

The World's Indigenous Peoples

1 'Indigenous Peoples' has no official definition by the UN due to diverse identities and histories. Instead, organizations utilize a modern understanding of traits including self-identification, historical continuity with pre-settler societies, distinct systems and culture, and a commitment to preserve heritage and environments.

Here's a look at the latest available population distribution of the estimated 470 million Indigenous Peoples around the world.

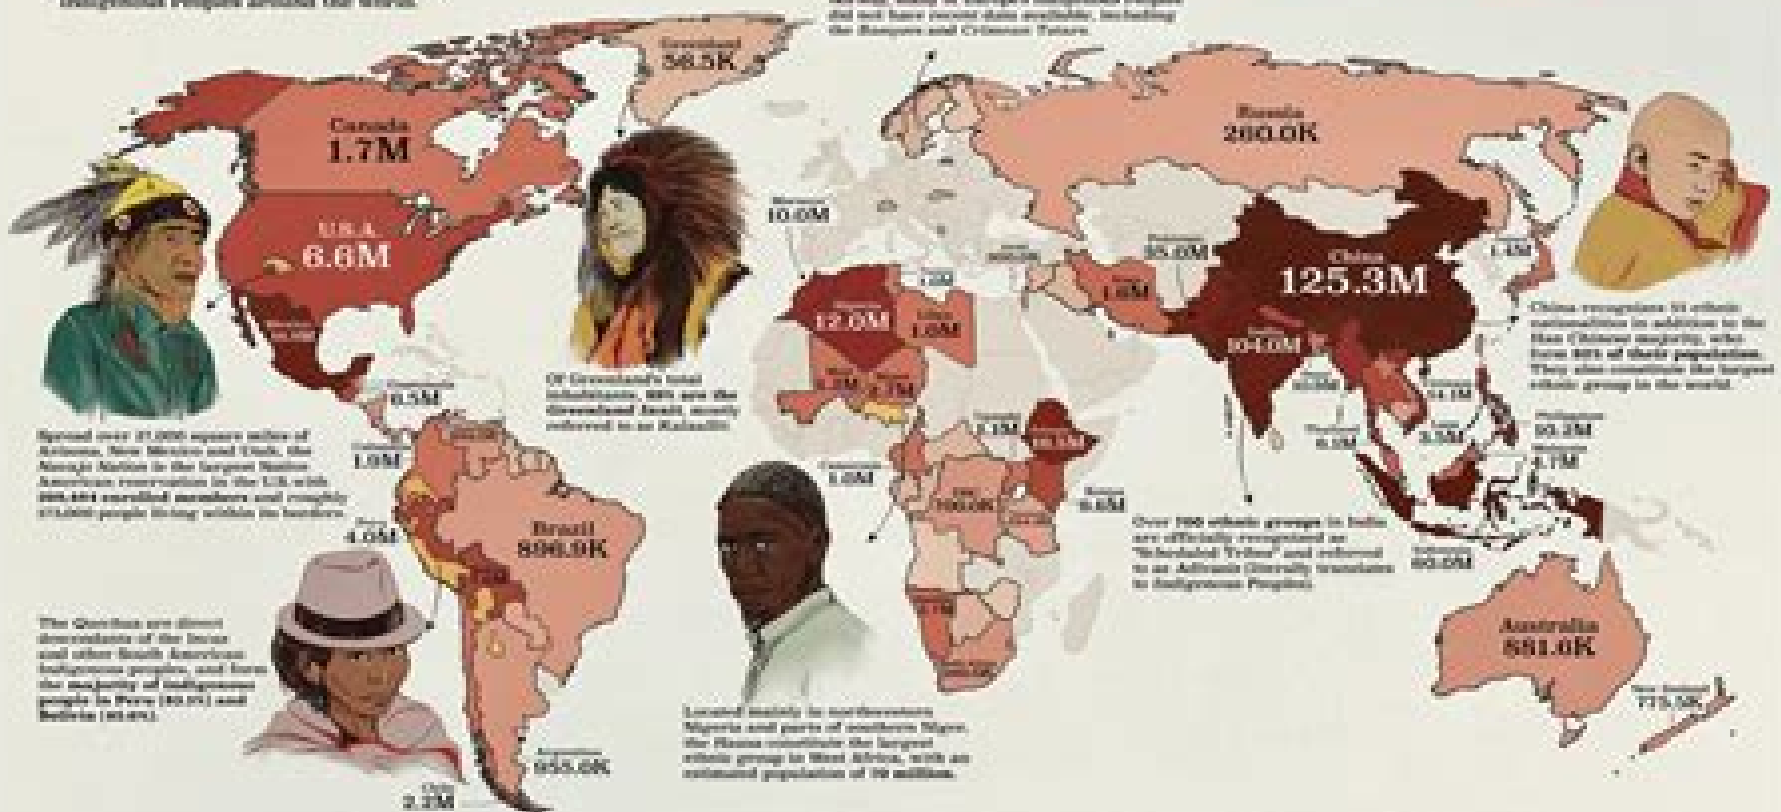

While Indigenous Peoples comprise 8% of the world's population, their lands and territories constitute at least 25% of the global land surface including unique ecosystems and vital biodiversity.

Indigenous Population by Country/Territory

Besides the State of Finland, Sweden and Norway, many of Europe's Indigenous Peoples did not have recent data available, including the Romany and Crimean Tatars.
