Today's students literally grew up with the Internet. For too many students though, the glowing computer screen in front of them is just another game platform, shopping mall, or telephone line. But teachers who can help students use the Internet as a learning tool will improve their instruction and their students' learning. *Using the Internet to Strengthen Curriculum* is not a technical book; rather, it is a book about teaching. Its focus is on helping teachers learn how to bring the Internet's World Wide Web into their classrooms and to encourage students to tap into this incredible informational resource. Using strategies provided by author Larry Lewin, teachers can help students use search engines effectively, quickly find Web sites and understand their content, conduct sound research, think critically to learn independently, avoid plagiarism, and construct presentations on what they have learned. Through dozens of examples and strategies such as the Pre-Search, We-Search, and Free-Search, this book serves as an invaluable reference tool for teachers, media specialists, and technology coordinators.

*The Internet and the World Wide Web for Teachers* Eugene F. Provenzo, 2002. This brief handbook serves as an excellent resource and guide to help teachers use the Internet and the World Wide Web. By following the National Council for the Accreditation of Teacher Education (NCATE) guidelines on Technology and the New Professional Teacher and the International Society for the Study of Technology and Education's (ISTE's) National Standards for Teachers, the author provides a practical and engaging introduction to using the Internet and the World Wide Web. This book is an ideal reference for teachers in today's technology age, an era in which the Internet and the World Wide Web are continually redefining the ways in which students learn and teachers teach. For teachers interested in using technology in their classrooms:

**Web-based Instruction** Badrul Huda Khan, 1997. A cutting-edge collection of 59 essays solicited from Web-based instructors offering a variety of perspectives, notions, and experiences in the practice of virtual teaching. The compendium introduces the evolution and status of distance learning, critical issues in Web-based learning environments, such as the similarities and differences between Web-based and traditional classrooms, specific discussions on designing learning activities and electronic textbooks, an evaluation of delivery systems for instruction, and case studies of Web-based courses from kindergarten and beyond to the instruction of literature, astronomy, and foreign languages. Includes illustrations.

Annotation copyrighted by Book News Inc., Portland, OR. **Learning from Cyber-Savvy Students** Anne Hird, 2003-07-21. As the Internet has become a common household utility, more and more students are coming to school with Internet experience. How do students' and teachers' roles and schools as institutions change when these Internet Age kids enter classrooms that are fully equipped with networked computers? This book offers a unique analysis of the issues and challenges teachers face as their classrooms become fully connected to the Internet. Anne Hird spent six months observing a class in a school with fully connected classrooms. She presents a vivid and insightful account, often reported through the students' own words, of how young teens use computers in and out of school, how they perceive the world shaped by the Internet, and how these factors shape their expectations for classroom learning. She observes and reflects on the paradox which confronts teachers in this

environment They are expected to guide students in learning with a cognitive tool that was not part of the teachers experience as students while students familiarity with the Internet calls into question the authority of the teacher on which the traditional teacher student relationship is based She offers a strategy for professional development which recognizes and builds on this inevitable shift in the teacher student relationship This is an absorbing thought provoking and practical book for all educators individual teachers and administrators alike concerned about the integration of computer technology into elementary and secondary school classrooms
