Teaming Up Components Of Safety Under High Risk:

Teaming Up: Components of Safety Under High Risk Kateri Jochum, 2017-09-29 All accidents and incidents at the workplace and the resulting consequences are tied to human beings and their actions. Although their avoidance has been a crucial part of training in aviation for the past twenty years, it has been largely ignored in many other occupations with team structures similar to those in aviation. In such professions and workplaces, those involved are under high stress with enormous workloads, simultaneously completing mental and motor tasks, facing unexpected situations involving great risk and with uncertain final outcomes. The goal of researchers is to find ways to minimize human error and to understand the interaction amongst the members of the team fulfilling the task. Specialized training programmes, good management and clear rules that lay out which member is responsible for making decisions can be the first steps to reducing and managing such errors. This book is a major result of the Gottlieb Daimler and Karl Benz Foundation's 6th Berlin Colloquium Interaction in High Risk Environments, hosted in 2002 by the Psycholinguistic Group of the Humboldt University Institute for German Language and Linguistics. This group is affiliated with the ongoing research group Group Interaction in High Risk Environments, GIHRE, sponsored by the Foundation based in Ladenburg, Germany. The Colloquium brings together experts from aerospace, clinical medicine, nuclear power, psychology, linguistics and psycholinguistics to include fields that have yet to be a major focus of scientific investigations. Together, the authors explore scientific advances with direct application to a range of high risk environments. The aim is to address the issues and root causes of error and lack of teamwork by combining the knowledge of scientific experts with experience gained in different fields of industry and public life. Chapters span space travel, risk in the cockpit, safety in medicine, nuclear, submarine, salvage, large construction sites, police. **Teaming Up:**

Group Interaction in High Risk Environments Rainer Dietrich, Traci Michelle Chhildress, 2017-03-02 What governs the way in which people work together and handle technology in high risk environments The understanding of decision making communication and the other dimensions of team interaction within aircrews and other teams in highly stressful situations is based on a multitude of diverse factors each with its own literature and individual studies This book is about how teams function in just such situations providing a uniquely integrated and interdisciplinary account of the dynamics and main explanatory factors of team interaction under high workload The book stems from the interdisciplinary research project Group Interaction in High Risk Environments GIHRE a Collegium of the Gottlieb Daimler and Karl Benz Foundation The goals of the project and therefore the book are to investigate analyze and understand the behavior of professional groups working in high risk environments and to develop practical suggestions for enhancing performance A central focus of this book is how groups in these professions deal with the factors that can threaten the safety and effectiveness of their task performance whether these factors are part of the environment or part of the team itself Four representative workplaces were investigated in three broad settings in aviation the cockpit of a commercial airliner in medicine the operating room and the intensive care unit of a hospital in nuclear power the control room of a nuclear power plant The international and interdisciplinary composition of the Collegium ensures the book features a variety of different methodological and conceptual approaches which are brought to bear at both theoretical and practical levels Readers working in all related fields will find value in the case descriptions the academic synthesis of the similarities between them and ways to approach new challenges specialists in applied psychology human factors and technical management will gain new insights

Crisis Management in Acute Care Settings Michael St. Pierre, Gesine Hofinger, Cornelius Buerschaper, 2007-11-08 This book addresses all issues relevant to error prevention and safe practice in the acute and emergency health care setting It begins with the basic principles of human behavior and decision making and then partitions into three sections where the individual the team and the organizational influences within the health care system are discussed in greater depth Case reports and proven strategies help to ground psychological theory in daily practice This book has emerged from a long standing cooperation between clinicians and psychologists Blending the strengths of both professions into a readily accessible text has created a book which will hopefully help both physicians and non physicians to better understand the principles of human behavior and decision making in critical situations and in turn enable them to provide safer treatment Unsuspected medical crisis and emergency situations may be

managed more effectively and an increased awareness of contributing factors may help to avoid errors from the outset

Aviation Mental Health Todd Hubbard, Dr Robert Bor, 2012-10-01 This book provides an authoritative and practical guide to the assessment management treatment and care of pilots and other professional groups within aviation covering a range of relevant topics for health and human resources practitioners working in the airline industry Pilot mental health has hitherto been regarded as a specialist topic in aviation medicine Consequently practitioners and researchers alike have been forced to consult specialist journals or seek out a relevant chapter on this topic in a general textbook to develop or update their understanding of the relevant issues This book seeks to remedy this situation by gathering together all of the relevant insights into a single authoritative source gathered from the leading specialists in the field It aims to cover all of the main relevant issues including the assessment care management and treatment of mental health problems as well as the prevention of mental health problems among this occupational group

Human Error in Aviation R. Key Dismukes, 2017-07-05 Most aviation accidents are attributed to human error pilot error especially Human error also greatly effects productivity and profitability In his overview of this collection of papers the editor points out that these facts are often misinterpreted as evidence of deficiency on the part of operators involved in accidents Human factors research reveals a more accurate and useful perspective The errors made by skilled human operators such as pilots controllers and mechanics are not root causes but symptoms of the way industry operates The papers selected for this volume have strongly influenced modern thinking about why skilled experts make errors and how to make aviation error resilient
