The Making of Musicians T. H. Yorke Trotter, 2013-11 An excerpt from the beginning of the first chapter I FIRST PRINCIPLES MUSIC SHOULD BE THE MOST POPULAR ART WHICH should be the most popular of the arts Undoubtedly music for it is natural to all men to express their feelings in rhythmic motion and in sound and music is the art of rhythmic motion in sound We hear on all sides the attempt at self expression in musical sound The boy whistles as he goes about his occupations the working girl sings at her work to all of us alike the first means of self expression are to be found in music Moreover we hear music everywhere in nature We all know what a charm in life is given by the sweet songs of birds while we seem to hear a music in the splash of the waves of the sea and in the sighing of the wind There is music all around us though some of us are slow to hear it And yet we must admit that the study of this art of music is not at the present time a joy to the pupil but rather in many cases a wearisome task There is only this horrid music that comes between us mother said the little boy in the Punch story and his case is by no means a singular one Often do we hear people say they are unmusical and hate music there is no universal wish to learn the secret of the art THE REASON WHY THE STUDY OF MUSIC IS OFTEN SO MUCH DISLIKED Why is it that the study of music is not popular Why is it that there is so much unwillingness to give up time to learn to play on an instrument or to use the voice with good effect The answer is simply this that as a rule the teaching of music has been merely a giving of facts facts of notation that is to say imparting the knowledge of the symbols used to express musical sounds and what I may call facts of technique that is to say the training of the muscles so as to obtain the best results in practical performance on an instrument or in the production of the singing voice The piano is the instrument that is most used in the teaching of music and the methods adopted in teaching performance on the piano may be taken as emblematic of those used in other branches of musical education The child is taught what are called notes that is the symbols used to express musical sound and the use of the keys on the piano that when pressed down reproduce these sounds The muscles are trained to be strong and pliable and to answer quickly and readily the orders of the brain This teaching is carried on until the pupil can read the notation of music and can play pieces correctly and possibly with good tone and proper attention to the phrasing or articulation of the music At the same time the pupil may be taught what is incorrectly called the theory of music that is to say he may be given the knowledge of all the symbols used their meaning and effect the construction of scales the use of signatures at the beginning of a piece and the like
