BOOK JACKET Archaeology in America Linda S. Cordell, Kent Lightfoot, Francis McManamon, George Milner, 2008-12-30 The greatness of America is right under our feet The American past the people battles industry and homes can be found not only in libraries and museums but also in hundreds of archaeological sites that scientists investigate with great care These sites are not in distant lands accessible only by research scientists but nearby almost every locale possesses a parcel of land worthy of archaeological exploration Archaeology in America is the first resource that provides students researchers and anyone interested in their local history with a survey of the most important archaeological discoveries in North America Leading scholars most with an intimate knowledge of the area have written in depth essays on over 300 of the most important archaeological sites that explain the importance of the site the history of the people who left the artifacts and the nature of the ongoing research

Archaeology in America divides its coverage into 8 regions: the Arctic and Subarctic, the Great Basin and Plateau, the Great Plains and Rocky Mountains, the Midwest, the Northeast, the Southeast, the Southwest, and the West Coast. Each entry provides readers with an accessible overview of the archaeological site as well as books and articles for further research. **Science in the American Southwest** George Ernest Webb, 2002-07. What began as a colony of the eastern scientific establishment soon became a self-sustaining scientific community. **BOOK JACKET**

Anthropology at Harvard David L. Browman, Stephen Williams, 2013-07-15. The history of anthropology at Harvard is told through vignettes about the people famous and obscure who shaped the discipline at Harvard College and the Peabody Museum. The role of amateurs and private funders in the early growth of the field is highlighted, as is the participation of women and of students and scholars of diverse ethnicities. *Thirty Years Into Yesterday* Jefferson Reid, Stephanie Whittlesey, 2015-11-01. For thirty years the University of Arizona Archaeological Field School at Grasshopper, a 500-room Mogollon pueblo located on what is today the Fort Apache Indian Reservation in Arizona, probed the past, taught scholars of international repute, and generated controversy. This book offers an extraordinary window into a changing American archaeology and three different research programs as they confronted the same pueblo ruin. Like the enigmatic Mogollon culture it sought to explore, the earlier University of Arizona field schools in the Forestdale Valley and at Point of Pines Grasshopper research engendered decades of controversy that still lingers in the pages of professional journals. Jefferson Reid and Stephanie Whittlesey, players in the controversy who are intimately familiar with the field school that ended in 1992, offer a historical account of this major archaeological project and the intellectual debates it fostered. *Thirty Years Into Yesterday* charts the development of the Grasshopper program under three directors and through three periods dominated by distinct archaeological paradigms: culture history, processual archaeology, and behavioral archaeology. It examines the contributions made each season, the concepts and methods each paradigm used, and the successes and failures of each. The book transcends the interests of southwestern archaeologists in demonstrating how the three archaeological paradigms reinterpreted Grasshopper, illustrating larger shifts in American archaeology as a whole. Such an opportunity will not come again as funding constraints, ethical concerns, and other issues no doubt will preclude repeating the Grasshopper experience in our lifetimes. Ultimately, *Thirty Years Into Yesterday* continues the telling of the Grasshopper story that was begun in the authors' previous books. In telling the story of the archaeologists who recovered the material residue of past Mogollon lives and the place of the Western Apache people in their interpretations, *Thirty Years Into Yesterday* brings the story full circle to a stunning conclusion. **Correlative Archaeology** Fumi Arakawa, 2022-06-02. In *Correlative Archaeology*, Fumi Arakawa applies correlative thinking practices which are derived from an East Asian view of the world that stresses connectivity to archaeological interpretations. Arakawa, a Japanese scholar who was trained in Western archaeology, argues that a correlative paradigm can help archaeologists as well as scholars and researchers from other disciplines consider competing paradigms and integrate Native American voices and narratives into

