SLA Research And Language Teaching:

SLA Research and Language Teaching Rod Ellis, 1997-11-20 **SLA Research and Materials Development for Language Learning** Brian Tomlinson, 2016-05-20 SLA Research and Materials Development for Language Learning is the only book available to focus on the interaction between second language acquisition theory and materials development for language learning. It consists of contributions written by experts in SLA, experts in materials development, researchers who have expertise in both fields, and introductions and conclusions by the editor. The book is organized into four major sections: position statements, materials driven by SLA theory, evaluations of materials in relation to SLA theory, and proposals for action that offer a diverse range of perspectives while maintaining a cohesive and comprehensive overview on the subject. This book is ideal for post graduate courses in applied linguistics and second language acquisition and for researchers interested in the relationship between SLA and materials development.

Language Teaching Research and Language Pedagogy Rod Ellis, 2012-03-27 This book examines current research centered on the second language classroom and the implications of this research for both the teaching and learning of foreign languages. It offers illuminating insights into the important relationship between research and teaching and the inherent complexities of the teaching and learning of foreign languages in classroom settings. Offers an accessible overview of a range of research on instruction and learning in the L2 classroom. Bridges the relationship between research, teachers and learners. Helps evolve the practice of dedicated current language teachers with research findings that suggest best practices for language teaching.

Doing SLA Research with Implications for the Classroom Robert M. DeKeyser, Goretti Prieto Botana, 2019-03-15 This book is unique in bringing together studies on instructed second language acquisition that focus on a common question: What renders this research particularly relevant to classroom applications and what are the advantages, challenges and potential pitfalls of the methodology adopted? The empirical studies feature experimental, quasi experimental and observational research in settings ranging from the classroom to the laboratory and CALL contexts. All contributors were asked to discuss issues of cost, ethics, participant availability, experimental control, teacher collaboration and student motivation as well as the generalizability of findings to different kinds of educational contexts, languages and structures. This volume should be of interest to graduate students in second language research, practicing teachers who want some guidance to navigate the sometimes overwhelming array of publications, and to researchers who are planning studies on instructed second language learning or teaching and are looking to make principled decisions on which of the existing methodologies to adopt.

SLA Research and Language Teaching Rod Ellis, 1997 Ellis addresses issues such as the role of form-focused instructions, explicit and implicit knowledge, the roles of input and output, consciousness, raising the acquisition of pragmatic competence and task evaluation.

Handbook of Foreign Language Communication and Learning Karlfried Knapp, Barbara Seidlhofer, H. G. Widdowson, 2009 The Handbooks of Applied Linguistics provide a state of the art description of established and emerging areas of Applied Linguistics. Each volume gives

an overview of the field explains the most important traditions and their findings identifies the gaps in current research and gives perspectives for future directions *Key Topics in Second Language Acquisition* Vivian Cook, David Singleton, 2014-04-03 This textbook offers an introductory overview of eight hotly debated topics in second language acquisition research It offers a glimpse of how SLA researchers have tried to answer common questions about second language acquisition rather than being a comprehensive introduction to SLA research Each chapter comprises an introductory discussion of the issues involved and suggestions for further reading and study The reader is asked to consider the issues based on their own experiences thus allowing them to compare their own intuitions and experiences with established research findings and gain an understanding of methodology The topics are treated independently so that they can be read in any order that interests the reader **The Study of Second Language Acquisition** Rod Ellis, 1994 This

thorough introduction to second language research provides a comprehensive review of the research into learner language internal and external factors in language acquisition individual differences and classroom second language learning

Second Language Learning and Language Teaching Vivian Cook, 2016-05-05 Second Language Learning and Language Teaching provides an introduction to the application of second language acquisition research to language teaching Assuming no previous background in second language acquisition or language teaching methods this text starts by introducing readers to the basic issues of second language acquisition research It then examines how people learn particular aspects of the second language such as grammar vocabulary pronunciation and the writing system and at the strategies they adopt in their learning and the differences between individuals Final chapters look at second language learning in a broader context the goals of language teaching and how teaching methods relate to SLA research This newly updated fifth edition builds on the comprehensive scope of earlier editions while also addressing more recent developments in the field particularly multilingual approaches to language teaching **An Introduction to Second Language Acquisition Research** Diane

Larsen-Freeman, Michael H. Long, 2014-09-25 Understanding how people learn and fail to learn second and foreign languages is increasingly recognised as a critical social and psycholinguistic issue Second languages are vitally important to diverse groups of people ranging from refugees to college students facing foreign language requirements This book provides a synthesis of empirical findings on second and foreign language learning by children and adults emphasising the design and execution of appropriate research
