## How to Teach Problem-Solving in the Classroom

Consider bringing a problem up to discuss together.

It can be as simple as putting up a new anchor chart or introducing a new resource. Model how you have this problem (failure to put something?) and ask the students to help you with it. Collaborate together on how to solve the problem. Introduce more complex problems as they grow and learn, such as fighting in the lineup.

Give Opportunities to solve problems.

Provide a goal during an activity.

- What went well?
- What could have gone better?
- Was there a different way to solve the problem?
- How did you end up solving the problem?
- What strategies did you use?
