*Teaching and the Case Method* Louis B. Barnes, Carl Roland Christensen, Abby J. Hansen, 1994 This third edition of *Teaching and the Case Method* is a further response to increased national and international interest in teaching teachers and learning as well as the pressing need to enhance instructional effectiveness in the widest possible variety of settings Like its predecessors this edition celebrates the joys of teaching and learning at their best and emphasizes the reciprocal exchange of wisdom that teachers and students can experience It is based on the belief that teaching is not purely a matter of inborn talent On the contrary the knowledge skills and attitudes that make for excellence in teaching can be analyzed abstracted and learned One key premise of *Teaching and the Case Method* is that all teaching and learning involve a core of universally applicable principles that can be discerned and absorbed through the study and discussion of cases

**Systems Integration**, 1989-04      *Open Systems For Europe* T. Elliman, C. Sanger, 2013-11-11 *Open Systems for Europe* AD Elliman C Sanger *Open Systems for Europe* combines two important and topical themes First *Open Systems* the development of vendor independent means to link and interwork with applications across a range of different systems Secondly the formation of a single European market after 1992 with its attendant opening up of public purchasing and the

removal of the remaining obstacles to the free movement of products people and services between the member states of the European Community What unites these two themes is the issue of standards As Walter de Backer Director of Informatics of the Commission of the European Communities CEC says in his keynote paper Ch 1J more and more organisations are beginning to realise that an IT strategy based on standards is feasible economic and necessary It is feasible if not immediately then certainly through an evolutionary path phased over a number of years it is economic because the costs associated with interface changes and conversions can be avoided if not eliminated totally and it is necessary if organisations are to communicate and interwork effectively Moreover the restructuring of Europe into a single market has already prompted a realignment of corporate interests existing groups are breaking up and forming new pan European conglomerates
