courses Student success should start with faculty making sure they are equipped with the tools and understanding of the students Student s readiness starts with the faculty s readiness Having the combined understanding of faculty and student needs can help to create a professional development plan that will enhance the developmental level mathematics courses in higher education

**Bringing Developmental Education to Scale: Lessons from the Developmental Education Initiative** Janet C. Quint, 2013 There is wide agreement that the well paying jobs of the future will require postsecondary credentials But for many students attending community college developmental or remedial classes in reading composition and or mathematics the courses that students often must complete before they can enroll in courses that confer credit toward a degree pose an often insuperable barrier to progress While over half of all community college students are judged to need at least one developmental class the majority of students who are referred to developmental education do not complete their prescribed sequence of remedial courses much less persist and obtain a diploma or certificate To address this issue the Bill Lumina Foundation for Education funded the evaluation Fifteen colleges that had been early participants in Achieving the Dream AtD Community Colleges Count a national community college reform network dedicated to evidence based decision making were selected to receive grants of 743 000 each over a three year period The institutions are highly diverse in size location and the characteristics of the students they serve The purpose of the dei grants was to enable the colleges to scale up existing interventions or establish new ones that would help students to progress through developmental courses more rapidly and more successfully or to bypass these courses altogether Dei funding also financed state policy teams that sought to influence state higher education legislation and policies Mdc a North Carolina based nonprofit organization was selected as managing partner of the demonstration and in this role monitored and assisted the colleges organized communications and convened regular meetings of demonstration participants Six other organizations made up the partnership that provided leadership and support for the colleges Among these mdrc a nonprofit nonpartisan policy research organization was asked to evaluate the demonstration with the Community College Research Center ccrc at Teachers College Columbia University serving as evaluation partner The directive to the evaluators was to examine the implementation of the dei at the participating colleges This report the second and final report from the evaluation relies on a combination of qualitative data primarily interviews with key personnel conducted during the course of site visits to all 15 institutions and through periodic telephone calls with project directors and quantitative data information on participation and on student outcomes that the colleges regularly collected It addresses three main questions 1 To what extent did the colleges scale up their chosen developmental education reforms to serve more students 2 What factors affected the colleges ability to expand their programs and practices And 3 To what extent were the colleges strategies associated with improvements in student outcomes The report also considers ways that participation in the dei influenced the colleges more broadly For these reasons it may be of interest to other colleges looking to scale up reforms especially reforms that are related to instruction

and the provision of student supports as well as to funders concerned about how best to support community colleges in bringing promising ideas to scale Technical Appendix is included Individual chapters contain footnotes Contains 16 tables and 6 figures     Developmental Education Hunter R. Boylan, Barbara S. Bonham, 2014-02-14 Developmental Education Readings on Its Past Present and Future offers twenty two selections on historical efforts to serve underprepared students on the state of developmental education today and on innovative practices and possible directions for the future Compiled by Hunter R Boylan Director of the National Center for Developmental Education NCDE and a professor of Higher Education at Appalachian State University and Barbara S Bonham a professor in the Department of Leadership and Educational Studies at Appalachian State University each chapter also includes introductions and questions for discussion and reflection

**Selected Models of Developmental Education Programs in Higher Education** Vernon L. Farmer, Wilton A. Barham, 2001-04-11 Selected Models of Developmental Education Programs in Higher Education includes models that are based on defensible theories about how students grow and develop at all levels of the learning continuum These models emphasize the theories and concepts that underlie developmental education as a field of practice and research with a theoretical foundation in developmental psychology and learning theory The theory based models consist of methods and techniques for implementing developmental education activities and ways of creating environments intended to improve developmental students learning outcomes These models include a rationale a theory that justifies the models and an explanation of how the models are designed The rationale is supported by empirical evidence that the models work These models were selected because they represent varied frames of reference toward educational goals and objectives Therefore this book is a valuable resource for scholars researchers educators and practitioners seeking to improve developmental students learning outcomes in developmental education programs in institutions of higher education     **Development Education in Japan** Yuri Ishii, 2003-05-09 This book aims to provide an explanation for the slow introduction of Development Education in Japan     *Universal Design in Higher Education* Sheryl E. Burgstahler, Rebecca C. Cory, 2010-01-01 Universal Design in Higher Education looks at the design of physical and technological environments at institutions of higher education at issues pertaining to curriculum and instruction and at the full array of student services Universal Design in Higher Education is a comprehensive guide for researchers and practitioners on creating fully accessible college and university programs It is founded upon and contributes to theories of universal design in education that have been gaining increasingly wide attention in recent years As greater numbers of students with disabilities attend postsecondary educational institutions administrators have expressed increased interest in making their programs accessible to all students This book provides both

theoretical and practical guidance for schools as they work to turn this admirable goal into a reality It addresses a comprehensive range of topics on universal design for higher education institutions thus making a crucial contribution to the growing body of literature on special education and universal design This book will be of unique value to university and college administrators and to special education researchers practitioners and activists *Resources in Education* ,2001
