encourage students to use higher order cognitive skills to construct knowledge and negotiate meaning Implement assessment tools aimed at facilitating the deep learning process Support international and other nontraditional students to construct learning deeply The book begins with an examination of the big picture the institutional constraints that hinder a culture of deep learning From there it deconstructs the concept of deep learning and it examines every element of the deep learning process It also discusses the factors that contribute to produce a deep learning environment The rest of the chapters are about how to facilitate deep learning The book examines every component of the teaching and learning system goals performances and evaluation It discusses strategies and methods that teachers can adopt to help students learn how to read and write in their disciplines in a deep way The book also discusses the notion of inclusive deep learning environments which focus on engaging nontraditional students
