Context: The Anglo-Saxon period is often referred to as "The Dark Ages" because it is a time of low literacy and technology. The British were invaded by Celtic warriors who successfully fought off Roman invasion for years until the Roman's massive military force was called too much for trouble. Once the Romans conquered Great Britain, they made it difficult to Romanize because they were not the only people who lived in the island. The Roman's had to leave as they could not defend their original empire. When the Romans left Britain, the civilization they created was left as an unprotected target for invaders. The Angles and the Saxons, who were from Central Europe, started their invasion of the island and the island around with. Though the remaining Brits fought against the invaders, they were eventually driven out. The remaining Brits were the remnants of the Anglo-Saxons and the island became known as Anglo-Saxon Britain.

Context: Since the age of the Anglo-Saxons is marked with violence, the literature of this time reflects this. Life was difficult and the people seemed to live in a constant state of war. There was little to no humor in their writing, no settings of spring or summer. Instead, the literature of the Anglo-Saxon period mostly about the harsh struggles in the fight to survive.

Culture: Because of the Anglo-Saxon invasion of Britain, Anglo-Saxon culture became the foundation for English culture. One of the most prominent languages in the world—English—came from the culture's common language spoken in these centuries. In modern times, it is called "Old English," and while it sounds very different from Modern English, it is the building block for English that is spoken today. Just as language changes, so did the Anglo-Saxon culture. These changing words had proper nouns and only some words were used. As they became more settled people, they had an more Christian beliefs and more modern ideas and ways of life.

Extension: Research Anglo-Saxon literature and writing. Write a short story. My name is _____, I am _____, I live in _____, I am _____, I am _____.

Toward a Framework of Resources for Learning to Teach Lauren Gatti, 2016-08-19 This book advances a new framework for learning to teach using in depth case studies to show how learning to teach in any type of program can best be understood as a recursive and dynamic process wherein teachers differentially access programmatic relational experiential disciplinary and dispositional resources In the last twenty years debates in the field of teacher preparation have increasingly become paralyzing and divisive as rhetoric around the failure of university teacher preparation intensifies The author addresses the historical and practical factors that animate these debates arguing that novice teachers and teacher educators must understand the central conflicts in the field however the book also advances a way of approaching learning to teach that accounts for but does not get stuck at the level of programmatic designation Using lively in depth case studies the author shows how novice urban English teachers from two different teacher preparation pathways a university based program and an urban teacher residency learn to teach within a policy context of high stakes testing and college readiness
