Indian Writings on Education, 1979-1986 S. P. Agrawal, J. C. Aggarwal, 1992 **Women in Higher Education, 1850-1970** E. Lisa Panayotidis, Paul Stortz, 2017-09-19 This edited collection illustrates the way in which women s experiences of academe could be both contextually diverse but historically and culturally similar It looks at both the micro individual women and universities and macro level comparative analyses among regions and countries within regional national trans national and international contexts The contributors integrally advance knowledge about the university in history by exploring the intersections of the lived experiences of women students and professors practices of co education and intellectual and academic cultures They also raise important questions about the complementary and multidirectional flow and exchange of academic knowledge and information among gender groups across programmes disciplines and universities Historical inquiry and interpretation serve as efficacious ways with which to understand contemporary events and discourses in higher education and more broadly in community and society This book will provide important historical contexts for current debates about the numerical dominance and significance of women in higher education and the tensions embedded in the gendering of specific academic programs and disciplines and university policies missions and mandates

The Education Papers Dale Spender, 2013-04-15 First published in 1987 this volume makes available key documents giving the contemporary reader a valuable record of women s struggle for education in the nineteenth and early twentieth centuries All of the women in this collection achieved significant reforms or struggled to change popular prejudices about women s education *Parliamentary Debates* New Zealand. Education in New Zealand Marcia Taff Berrien,1964 **Gender Trouble Makers** Jennifer Rothchild,2007-05-07
International development efforts aimed at improving girls lives and education have been well intended somewhat effective but ultimately short sighted and incomplete This is because international development efforts often operate under a reductive understanding of the term gender and how it influences the lives of girls and boys Gender is more commonly conceived by international efforts as characteristics which are ascribed to girls as norms for behaviour In particular the analysis in Gender Trouble Makers focuses on the social constructions of gender and the ways in which gender was reinforced and maintained through a case study in rural Nepal In developing countries like Nepal promoting access to and participation in existing formal education programme is clearly necessary but it is not in itself sufficient to transform gender power relations in the broader society When gender is properly addressed as a process then all stakeholders involved researchers governmental officials and community members can begin to understand and devise more effective ways to increase both girl and boy students enrollment participation and success in school **Colonial Reports Report on North Borneo** Great Britain.
