Restructuring Schools, Reconstructing Teachers Peter Woods, Bob Jeffrey, Geoff Troman, Mari Boyle, 2019-07-01 Drawing on wide ranging research this book originally published in 1997 explores how the policy changes of previous years were affecting primary teachers and their work at the time Within the context of worldwide restructuring the thoughts feelings and activities of teachers in their daily work are examined The core argument is that what used to be a complex but fulfilling job distinguished by professional dilemmas which are amenable to professional skill had become increasingly marked by tension and constraint which frustrates teacher creativity While some teachers found new opportunities in the new primary school many used strategical and micro political activity in order to cope while others fell victim to stress and burnout The authors argue that teachers own active involvement in policy change is required if their creative potential is to be realized The book will still be of interest to teachers in primary schools researchers and policy makers

**Teacher Retention in an Age of Performative Accountability** Jane Perryman,2022-03-30 In this insightful and

timely volume Jane Perryman provides a definitive analysis of the crisis in teacher recruitment and retention through a critique of the culture of performative accountability in education bringing together theory literature and empirical data Drawing on data across several long term research projects and through a Foucauldian theoretical framework Perryman argues that teachers working lives both in the UK and internationally are being increasingly affected by the rise in the neoliberal performativity and accountability culture in schools Teachers work is increasingly directed towards assessment exams progress measures and preparation for review and inspection and drawn away from the more individualistic and creative aspects of the job This culture of hyper accountability and super performativity Perryman argues has created a discourse of disappointment where the hopes and aspirations of teachers are crushed beneath the performative pressures under which they work Teacher Retention in an Age of Performative Accountability offers a convincing compellingly written critical analysis of how the values purposes and practices embedded in education affect the working experience of teachers over time Perryman makes a significant contribution to our understanding of the effects of accountability and performativity mechanisms in schools and offers insight into why so many teachers leave the profession This analysis is important to scholars educators and policymakers alike