interpretations of prehistoric art and landscapes Hinterlands and Regional Dynamics in the Ancient Southwest Alan P. Sullivan, James Bayman, 2007-01-01 Hinterlands and Regional Dynamics in the Ancient Southwest is the first volume dedicated to understanding the nature of and changes in regional social autonomy political hegemony and organizational complexity across the entire prehistoric American Southwest With geographic coverage extending from the Great Plains to the Colorado River and from Mesa Verde to the international border the volume s ten case studies synthesize research that enhances our understanding of the ancient Southwest s highly variable demographic land use and economic histories For this volume hinterlands are those areas whose archaeological records do not disclose the ceramic architectural and network evidence that initially led to the establishment of the Hohokam Chaco and Casas Grandes regional systems Employing a variety of perspectives such as the cultural landscapes approach heterarchy and the common pool resource model as well as technical methods such as petrographic and stylistic attribute analyses the volume s contributors explore variation in hinterland identities subsistence ecology and sociopolitical organization as regional systems expanded and contracted between the 9th and 14th centuries AD The hinterlands of the prehistoric Southwest were home to a substantial number of people and were often used as resource catchments by the inhabitants of regional systems Importantly hinterlands also influenced developments of nearby regional systems under whose footprint they managed to retain considerable autonomy By considering the dynamics between hinterlands and regional systems the volume reveals unappreciated aspects of the ancient Southwest s peoples and their lives thereby deepening our awareness of the region s rich and complicated cultural past The Columbia Guide to American Indians of the Southwest Trudy Griffin-Pierce, 2010-01-22 A terrific guide for the novice that offers a wealth of valuable information This book is academic yet written in an approachable style Maureen T Schwarz author of Blood and Voice The Life Courses of Navajo Women Ceremonial Practitioners The Columbia Guide to American Indians History and Culture Also Includes The Columbia Guide to American Indians of the Lorella Fowler The Columbia Guide to American Indians of the Southeast Theda Perdue and Michael D Green A major work on the history and culture of Southwest Indians The Columbia Guide to American Indians of the Southwest tells a remarkable story of cultural continuity in the face of migration displacement violence and loss The Native peoples of the American Southwest are a unique group for while the arrival of Europeans forced many Native Americans to leave their land behind those who lived in the Southwest held their ground Many still reside in their ancestral homes and their oral histories social practices and material artifacts provide revelatory insight into the history of the region and the country as a whole Trudy Griffin Pierce incorporates her lifelong passion for the people of the Southwest especially the Navajo into an absorbing narrative of pre and postcontact Native experiences She finds that even though the policies of the U S government were meant to promote assimilation Native peoples formed their own response to outside pressures choosing to adapt rather than submit to external change Griffin Pierce provides a chronology of instances that have shaped present day conditions in the region as well as an

Communities and Households in the Greater American Southwest Robert J. Stokes, 2019-07-01 Communities and Households in the Greater American Southwest presents new research on human organization in the American Southwest examining families households and communities in the Ancestral Puebloan Mogollon and Hohokam major cultural areas as well as the Fremont Jornada Mogollon and Lipan Apache areas from the time of earliest habitation to the twenty first century Using historical data dialectic approaches problem oriented and data driven analysis and ethnographic and gender studies methodologies the contributors offer diverse interpretations of what constitutes a site village and community how families and households organized their domestic space and how this organization has influenced researchers interpretations of spatially derived archaeological data Today s archaeologists and anthropologists understand that communities operate as a multi level organizational contextual and referential human creation which informs their understanding of how people actively negotiate their way through and around community constraints The chapters in this book creatively examine these interactions revealing the dynamic nature of ancient and modern groups in the American Southwest The book has two broad complementary themes one focusing on household decision making identity and structural relations with the greater community the other concerned with community organization and integration household roles within the community and changes in community organization violence and destabilization coalescence and cooperation over time Communities and Households in the Greater American Southwest weaves a rich tapestry of ancient and modern life through innovative approaches that will be of interest not only to Southwestern archaeologists but to all researchers and students interested in social organization at the household and community levels Contributors James R Allison Andrew Duff Lindsay Johansson Michael Lindeman Myles Miller James Potter Alison E Rautman J Jefferson Reid Katie Richards Oscar Rodriguez Barbara Roth Kristin Safi Deni Seymour Robert J Stokes Richard K Talbot Scott Ure Henry Wallace Stephanie M

