[Chicago's Greatest Year, 1893](#) Joseph Gustaitis, 2013-05-01 In 1893 the 27.5 million visitors to the Chicago World's Fair feasted their eyes on the impressive architecture of the White City, lit at night by thousands of electric lights. In addition to marveling at the revolutionary exhibits, most visitors discovered something else: beyond the fair's 633 acres lay a modern metropolis that rivaled the world's greatest cities. The Columbian Exposition marked Chicago's arrival on the world stage, but even without the splendor of the fair, 1893 would still have been Chicago's greatest year. An almost endless list of achievements took place in Chicago in 1893: Chicago's most important skyscraper was completed in 1893, and Frank Lloyd Wright opened his office in the same year. African

dynamics of the times In this social history Lawrence R Samuel examines the future visions of intellectuals artists scientists businesspeople and others to tell a chronological story about the history of the future in the past century He defines six separate eras of future narratives from 1920 to the present day and argues that the milestones reached during these years especially related to air and space travel atomic and nuclear weapons the women s and civil rights movements and the advent of biological and genetic engineering sparked the possibilities of tomorrow in the public s imagination and helped make the twentieth century the first century to be significantly more about the future than the past The idea of the future grew both in volume and importance as it rode the technological wave into the new millennium and the author tracks the process by which most people to some degree have now become futurists as the need to anticipate tomorrow accelerates
