Teaching Selves Jane Danielewicz, 2001-07-19 Through the experiences of six students who wish to become high school teachers this book explores the process of what it means to be a teacher and proposes ten principles for identity development

The Teacher as Expert Robert Welker, 1992-01-01 At a time of increasing pressure for teachers to become more professional and more technically competent this book examines in a critical fashion whether teachers should be considered experts Written in straightforward and accessible prose Welker examines the concept of expertise through the ideas of notable educational thinkers in the twentieth century beginning with E P Cubberley and George S Counts and concluding with a chapter on critical theory and the ideas of Maxine Greene and Henry Giroux Other chapters examine such thinkers as Willard Waller Daniel Lortie Alan Tom Philip Jackson and Ivan Illich Each chapter establishes an historical and ideological context and evaluates how the social character of the expert matches the responsibilities While the idea of the teacher assuming the role of educational expert is gaining increased credibility in the current reform movement this book shows that the concept fails to describe the senses of moral and social competence required of the teacher Also the notion of the expert teacher might stand in the way of teachers forming the type of public partnerships necessary for them to complete their tasks adequately

How to Succeed in School Without Really Learning David F. Labaree, 1997-01-01 David Labaree claims that by thinking of education primarily as the route to individual advancement we are defining it as a private good a means of gaining a competitive advantage over other people He endorses an alternative vision one that defines education as a public good providing society with benefits that can be collectively shared for example by producing citizens who are politically responsible and workers who are economically productive

Popular Culture, Educational Discourse, and Mathematics Peter M. Appelbaum, 1995-04-26 This groundbreaking book analyzes contemporary education discourse in the light of curriculum politics and popular culture using sources ranging from academic scholarship to popular magazines music video film and television game shows Mathematics is used as an extreme case since it is a discipline so easily accepted as separable from politics ethics or the social construction of knowledge Appelbaum's juxtaposition of popular culture public debate and professional practice enables an examination of the production and mediation of common sense distinctions between school mathematics and the world outside of schools Terrain ordinarily displaced or excluded by traditional education literature becomes the pendulum for a new conversation which merges research and practice while discarding pre conceived categories of understanding The book also serves as an entertaining introduction to emerging theories in cultural studies progressively illustrating the uses of discourse analysis for comprehending ideology the implications of power knowledge links professional practice as a technology of power and curriculum as at once commodities and cultural resources In this way Appelbaum effectively reveals a direction for teachers students and researchers to cooperatively form a community attentive to the politics of curriculum and popular culture

Redesigning Teacher Education Alan R. Tom, 1997-01-01 Explores the shortcomings of teacher education and proposes design principles for rethinking teacher preparation Establishes a reform agenda for teacher education faculties Alan Tom is among the best at relating important issues in teacher education and a critical reading of the literature with his own professional experience This book is ambitious It lives up to the claim of examining political and institutional problems along with conceptual and intellectual ones This is something few teacher educators attempt and is a critical area to open up for sustained analysis Drawing upon events from his career as a teacher educator Alan R Tom candidly analyzes the predominant criticisms of teacher education and rejects the common tendency to infer the teacher education curriculum from such ideas as metaphors for teaching or knowledge He proposes eleven design principles to serve as a reform agenda including creating programs capable of self renewal having faculty model the desired image and skills of teaching and rethinking the sequence of practice and theory Each principle identifies a differing dimension for the conceptual and structural redesign of teacher preparation Four specific change strategies are evaluated as well task force top down piloting and family style The low status of teacher educators and the excessive regulation of teacher education are also examined as is the failure to give adequate attention to the administrative organization for teacher education

Effective Teaching Hersholt C. Waxman, Herbert J. Walberg, 1991

Reflective Teacher Education Linda Valli, 1992-01-01 The Synoptic Text Today and Other Essays William F. Pinar, 2006 Synoptic textbooks have played a major role in the intellectual advancement of U S curriculum studies William F Pinar argues for a new synoptic text summarizing recent and relevant research in the academic disciplines toward the

subjective and social reconstruction of the public sphere that is the school classroom. Such a reconceptualization of curriculum development enables teachers to complicate the classroom conversations they themselves will lead. Subsequent essays demonstrate the thematic and methodological forms such curriculum development might take. **Effective**

Teaching Styles Elizabeth Hayes, 1989-10-19. Effective teaching style is one of perennial interest in continuing education. The rapidly changing context of continuing education in modern society requires adult educators to continually reassess their teaching practices to meet new needs and situations. The most important skill for teachers ultimately may not be expertise with particular methods as much as it is the ability to engage in a process of critical reflection on the process and outcomes of instruction in relation to the demands of a particular context and an explicit set of values. The chapters in this volume of *New Directions for Adult and Continuing Education* are intended to assist continuing educators in this process of critical reflection. Topics have been selected from a variety of areas important for teachers of adults in a wide range of continuing education programs. This is the 43rd issue of *New Directions for Adult and Continuing Education*. For more information on this series please see the Journals and Periodicals page.

