Teaching Loving And Self Directed Learning:

Teaching, Loving, and Self-directed Learning David A. Thatcher, 1973 **Teaching, Loving, and Self-Directed Learning. Photos by Sarah C. Toughill, by Said, and by David Thatcher** David A. Thatcher, **Self-directed learning research: An imperative for transforming the educational landscape** Elsa Mentz, Thabisile Buthelezi, Josef de Beer, Adri du Toit, Aubrey Golightly, Sarah Gravett, Marietjie Havenga, Anita Lubbe, Judah P. Makonye, Neal Petersen, Paulinah Phahamane, Jessica Pool, H.J. (Hennie) Steyn, Johannes (Hannes) L. van der Walt, Charl Wolhuter, 2016-12-31 This book will benefit specialists in the field of the education sciences. It represents significant progress in knowledge production. Self-directed learning has become increasingly important not only for education in South Africa but also for education sciences in the international arena. This is a result of the changing education landscape caused by the demands of the 21st century as well as the rapid change in knowledge production. Learners should be equipped with skills to take responsibility for their own learning. New innovative strategies should be incorporated into teaching and learning in order to meet the changing demands in education. Traditional teacher-centred practices are still the norm in most South African schools and higher education institutions and do not adequately prepare students for lifelong learning in the 21st century. The content focuses on the theory behind self-directed learning, explores strategies such as cooperative learning, problem-based learning, case-based teaching, and large group teaching that enhance self-directed learning and the use of blended learning in a self-directed learning environment. The book demonstrates how self-directed learning can be enhanced in mathematics, computer science, and life science education and through the use of student tutors for geography. Digital technology could, for example, also be used in innovative ways for education in isiZulu folk poetry. The findings are based on original empirical research and a sound theoretical conceptual framework. In an environment of rapidly changing knowledge production, this book responds to the challenge of how to equip learners with the necessary skills to take responsibility for their own learning. The book presents innovative teaching and learning strategies for meeting the changing demands in education. Group activities, the responsibilities of learners, and the obstacles that hinder their learning are analysed, and the way in which educators can support them is discussed. Educational values such as mutual trust are discussed, and self-directed assessment is explored. This is a timely collective work authored by experts who subscribe to the approach of self-directed learning. Educators should discover new teaching and learning strategies and value the integration of self-directed learning in the classroom.

Theoretical and Historical Evolutions of Self-Directed Learning Caleb Collier, 2023-04-14 This book analyzes the deep historical and theoretical roots of self-directed learning models in order to put forward a new conceptual understanding of self-directed learning. It utilizes philosophical methods to present arguments both historical and contemporary in favor of shifting education toward self-directed models and away from a view of education that places teachers, administration, curriculum, and standards at the center of the learning endeavor. This book demonstrates that self-directed learning has

proven to be effective in numerous contexts and builds on this history to present a new philosophy of education termed Eudemonic Self Directed Learning for individual and societal flourishing Exploring exemplars from different cultural and historical settings to inform post pandemic pedagogies and policies this book will appeal to scholars and researchers of the history and philosophy of education with interests in self directed learning and its potential for contemporary practice

Advances in Technological Innovations in Higher Education Adarsh Garg, B V Babu, Valentina E Balas, 2024-03-29 The evolution of technology in education can no longer be comprehended simply by looking at the use of computers and networks Technology is not just a supplementary tool to the conventional method of education Education has to undergo a complete transformation with technological innovations for the sustainability of quality education as a system and not in silos Sustainability in education also necessitates a more workable strategy to realize socially viable educational policies and practices which can focus more on personalized learning Due to various factors like emerging technologies changing needs of the learners policy reforms for enhancing employability

and emphasis on uninterrupted education as in the case of the pandemic scenario of COVID 19 there is a need to steer a major transition in the education system The education system has to be real and proficient for it to be instrumental to nurture an informed and knowledgeable society This book on technological innovations in higher education is organized largely based on the diversity of higher education ecosystems that are supported by technological innovations Various author viewpoints give insights into the full potential of technology as well as its risks in interrelated areas of higher education to work towards sustainability of value based quality education across the globe

Learning Patterns in Higher Education

David Gijbels,Vincent Donche,John T. E. Richardson,Jan D. Vermunt,2013-09-11 Learning Patterns in Higher Education brings together a cutting edge international team of contributors to critically review our current understanding of how students and adults learn how differences and changes in the way students learn can be measured in a valid and reliable way and how the quality of student learning may be enhanced There is substantial evidence that students in higher education have a characteristic way of learning sometimes called their learning orientation Biggs 1988 learning style Evans et al 2010 or learning pattern Vermunt and Vermetten 2004 However recent research in the field of student learning has resulted in multi faceted and sometimes contradictory results which may reflect conceptual differences and differences in measurement of student learning in each of the studies This book deals with the need for further clarification of how students learn in higher education in the 21st century and to what extent the measurements often used in learning pattern studies are still up to date or can be advanced with present methodological and statistical insights to capture the most important differences and changes in student learning The contributions in the book are organized in two parts a first conceptual and psychological part in which the dimensions of student learning in the 21st century are discussed and a second empirical part in which questions related to how students learning can be measured and how it develops are considered Areas covered include Cultural influences on learning patterns Predicting learning outcomes Student centred learning environments and self directed learning Mathematics learning This indispensable book covers multiple conceptual perspectives on how learning patterns can be described and effects and developments can be measured and will not only be helpful for learning researchers as such but also for educational researchers from the broad domain of educational psychology motivation psychology and instructional sciences who are interested in student motivation self regulated learning effectiveness of innovative learning environments as well as assessment and evaluation of student characteristics and learning process variables

Alternative Schooling and Student Engagement Nina Bascia, Esther Sokolov Fine, Malcolm Levin, 2017-08-14 This book explores the unique phenomenon of public alternative schools in Toronto Canada and other large urban areas Although schools of this kind have existed for more than a century very little has been written about the alternative school movement These alternatives focus more on child centered instruction give many students and teachers opportunities to organize the school differently provide a greater voice for teachers students and parents and engage students far more with experiential learning When traditional school structures are failing to meet the needs of many children and youth there is a rapidly growing need for information and discussion about alternatives that will encourage their talents and serve their needs This book draws attention to the issue of alternative schooling to help make it more accessible to a wider audience Why Kids Love (and Hate) School Steven P. Jones, Eric C. Sheffield, 2018-11-19 Some students enter classrooms with an I dare you try to teach me look on their faces and others bounce into class excited to learn and anxious to please the teacher We know we can't automatically blame teachers or schools when students don't want to learn But we also know that sometimes teachers and schools don't always set students up for success and they don't always help them love what they're learning Why Kids Love and Hate School Reflections on Practice investigates some of the school and classroom practices that help students love school and some that send students in the opposite direction Intended for classroom teachers teacher education students and school administrators chapters in the book investigate a variety of topics how schools can build effective school cultures the struggle students encounter in learning practices of other countries that help students love school testing practices that cause students to hate school and much more Perfect for courses in Introduction to Education General Methods Management Assessment Educational Research Educational Administration Leadership Teacher Leadership Curriculum Theory Curriculum Development
