Wallerstein, 1978      **Cradling the Chrysalis** E. Mary Sullivan, Harriett Goldenberg, 2003-01-01 This book addresses the underlying philosophy and rationale for the training of psychotherapists How can training prepare prospective psychotherapists and counsellors for a task whose practitioners cannot even agree as to whether it is a science or an art an impersonal clinical interaction or a profoundly humane even spiritual encounter The authors argue for an understanding of psychotherapy training as a process which closely parallels that of therapy itself      *The Teaching and Learning of Psychotherapy* Rudolf EKSTEIN (and WALLERSTEIN (Robert Solomon)), Robert Solomon WALLERSTEIN, 1959      **To be a Therapist** Jerry M. Lewis, 1978      **Cradling the Chrysalis** Mary MacCallum Sullivan, Harriett Goldenberg, 2018-05-16 This book addresses the ethical and philosophical basis for the teaching learning involved in becoming a psychotherapist How can training prepare prospective psychotherapists counsellors and counselling psychologists for a task whose practitioners cannot even agree as to whether it is an art or a science an impersonal clinical interaction or a profoundly humane even spiritual encounter The authors believe they share with their students a passion about the possibilities inherent in this particular kind of conversation Such a meeting demands a fully personal engagement and a profoundly ethical attitude towards the relationship with the Other it is also potentially an important beginning in repairing the world The book explores the relative importance and emphasis of the structure content and process of psychotherapy training Its thesis is that the teaching learning takes place in the quality of the reciprocal meeting between the teacher and the learner      **Educational Technology and the Teaching-learning Process** Jeanne Saylor Berthold, Mary Alice Curran, Diana Young Barhyte, 1970      **Handbook of Family Therapy Training and Supervision** Howard A. Liddle, Douglas C. Breunlin, Richard C. Schwartz, 1988-06-17 Over the last three decades family therapy has revolutionized the mental health field changing the way human problems are conceived and therapy is conducted In concert with the dynamic growth of family therapy the field of family therapy training and supervision has also expanded enormously yielding many new ideas and skills Yet until now few books have been devoted to it and no single volume has

attempted to relate the full breadth of this growing field in terms of its conceptual and theoretical expansion as well as its practical application **HANDBOOK OF FAMILY THERAPY TRAINING AND SUPERVISION** fills this need by presenting a truly comprehensive view of this dynamic area To accomplish this broad yet in depth scope editors Liddle Breunlin and Schwartz have assembled 30 highly acclaimed authorities to author chapters in their respective areas of expertise For further clarification the editors have included segues that introduce and analyze each of the book s four major sections providing the reader with an overview of the section highlights of themes that run through it and discussion of the issues raised in a way that ties the chapters together The book opens with a presentation of the unique and innovative approaches to training and supervision that have evolved in each separate school of family therapy Offering a panoramic view of the entire field of family therapy these seven chapters allow for fascinating comparisons among the different schools regarding the process by which ideas about therapy evolve into training techniques and philosophies Section II follows with an explication of the pragmatics of family therapy supervision Helping family therapy trainers avoid and anticipate the common mistakes involved with supervision the skills described in this section create an atmosphere conducive to learning and maintaining a working trainer trainee relationship and finally for training of supervisors Practical guidelines for using live and video supervision are included Section III features family therapy trainers in such diverse fields as psychiatry psychology family medicine social work nursing free standing and academic family therapy programs who describe the problems and advantages they encounter teaching these new ideas within their idiosyncratic contexts The book closes with a section that includes reflections on the field by such innovative and respected leaders as Cloe Madanes and Jay Haley Among topics covered are perspectives and recommendations for researchers evaluating family therapy practical advice for incorporating a cultural perspective into training programs feedback on the experience of live supervision from trainees perspectives An appendix follows that provides over 400 references organized by subject for easy reference Given the level and scope of this extraordinary text **FAMILY THERAPY TRAINING AND SUPERVISION** is an invaluable resource for anyone interested in teaching learning or simply appreciating family therapy

### **Methods of Research in Psychotherapy**

Louis A. Gottschalk, 2012-12-06 The prospective reader may well ask about the particular merits of this volume especially in view of several dozen similar offerings each with its own excellences and of the easy availability of symposia conferences conventional reviews abstract journals and serial research reports In spite of such other attractions it seems to me that these 34 essays are among the most informative and stimulating which are now available in the areas covered The editors have been successful in attracting new articles from many of the most prominent investigators now actively working at research in psychotherapy who can therefore speak for themselves about what they are doing Several of the articles have been in the preparatory stage for numerous years Not only do they represent the vanguard of research but because of the introduction of relatively new concepts in communication theory in the clinical setting which can be implemented by the new technology specifically the use of sound films and tape they probably presage the shape of much that is to come It is commonplace that the history of a science is closely allied to the history of the tools available Here we see the concepts attitudes and working methods on this frontier being set forth frankly and concretely in ways which avoid many of the deficiencies and evasions of previous clinical research