La justicia curricular Jurjo Torres Santomé, 2010-12-28. Educar implica ayudar a alumnos y alumnas a que construyan su propia visión del mundo sobre la base de una adecuada organización de la información con la que puedan comprender cómo las sociedades y los distintos colectivos sociales han alcanzado los grandes logros políticos, sociales, culturales y científicos y cuáles son los que hoy se están consiguiendo. Las instituciones escolares tienen el encargo político de educar; en consecuencia, pueden y deben desempeñar un papel mucho más activo como espacio de resistencia y de denuncia de los discursos y prácticas que en el mundo de hoy continúan legitimando diferentes modalidades de discriminación. A lo largo de los distintos capítulos de este libro se ofrece un minucioso análisis de las principales transformaciones que están aconteciendo en la actualidad pero con la mirada puesta en las repercusiones, condiciones, obligaciones y dilemas que cada una de ellas plantea a los sistemas educativos y, por tanto, al trabajo que la sociedad encomienda a las instituciones escolares. La justicia curricular es el resultado de analizar críticamente los contenidos de las distintas disciplinas y propuestas de enseñanza y aprendizaje con las que se pretende educar a las nuevas generaciones. Obliga a tomar conciencia para que cuanto se decida y realice en las aulas sea respetuoso y atienda a las necesidades y urgencias de todos los colectivos sociales. Un proyecto curricular justo tiene que ayudar a las ciudadanas y ciudadanos más jóvenes y especialmente a los que pertenecen a los colectivos sociales más desfavorecidos a verse, analizarse, comprenderse y juzgarse en cuanto personas éticas, solidarias, colaborativas y corresponsables de un proyecto más amplio de intervención sociopolítica destinado a construir un mundo más humano, justo y democrático.

Jurjo Torres Santomé es Catedrático de Didáctica y Organización Escolar en la Facultad de Ciencias de la Educación de la Universidad de A Coruña.

Moral Matters Barbara S. Stengel, Alan R. Tom, 2006-09-08. Most of us agree that moral issues matter but how do they fit into the context of our schools? Since *A Nation at Risk* most educators and policymakers have focused on the academic

dimensions of schooling governed by standards and testing This timely book explores the ways that committed K 12 educators have attempted to make the moral visible in American schooling over the past 25 years The authors look at their efforts using an analytic framework that distinguishes five possible ways that the moral and the academic can be related in schooling Book Features A useful survey of moral education that enables the reader to arrive at personal judgments about the value and weaknesses of various approaches Case studies that illustrate the moral education of students the moral component of teachers work and the moral dimensions of school structure A mixture of philosophical analysis and attention to school practice suitable for courses and accessible to teachers administrators policymakers and parents

Changing Times In Teacher Education Marvin F. Wideen, Peter P. Grimmett, 2013-05-13 Pressures for reform in teacher education have begun to take on the same sense of urgency as school reform Those faculties of education who have been strong advocates for change in the schools now find themselves the subject of similar pressures from governmental policy makers Attempts at change have taken place in many different countries and jurisdictions around the world This book details through a series of international vignettes how teachers are responding to the changing times and social contexts in which they do their work The authors hold the view that changes are inevitable in teacher education but what is not clear is who will control the changes and whether the end result will actually improve the preparation of teachers The theme of the book is that the reform of teacher education should be informed by intelligent debate and that any attempt to restructure teacher preparation should result from a careful reconceptualisation of its purposes and processes

Preparing for Inclusive Teaching Elizabeth Bondy, Dorene D. Ross, 2012-02-01 Grounded in the reform effort of a large state university with a history of excellence in teacher education this book provides teacher educators and institutions with a valuable resource for navigating the choppy waters of reform Contributors all involved in the reform process tell the story of the University of Florida's efforts in the mid 1990s to unify general and special education in its teacher education program The book examines various aspects of the reform process explains challenges faced by teacher educators within today's context and particularly within the context of large research institutions presents strategies leaders use to keep reform on track in spite of challenges and includes detailed descriptions of the nature and structure of the reformed program Also included are valuable insights of teacher education experts from other institutions to contextualize the particulars of this reform within the national education and teacher education scenes

Restructuring Teacher Education Alan R. Tom, 1991 This booklet focuses on reform of the professional portion of initial teacher preparation Following an introduction entitled Professional Education Under Attack the booklet is organized into three sections The first

section evaluates the validity of four common criticisms of professional education of teachers including those made by proponents of the academic reform model These criticisms include claims that education courses are vapid segmented impractical and directionless The second section presents three reform proposals the academic model the research on teaching model associated with the knowledge base movement of the 1980s and John Goodlad s collaborative model The discussion of the models includes the extent to which these three proposals address the four common criticisms of professional study The third section speculates about the kind of structural reform in teacher education that seems desirable and feasible in light of the characteristics and underlying assumptions of the three reform models Whether a collaborative approach can bring together the forces that are currently divided is problematic but it is concluded such a development may well be the best opportunity to retain and renew professional education for teachers Contains 46 references LL
