Help develop your child's curiosity, reasoning ability, creativity, critical thinking and independence by asking open-ended questions.

① Tell me about what you built, made, created.

② Can you describe what happened?

③ What do you like best about it?

④ Tell me about what you saw.

⑤ How did you feel when you finished it?

⑥ What did you learn?

⑦ How might you do it differently?

⑧ Tell me about how you worked together.

⑨ What did you see happening?

⑩ How do you know that is the right answer?

⑪ What do you think will happen next?

⑫ How did you work it out?

⑬ Can you think of a new way to do it?

⑭ What would you do different next time?

⑮ Why did you choose \_\_\_\_\_ over \_\_\_\_\_?

Teaching Kids to Think Critically Clifton Chadwick, 2014-09-12 This book is based on a simple series of psychological concepts While ability to think has always been important the knowledge economy significantly increases the demand for higher order thinking and problem solving abilities Parents should take a much more active role in teaching their children to think Early preschool years are critical because long term attitudes and early strategies are learned then Approaches and perspectives on learning to think can be clearly communicated to parents in ways which will make it possible for them to use the correct strategies to stimulate their students to think more clearly and critically There are five elements involved in good logical critical and creative thinking

- 1 The skills involved in effective efficient and lasting learning or commonly referred to as cognitive processing strategies
- 2 The mastery of logic and structure of what is being learned
- 3 Awareness of what one knows and does not know and how one knows and how one thinks
- 4 The standards or guidelines for the validity and reliability of what one knows called intellectual standards
- 5 The knowledge and skills involved in critical thinking and solving problems in different subjects or domains

*New Theory of Children's Thinking Development: Application in Language Teaching* Kekang He, 2015-10-23 This book proposes a new theory on children's thinking cognitive development According to this theory the stages of said development should be divided into four stages first the stage of animalistic thinking birth before possessing basic language ability second the stage of elementary thinking beginning to possess basic language ability beginning to possess proficient oral ability third the stage of intermediate thinking beginning to possess proficient oral ability before the formation of comprehensive cognitive ability and fourth the stage of advanced thinking after the formation of comprehensive

cognitive ability In this context thinking includes logical thinking visual thinking and intuitive thinking Based on the new theory the author points out the serious negative impact that Piaget s stage theory of children s cognitive development has had on Chinese language education in China The book also offers a number of practical principles such as five teaching activities for language teaching of extension typing writing passage and thinking
