proclaimed that Education is not the filling of a pail but the lighting of a fire This book lights the fire for the teaching of writing John Hattie author of the Visible Learning books **A Rhetoric of Reflection** Kathleen Yancey,2016-08-15

Reflection in writing studies is now entering a third generation Dating from the 1970s the first generation of reflection focused on identifying and describing internal cognitive processes assumed to be part of composing The second generation operating in both classroom and assessment scenes in the 1990s developed mechanisms for externalizing reflection making it visible and thus explicitly available to help writers Now a third generation of work in reflection is emerging As mapped by the contributors to **A Rhetoric of Reflection** this iteration of research and practice is taking up new questions in new sites of activity and with new theories It comprises attention to transfer of writing knowledge and practice teaching and assessment portfolios linguistic and cultural difference and various media including print and digital It conceptualizes conversation as a primary reflective medium both inside and outside the classroom and for individuals and collectives and articulates the role that different genres play in hosting reflection Perhaps most important in the work of this third generation is the identification and increasing appreciation of the epistemic value of reflection of its ability to help make new meanings and of its rhetorical power for both scholars and students Contributors Anne Beaufort Kara Taczak Liane Robertson Michael Neal Heather Ostman Cathy Leaker Bruce Horner Asao B Inoue Tyler Richmond J Elizabeth Clark Naomi Silver Christina Russell McDonald Pamela Flash Kevin Roozen Jeff Sommers Doug Hesse *Stylistics of Professional Discourse* Martin

Solly,2015-11-19 Why are doctors prescriptions illegible and why is the language of the law considered impenetrable to outsiders Need they be so Is it more difficult for non native speakers of English than native speakers to access the discourse of professions such as law and medicine These are some of the questions covered by this book which uses the lens of stylistics to shed light on how the discourse of professional communities is used not just to convey meanings but also to construct identity and demark membership The volume focuses on the three domains of healthcare law and education as well as on the language of the new technologies with the aim of showing how a knowledge of stylistics can provide the key for appropriate and acceptable language use enabling successful communication and potential membership of professional communities Beyond Conversation William Duffy,2021-01-04 Collaboration was an important area of study in writing for many years but interest faded as scholars began to assume that those working within writing studies already got it In *Beyond Conversation* William Duffy revives the topic and connects it to the growing interest in collaboration within digital and materialist rhetoric to demonstrate that not only do the theory pedagogy and practice of collaboration need more study but there is also much to be learned from the doing of collaboration While interrogating the institutional politics that circulate around debates about collaboration this book offers a concise history of collaborative writing theory while proposing a new set of commonplaces for understanding the labor of coauthorship Specifically *Beyond Conversation* outlines an interactionist theory that explains collaboration as the rhetorical capacity that manifests in the discursive engagements coauthors enter

into with the objects of their writing Drawing on new materialist philosophies post qualitative inquiry and interactionist rhetorical theory Beyond Conversation challenges writing and literacy educators to recognize the pedagogical benefits of collaborative writing in the work they do both as writers and as teachers of writing The book will reinvigorate how teachers scholars and administrators advocate for the importance of collaborative writing in their work

Stylistics of Professional Discourse Solly Martin Solly, 2015-11-19 Why are doctors prescriptions illegible and why is the language of the law considered impenetrable to outsiders Need they be so Is it more difficult for non native speakers of English than native speakers to access the discourse of professions such as law and medicine These are some of the questions covered by this book which uses the lens of stylistics to shed light on how the discourse of professional communities is used not just to convey meanings but also to construct identity and demark membership The volume focuses on the three domains of healthcare law and education as well as on the language of the new technologies with the aim of showing how a knowledge of stylistics can provide the key for appropriate and acceptable language use enabling successful communication and potential membership of professional communities

Refiguring Prose Style T.R. Johnson, Tom Pace, 2005-10-30 For about two decades say Johnson and Pace the discussion of how to address prose style in teaching college writing has been stuck with style standing in as a proxy for other stakes in the theory wars The traditional argument is evidently still quite persuasive to some that teaching style is mostly a matter of teaching generic conventions through repetition and practice Such a position usually presumes the traditional view of composition as essentially a service course one without content of its own On the other side the shortcomings of this argument have been much discussed that it neglects invention revision context meaning even truth that it is not congruent with research that it ignores 100 years of scholarship establishing composition s intellectual territory beyond service The discussion is stuck there and all sides have been giving it a rest in recent scholarship Yet style remains of vital practical interest to the field because everyone has to teach it one way or another A consequence of the impasse is that a theory of style itself has not been well articulated Johnson and Pace suggest that moving the field toward a better consensus will require establishing style as a clearer subject of inquiry Accordingly this collection takes up a comprehensive study of the subject Part I explores the recent history of composition studies the ways it has figured and all but effaced the whole question of prose style Part II takes to heart Elbow s suggestion that composition and literature particularly as conceptualized in the context of creative writing courses have something to learn from each other Part III sketches practical classroom procedures for heightening students abilities to engage style and part IV explores new theoretical frameworks for defining this vital and much neglected territory The hope of the essays here focusing as they do on historical aesthetic practical and theoretical issues is to awaken composition studies to the possibilities of style and in turn to rejuvenate a great many classrooms

English Language Education in Southeast Asia: Problems and Possibilities (Penerbit USM) Ruanni Tupas, Shantini Pillai, Ramesh Nair, 2016 This book addresses the problems and

possibilities of English language education in Southeast Asia from the point of view of researchers who are themselves also English language teachers The researchers are from Malaysia Indonesia Philippines Singapore and New Zealand The articles in this edited book examine teaching and language learning goals in relation to the desired development of linguistic knowledge More importantly the articles also reflect on the nurturing of appropriate learning abilities and independent thinking that is framed by the expanding learner awareness of identity culture and society within and beyond the classroom Ultimately the book tackles issues that emerge from the fact that we teach and learn English in a region that is hugely multicultural and multilingual

Feeling Our Way Wendy Bishop, Deborah Coxwell Teague, 2004-03 This provocative and sometimes humorous collection of essays written by college writing teachers for college writing teachers explores seldom discussed issues to help TAs develop confidence in overcoming classroom challenges Teachers both seasoned and new to the profession create a dialogue by sharing their rich and varied experiences and responses to classroom and department situations Each Part presents 4 to 7 short essays by Adjuncts and TAs focusing on their experiences and lessons learned At the end of each Part more experienced teachers respond to the ideas generated in the preceding essays and add their own advice concerns and solutions Part 1 Approaching the Classroom centers on entering a new writing program and succeeding as a foreign born writing teacher Part 2 Inside Out focuses on gaining confidence as a teacher and managing sexual politics and power struggles in the classroom Part 3 Beyond the Classroom helps readers question the teaching profession and offers advice on surviving department politics An Appendix provides a useful listing of composition texts that offer further helpful advice

Forthcoming Books Rose Arny, 2003 **Teaching Writing**, 2016 **Dead Letters** Tracy Santa, 2008 This study views the history of error in composition instruction through a reader's rather than a writer's perspective and in so doing documents the manner in which our visions of error and perceptions of student writers who produce error have both transformed and remained static over the course of 130 years A central conclusion derived from this is an assertion that error is largely produced by readers of student writers rather than student writers themselves Publications of the State of Illinois, 2002 **Publications of the State of Illinois** Illinois.
