*Teach a Student to Read* Heather Marie Kosur, 2020-06-29 Teach a Student to Read TASTR developed in response to the Teach Your Child to Read in 100 Easy Lessons reading program Unlike phonics programs that erroneously posit that sounds correlate with letters in an alphabetic writing system TASTR strives to teach the English writing system as fully and accurately as possible TASTR approaches the teaching of reading through the tenet that the primary function of English spelling is to express meaning The program begins with the expectation that the reading student knows the letters of the English alphabet and then teaches the graphemes of the English spelling system The student learns about the graphemes digraphs and trigraphs that can spell sounds But not all letters spell sounds Some letters are markers Other letters are zeroed The single final nonsyllabic E which is the lynchpin of the English spelling system is introduced in the first lesson A student must understand that not all letters spell sounds as soon as learning to read begins In addition to English graphemes TASTR also introduces word sums prefixes and suffixes A word sum shows how a word is built The student will learn the ways that prefixes and suffixes affect the spelling and pronunciation of words TASTR additionally includes information about some of the most common verbs in English as well as information about nouns adjectives and adverbs A brief tutorial for uncovering the history of a word and thus an explanation of the spelling is included in the introduction Teach a Student to Read is not a phonics program TASTR presents English

orthography as fully and accurately as possible thus giving a new reader the information needed to read and understand the spelling of any English word The Reading Supplement contains the stories from Volume 1 and Volume 2 in print form for use with the electronic version of the reading program     **Reading for Kids (and Adults!)** Lynda Delo,2012-01-03 This homework supplement contains all the worksheets spelling and handwriting activities Now We re Reading sections lesson stories and flashcards as the original book It does not contain the detailed instructions as the original book but is meant for students to take home for more practice The Reading For Kids and Adults beginning phonics reading program is a ten lesson systematic approach to teaching reading It is suitable for teaching in a tutoring situation where a teacher only spends one or two hours a week with their students or daily as in a classroom or home school From the very first lesson where only five letters and their most common sounds are taught students begin to read real text Each lesson builds on previous lessons The activities and reading material in each lesson includes only words and sentences from the previous lessons This allows students to slowly build their phonetic base while reading in real context The Reading For Kids and Adults beginning phonics reading program teaches the most common sound for each of the English alphabet s twenty six letters and covers three basic skill levels Level A Sound letter recognitionLevel B Blending segmenting and sight wordsLevel C Creating meaning and comprehension
