articles which are surveys of current issues in this research area where literature is abundant As every year we recommend the present yearbook to keep up with the developments of this literature Michel Griffon Quarterly Journal of International Agriculture The Yearbook provides a comprehensive overview of cutting edge issues in environmental and resource economics The

expert contributors address some of today's most pressing environmental topics including issues in water pricing reforms spatial environmental policy environmental equity and the siting of hazardous waste facilities strategies to conserve biodiversity corporate sustainability the double dividend hypothesis of environmental taxes valuing environmental changes in the presence of risk The Yearbook will provide economists scholars and practitioners working in environmental and resource economics with a comprehensive overview of the cutting edge issues in the field

Research Handbook on Environmental Sociology Franzen, Axel, Mader, Sebastian, 2021-11-19 This Research Handbook presents the state of the art of empirical sociological research on the causes of and solutions to pressing environmental problems It provides cutting edge insights into some of the most urgent challenges facing humanity including anthropogenic climate change and environmental

pollution The contributors argue that profound collective efforts to protect the environment are vital for sustainable development and offer practical solutions to specific contemporary issues *Energy and Society* Alfredo Agustoni, Mara Maretti, 2015-10-08 This book deals with a pivotal issue often marginalized by sociological analysis the relationship between energy and society with different contributions from several European scholars The articles cover a series of topics concerning energy policies risk communication and sustainable development The increasingly complex social organization emerging from the energy shifts of the last two centuries incorporates an increasing quantity of expert knowledge Quite paradoxically when the expert systems seem to be realizing the dream of total control on the uncertainty of the events any occasional accident reveals to be a check for them contributes to undermining their credibility Following the idea of a post democratic turn this kind of mistrust can be considered a different face of political elites and politics in general in the frame of a radical change concerning political culture in the last several decades This change is clear in areas such as risk communication governance and energy policies Environmental Health Risks Friedo Zölzer, Gaston Meskens, 2018-09-21 Environmental health involves the assessment and control of environmental factors that can potentially affect human health such as radiation toxic chemicals and other hazardous agents It is less commonly understood that environmental health also requires addressing questions of an ethical nature Bringing together work from experts across a range of sub disciplines of environmental health this collection of essays discusses the ethical implications of environmental health research and its application presented at the 3rd International Symposium on Ethics of Environmental Health held in August 2016 in the Czech Republic In doing so it builds upon the insights and ideas put forward in the first volume of Ethics of Environmental Health published by Routledge in early 2017 This volume will be of great interest to students and scholars of environmental health applied ethics environmental ethics medical ethics and bioethics as well as those concerned with public health environmental studies toxicology and radiation *Managing Conflict in Facility Siting* Sidney Hayden Lesbirel, Daigee Shaw, 2005-01-01 The book addresses a growing policy problem confronting all democratic nations By exploring the lessons to be learned from international siting experiences it will prove invaluable reading for academics policymakers government agencies NGOs and other societal interests involved in environmental and siting issues BOOK JACKET *Operations Research and Environmental Management* Carlo Carraro, Alain Haurie, 2012-12-06 The activities of the Fondazione ENI Enrico Mattei cover a broad spectrum of research topics ranging from economics to engineering from environmental management at the industry or regional level to basic mathematical modelling research It is the combination of the activities on these last two topics that led the Fondazione to organise with the University of Geneva a work shop where operation research tools were designed with the aim to provide national and local policy makers with appropriate analytical and policy instruments for environmental management In the recent past attention has often been devoted to global environmental issues in which the level of policy making is either international through multi country agreements on emission control or

national when environmental policies are designed to control domestic pollution. Many environmental problems, however, have a local or regional dimension. Even when their dimension is global, e.g. in the case of the greenhouse gas effect, relevant decisions on emission control, such as the adoption of energy saving utilities, are taken at the local level. In many countries, the current legislation imposes the local authorities to prepare plans and adopt measures to control energy consumption or to reduce waste of natural resources. It is therefore important to analyze the way in which local or regional authorities optimise their environmental management.

Surplus Plutonium Disposition (DOE/EIS-0283) for Siting, Construction and Operation of Three Facilities for Plutonium Disposition, 1999 Cost-Benefit Analysis Euston Quah, E.J.

Mishan, 2007-05-07 Should Malaysia build a new steel mill or New York City an urban motorway? Should higher education expand or water supplies be improved? These are typical questions to which cost-benefit analysis, the key economic tool for analyzing problems of social choice, can contribute to, as well as providing a useful vehicle for understanding the practical value of welfare economics. This invaluable text covers the main problems that arise in a typical cost-benefit exercise. Cost-benefit analysis is used everywhere, but its techniques are particularly prominent in fields where there is some kind of ethical dimension. For this edition, E.J. Mishan has been joined by Euston Quah to explore new themes, including the impact of uncertainty on cost-benefit analysis and to introduce a host of new and up-to-date case studies.

Adaptation To Climate Change: Asean And Comparative Experiences Kheng Lian Koh, Robert Kibugi, Ilan Kelman, Rose-liza Eisma Osorio, 2015-08-05
Adaptation to Climate Change: ASEAN and Comparative Experiences presents a dynamic and comprehensive collection of works from legal scholars around the world that delves into a relatively new frontier on legal aspects of climate change adaptation, with focus on the ASEAN region both at the regional level as well as at the national level in some ASEAN countries such as Malaysia, Philippines and Thailand. Other countries not within ASEAN are also represented such as Bangladesh, People's Republic of China, Sri Lanka and the Republic of Taiwan. In doing so, it surveys one of the most important issues confronting developing countries today and the challenges to building resilient societies. It is an essential source of reference for policy makers, administrators, the private sector, officials, scientists, academic scholars, climatologists, NGOs and CSOs in ASEAN and the world.

Improving Environmental Quality Through the Use of Local Ordinances and Regulations
Michael R. Alford, James F. Hudson, 1979 Roma Tre Law Review, The Roma Tre Law Review R3LR is an open source peer-reviewed e-journal which aims to offer a digital forum for scholarly debate on issues of comparative law, international law, law and economics, law and society, criminal law, legal history and teaching methods in law.
