Fellowship and Freedom Thomas Leng, 2020-04-29 This is the first modern study of the Fellowship of Merchant Adventurers England's most important trading company of the sixteenth century in its final century of existence as a privileged organisation Over this period the Company's main trade the export of cloth to northwest Europe was overshadowed by rising traffic with the wider world whilst its privileges were continually criticised in an era of political revolution But the Company and its membership were not passive victims of these changes rather they were active participants in the commercial and political dramas of the century Using thousands of neglected private merchant papers Fellowship and Freedom views the Company from the perspective of its members in the process bringing to life the complex social worlds of early modern merchants For members freedom meant not just the right to access a privileged market but also to trade independently which could conflict with the fellowship of corporate affiliation and the responsibilities to the collective that it entailed The study's major theme is the challenge of maintaining corporate unity in the face of this and other pressures that the Company faced It restores the centrality of the Merchant Adventurers within three important historical narratives England's transition from the margins to the centre of the European and later global economy the rise and fall of the merchant corporation as a major form of commercial government in premodern Europe and the political history of the corporation in an era of state formation and revolution **Tudor England , Making a Living in the Middle Ages**

Christopher Dyer, 2002-01-01 In this book Christopher Dyer reviews our thinking about the economy of Britain in the Middle Ages In analysing economic development and change he allows us to reconstruct the daily lives and experiences of people in the past *The Wealth of England* Susan Rose, 2017-11-30 The wool trade was undoubtedly one of the most important elements of the British economy throughout the medieval period even the seat occupied by the speaker of the House of lords rests on a woolsack In *The Wealth of England* Susan Rose brings together the social economic and political strands in the development of the wool trade and show how and why it became so important The author looks at the lives of prominent wool men gentry who based their wealth on producing this commodity like the Stonors in the Chilterns canny middlemen who rose to prominence in the City of London like Nicholas Brembre and Richard Dick Whittington and men who acquired wealth and influence like William de la Pole of Hull She examines how the wealth made by these and other wool men transformed the appearance of the leading centres of the trade with magnificent churches and other buildings The export of wool also gave England links with Italian trading cities at the very time that the Renaissance was transforming cultural life The complex operation of the trade is also explained with the role of the Staple at Calais to the fore leading to a discussion on the way the policy of English kings especially in the fourteenth century was heavily influenced by trade in this one commodity No other book has treated this subject holistically with its influence on the course of English history made plain Susan Rose presents a fascinating new exposition on the role of the wool trade in the economy and political history of medieval England She shows

how this simple product created wealth and status among men of hugely varying backgrounds transformed market towns both economically and in architectural terms and contributed to fundamental social and cultural changes through trading links with Italy and other European countries at the height of the Renaissance

History of Universities Mordechai Feingold, John Watts, 2019-08-21 This issue of History of Universities Volume XXXII 1 2 contains the customary mix of learned articles and book reviews which makes this publication such an indispensable tool for the historian of higher education Guest edited by Professor John Watts this volume focuses on the history of Corpus Christi College Oxford Corpus Christi College Oxford was founded in 1517 to advance humanistic learning in the service of God This collection of essays by some of the leading historians of late medieval and early modern England takes the early history of the College as a starting point to explore the intellectual social religious political and cultural trends of the era of Renaissance and Reformation Ranging from the fifteenth century to the seventeenth and taking in the study of Greek and Hebrew the practices of antiquarianism charity and divine worship the experience of music punishment and the built environment the networks that connected the college to London and the government and the interactions of scholars with royal policy on religion these fifteen essays and three commentaries aim to expose the multiple perspectives from which an early modern college can be viewed and understood The relationship between Renaissance and Reformation and the social and cultural realities that accompanied these familiar concepts form one central theme in the papers the relationship between religious or educational institutions and the state form another Corpus Christi itself emerges as less innovative than its historic reputation as the first collegium trilingue might suggest but it becomes the gateway to a richer appreciation of the overlapping worlds of learning religion and public life in a time of rapid change

The Development of Leasehold in Northwestern Europe, C. 1200-1600 B. J. P. van Bavel, Phillipp R. Schofield, 2008 In the twelfth to sixteenth centuries the exploitation of landownership underwent drastic changes in various parts of Northwestern Europe In these changes the emergence of the lease plays a pivotal role At the end of the Middle Ages in a number of areas within the North Sea area the greater part of available land was held at lease for relatively short terms The competitive and contractual nature of such leasing has caused many to associate it with the emergence of capitalism in the countryside seeing its rise as a key element in the transformation of the rural economy and society in the last millennium In view of this it is surprising that the emergence of leasing has received little systematic attention particularly where its roots its early development its exact arrangements and the social and economic context of its emergence are concerned let alone the regional and chronological differences in these elements This volume aims to make a first step in exploring these issues Bas van Bavel is professor of Economic and Social History of the Middle Ages at Utrecht University the Netherlands Phillipp P R Schofield is professor of Medieval History Aberystwyth University United Kingdom

Early Modern Prose Fiction Naomi Conn Liebler, 2006-12-05 Emphasizing the significance of early modern prose fiction as a hybrid genre that absorbed cultural ideological and historical strands of the age this

fascinating study brings together an outstanding cast of critics including Sheila T Cavanaugh Stephen Guy Bray Mary Ellen Lamb Joan Pong Linton Steve Mentz Constance C Relihan Goran V Stanivukovic with an afterword from Arthur Kinney Each of the essays in this collection considers the reciprocal relation of early modern prose fiction to class distinctions examining factors such as the impact of prose fiction on the social political and economic fabric of early modern England the way in which a growing emphasis on literacy allowed for increased class mobility and newly flexible notions of class how the popularity of reading and the subsequent demand for books led to the production and marketing of books as an industry complications for critics of prose fiction as it began to be considered an inferior and trivial art form Early modern prose fiction had a huge impact on the social and economic fabric of the time creating a new culture of reading and writing for pleasure which became accessible to those previously excluded from such activities resulting in a significant challenge to existing class structures
