Quality of Higher Education Yihuan Zou,2022-09-01 Quality in higher education was not invented in recent decades universities have always possessed mechanisms for assuring the quality of their work The rising concern over quality is closely related to the changes in higher education and its social context Among others the most conspicuous changes are the massive expansion diversification and increased cost in higher education and new mechanisms of accountability initiated by the state With these changes the traditional internally enacted academic quality keeping has been given an important external dimension quality assurance which requires higher education institutions to continuously demonstrate and improve

performance and which also provides new systems of rewards and sanctions However the complex impacts of quality assurance policies have shown a need to further understand the quality issue in higher education This book is about constructing a more inclusive understanding of quality in higher education through combining the macro meso and micro levels i e from the perspectives of national policy higher education institutions as organizations in society individual teaching staff and students It covers both theoretical constructions for understanding quality and empirical investigation in the Chinese context The questions addressed are How is quality of higher education perceived by the institution teaching staff and students respectively What are the main concerns for the institution teaching staff and students in their own pursuit of quality It has been concluded that quality of higher education is not only about educational quality but also about expanding life chances for the students prosperity in the administrative system for the teaching staff and organizational prosperity for the institution With regard to quality assurance and accountability in higher education special attention should be given to the values pursued and be careful to balance between immediate single value efficiency and sustainable development and a wider range of values that higher education serves

Introduction to the Foundations of American Education James Allen Johnson,1988 *Quarterly Review of the Evangelical Lutheran Church* ,1910 **How to Teach without Instructing** Rolf Arnold,2015-06-03 Teaching and learning are two interrelated terms used to express our thinking about a major aspect of human development However didactics developed into an art the art of teaching while the processes of learning were neglected and not researched Nowadays many people perceive learning as an undesirable activity The experience of learning is thought of as something expected of them from the outside and it is often remembered as stressful a pressure to perform a fear of failure and alienation But there are also some enriching experiences such as the joy of discovery to ultimately achieve after many attempts something that you could not do previously or to see a situation in a new light How to Teach Without Instructing relinks teaching and learning It examines the teaching practices in institutions of learning and formulates rules that assist teachers in their efforts to focus their teaching on the learner The rules are based on situations that are routinely encountered in the teaching environment

Obaku Zen Helen J. Baroni,2000-01-01 This is the first detailed English language study of the Obaku branch of Japanese Zen Beginning with the founding of the sect in Japan by Chinese monks in the seventeenth century the volume describes the conflicts and maneuverings within the Buddhist and secular communities that led to the emergence of Obaku as a distinctive institution during the early Tokugawa period Throughout the author explores a wide range of texts and includes excerpts from important primary documents such as the Zenrin shuheishu and the Obaku geki translated here for the first time She provides an impressive portrait of the founding Chinese leadership and the first generation of Japanese converts whose work enabled the fledgling sect to grow and take its place beside existing branches of the closely related Rinzaï Zen sect Obaku s distinctive Chinese practices and characteristics set it apart from its Japanese counterparts In an innovative investigation of these differences the author uses techniques derived from the contemporary study of new religious movements in the West to explain both Obaku s successes and failures in its relations with other Japanese Buddhist sects She illuminates the role of government support in the initial establishment of the main monastery Mampuku ji and the ongoing involvement of the bakufu and the imperial family in Obaku s early development Hers is a thorough and well governed analysis that brings to the fore a religious movement that has been much neglected in Japanese and Western scholarship despite its tremendous influence on modern Japanese Buddhism as a whole

Liberating The Learner Terry Atkinson,Guy Caxton,Marilyn Osborn,Mike Wallace,2013-12-16 There is clear evidence that the quality of children s learning in school is very dependant on the style of the teacher s approach and the learning environment he or she creates This in turn is a reflection of teachers own beliefs anxieties and enthusiasms about learning often gained through their own educational experiences This edited volume provides a new framework for exploring teachers views on a whole range of professional issues for instance the nature of teaching and learning the needs of students and their own abilities as learners Within this is presented a variety of case studies which illustrate how teachers views impact upon students learning The book builds on the well established assumption that teachers are themselves also learners and that the learning processes involved in professional development are in many ways the same as those involved in a classroom context It shows how the conclusions drawn from this study can be used in a practical way to assist teachers professional development throughout their career All teacher trainers and mentors who take seriously their role of helping children to be resourceful resilient and reflective learners will find that this book helps them to achieve this aim