Whittlesey *The Bioarchaeology of Social Control* Ryan P. Harrod, 2017-09-20 Taking a bioarchaeological approach this book examines the Ancestral Pueblo culture living in the Four Corners region of the United States during the late Pueblo I through the end of the Pueblo III period AD 850 1300 During this time a vast system of pueblo villages spread throughout the region creating what has been called the Chaco Phenomenon named after the large great houses in Chaco Canyon that are thought to have been centers of control Through a bioarchaeological analysis of the human skeletal remains this volume provides evidence that key individuals within the hierarchical social structure used a variety of methods of social control including structural violence to maintain their power over the interconnected communities Theodore E. White and the Development of Zooarchaeology in North America R. Lee Lyman, 2016-07-01 Theodore E White and the Development of Zooarchaeology in North America illuminates the researcher and his lasting contribution to a field that has largely ignored him in its history The few brief histories of North American zooarchaeology suggest that Paul W Parmalee John E Guilday Elizabeth S Wing and Stanley J Olsen laid the foundation of the field Only occasionally is Theodore White 1905 77 included yet his research is instrumental for understanding the development of zooarchaeology in North America R Lee Lyman works to fill these gaps in the historical record and revisits some of White s analytical innovations from a modern perspective A comparison of publications shows that not only were White s zooarchaeological articles first in print in archaeological venues but that he was also at least initially more prolific than his contemporaries While the other founders of the field were anthropologists White was a paleontologist by training who studied long extinct animals and their evolutionary histories In working with remains of modern mammals the typical paleontological research questions were off the table simply because the animals under study were too recent And yet White demonstrated clearly that scholars could infer significant information about human behaviors and cultures Lyman presents a biography of Theodore White as a scientist and a pioneer in the emerging field of modern anthropological zooarchaeology In the Aftermath of Migration Anna A. Neuzil, 2016-12-15 The Safford and Aravaipa valleys of Arizona have always lingered in the wings of Southwestern archaeology away from the spotlight held by the more thoroughly studied Tucson and Phoenix Basins the Mogollon Rim area and the Colorado Plateau Yet these two valleys hold intriguing clues to understanding the social processes particularly migration and the interaction it engenders that led to the coalescence of ancient populations throughout the Greater Southwest in the fourteenth and fifteenth centuries A D Because the Safford and Aravaipa valleys show cultural influences from diverse areas of the pre Hispanic Southwest particularly the Phoenix Basin the Mogollon Rim and the Kayenta and Tusayan region they serve as a microcosm of many of the social changes that occurred in other areas of the Southwest during this time This research explores the social changes that took place in the Safford and Aravaipa valleys during the thirteenth through the fifteenth centuries A D as a result of an influx of migrants from the Kayenta and Tusayan regions of northeastern Arizona Focusing on domestic architecture and ceramics the author evaluates how migration affects the expression of identity of both migrant and

indigenous populations in the Safford and Aravaipa valleys and provides a model for research in other areas where migration played an important role Archaeologists interested in the Greater Southwest will find a wealth of information on these little known valleys that provides contextualization for this important and intriguing time period and those interested in migration in the ancient past will find a useful case study that goes beyond identifying incidents of migration to understanding its long lasting implications for both migrants and the local people they impacted The Sociopolitical Structure Of Prehistoric Southwestern Societies Steadman Upham,Kent G Lightfoot,Roberta A. Jewett,2019-06-26 This book examines current archaeological approaches for studying the organizational structure of prehistoric societies in the American Southwest It presents the historical background of the divergent theoretical models that have been used to interpret Southwestern socio political organizations
