By far, the most satisfying experiences I have had included the transformation of dreams into reality. Whether it was obtaining a college degree, improving our instructional unit in social studies, or committing to a life-long relationship, everything worthwhile started with an image of some desired future. Of course there are plenty of surprises and serendipitous events along the way, but knowing and choosing to take advantage of some, and not others, is often guided by at least a fuzzy view of the future state.

In my work with Creative Problem Solving (CPS) since 1970, I have had a few peak experiences which had helped me understand and appreciate the power of CPS. One development stimulated the first writing of this paper a while ago. It was the application and integration of the current approach to CPS by Ken McCluskey and colleagues within the area of reclaiming talent with at-risk youth. I was particularly gratified that it was the current approach to CPS that was being used to engage those of talent and high ability to learn and use their hidden creative strengths, particularly those who could not reach their dreams within the current system of education.

The descriptions and graphic depictions of CPS have changed frequently over the past sixty years. During that time much research and application have

Advances and New Perspectives in Higher Education Quality Maria Esteban,Ana B. Bernardo,Ellian Tuero Herrero,Joana R. Casanova,Antonio Cervero,2024-04-22 The changes that have occurred in today s society require Higher Education to be highly efficient in the academic and professional preparation of young people who enter university For that reason universities around the globe have been advocating in recent years for an improvement in the quality of teaching learning processes As an example the World University Consortium 2023 currently presents among its most urgent and priority objectives the identification of the best

evaluative practices of the educational processes that are carried out at the University as well as the recognition of the actions aimed at improving educational processes based on scientific evidence In this way it seeks to distinguish all those educational actions that are at the forefront going from actions at the micro level such as individual teaching practices in the classroom such as the application of the flipped classroom or the use of augmented reality up to actions taken at the macro level such as those proposed in the Horizon Europe 2020 strategy

Thriving in Transitions Laurie A. Schreiner, Michelle C. Louis, Denise D. Nelson, 2020-11-18 When it was originally released *Thriving in Transitions A Research Based Approach to College Student Success* represented a paradigm shift in the student success literature moving the student success conversation beyond college completion to focus on student characteristics that promote high levels of academic interpersonal and intrapersonal performance in the college environment The authors contend that a focus on remediating student characteristics or merely encouraging specific behaviors is inadequate to promote success in college and beyond Drawing on research on college student thriving completed since 2012 the newly revised collection presents six research studies describing the characteristics that predict thriving in different groups of college students including first year students transfer students high risk students students of color sophomores and seniors and offers recommendations for helping students thrive in college and life New to this edition is a chapter focused on the role of faculty in supporting college student thriving
